How to Reach Us

Powerful Capabilities

Sophisticated Functionality

Engineered Simplicity

Reliable

Good signal strength assures uninterrupted communication. Banner offers an integrated site survey capability to evaluate and ensure good radio signal strength prior to installation.

Scalable

Banner wireless networks grow with your needs. Simple wire replacement products are preconfigured to support up to six Nodes and can be expanded to accommodate as many as 47 Nodes using the configuration software.

Long Range

Designed for long distance applications, Banner wireless networks are capable of up to six miles of line-of-sight coverage, making them an ideal solution for applications in remote and difficult to access locations or where running wire or conduit is impractical or too expensive.

Banner's Simple Wire Replacement product line provides flexible networks that are easy to set up without software. Setting up a basic point-to-point network is as easy as pairing a cell phone to a headset.

Secure

Binding radio Nodes in a network locks them to a specific Gateway. After the devices are bound, each Gateway only accepts data from the Nodes that are bound to it.

Sensors, Lighting and Indicators

Wireless sensors, lighting, and indicators allow you to remotely monitor and diagnose systems quickly, which reduces downtime, increases productivity, and provides data to optimize your operation. They are easy to install and set up, eliminate expensive cable runs, and can integrate machines that were not previously network capable.

Temperature and Humidity Sensor

M12FTH4Q and M12FT4Q

A simple way to verify conditions in locations that were once too difficult to access via traditional monitoring methods. With no software required, you can replace cables and extend the range of temperature and humidity signals with minimal effort.

Key Features:

- \bullet Achieves temperature accuracy of \pm 0.3 °C and humidity accuracy of \pm 2% relative humidity
- Temperature and relative humidity sensing elements housed in a robust metal housing
- Traceable to NIST standards
- Temperature and Humidity or Temperature-only Sensor to choose from
- Each sensor comes with a Certificate of Factory Calibration
- Reduces labor costs by obviating manual checks and reducing error

Simple Wire Replacement

- 4 to 20 mA Analog Out for scaled humidity

Host Controlled via Modbus RTU (up to 47 Nodes)

Models	Description

M12FTH4Q and M12FT4 Specifications

Supply Voltage	3.6 to 5.5 V dc	
Current	Default sensing: 28 μAmps Disabled sensing: 15 μAmps Active comms: 4.7 mA	
Mounting Threads	M12 x 1	
Indicators	Green flashing: Power ON	Red flicker: Serial Tx
Communication Hardware	Interface: 1-wire Serial Interface Baud rates: 9.6k, 19.2k (default), or 38.4k	Data format: 8 data bits, no parity (default), 1 stop bit (even or odd parity available)
Communication Protocol	Sure Cross® DX80 Sensor Node 1-wire Serial Interface	
Communications Line	Level Receive ON: Greater than 2 V Level Receive OFF: Less than 0.7 V	Level Transmit ON: 2.7 to 3 V Level Transmit OFF: 0 V (pulldown resister of 10 kOhm)
Humidity	Measuring Range: 0 to 100% relative humidity Resolution: 0.1% relative humidity Accuracy: ±2% relative humidity at 25 °C	
	NOTE: Humidity measurements are only available with the The M12FT4Q model does not include the humic	ne M12FTH4Q model. Jity sensor.
Temperature	Measuring Range: –40 to +85 °C (–40 to +185 °F)² Resolution: 0.1 °C Accuracy: ±0.3 °C at 25 °C	
Environmental Rating	NEMA 6, IEC IP67	
Operating Conditions	–40 to 85 °C (–40 to 185 °F)	
Shock and Vibration	IEC 68-2-6 and IEC 68-2-27 Shock: 30g, 11 millisecond half sine wave, 18 shocks Vibration: 0.5 mm p-p, 10 to 60 Hz	

Temperature and Humidity Sensor

M12FTH3Q and M12FT3Q

This temperature and humidity solution works in a variety of environments to wirelessly provide temperature and humidity measurements via Modbus RTU, RS-485.

Key Features:

- \bullet Achieves humidity accuracy of ±2% relative humidity and temperature accuracy of ± 0.3 °C
- Manufactured with a robust metal housing
- Traceable to NIST standards
- Functions as a Modbus slave device via RS-485

Models	Description	
M12FTH3Q	Temperature and humidity sensor with Modbus RTU, RS-485 Interface

Vibration and Temperature Sensor

QM42VT

•	HANNER
	QM42VT1 1 Voc 2 Select 3 Grd 4 Reserved

The QM42VT Vibration and Temperature Sensor makes it easy to monitor a machine's health. It measures RMS velocity (among other vibration characteristics) and temperature so that problems can be detected before they become too severe and cause additional damage or result in unplanned downtime. Paired with a Banner wireless Node, it can provide local indication, wirelessly send the signal to a central location, and send the vibration and temperature data to the Gateway for collection and trending.

Key Features:

- Easily monitor machine health by sending info wirelessly to wherever you need it
- Avoid machine failures and delays by detecting problems early
- Reduce downtime and plan maintenance more efficiently
- Monitor a variety of machines to suit your needs

- Motors

- Compressors

Select Node: one sensor per Node

Select Gateway: (up to 47 sensors/Nodes) or Data Radio (up to 50+ sensors/Nodes per Master Radio)

Model	Description

Wireless Ultrasonic Sensor

K50U

The Sure Cross® U-GAGE® K50U Ultrasonic Sensor works in a variety of environments to provide a measurement of the distance between the target and the sensor. It is designed for plug-and-play use with the Q45U wireless node, creating a cost-effective and easy-to-use solution for monitoring mobile or remote tanks and totes.

Key Features:

- Provides a distance measurement from the target to the sensor
- Three meter sensing range with a 300 mm dead zone
- Built-in temperature compensation
- Rugged design for demanding sensing environments; rated IEC IP67, NEMA 6P
- Two sensor models available; one with a 1-wire Serial Interface and one that functions as a Modbus slave via RS-485

Model

DX80SR9M-H

DX80SR2M-H

K50UX1RA	Ultrasonic sensor with 1-wire Serial Interface
K50UX2RA	Ultrasonic sensor that functions as a modbus slave device via RS-485

Serial Interface: RS-232, RS-485

K50UX1RA-Used with		
DX80N9Q45U	O45 Windows Nede with integrated better

Photoelectric Q45 Sensors

Q45 Sensors

The Sure Cross® Q45 is the first self-contained wireless standard photoelectric solution for the most challenging control and monitoring needs. Easily add a scalable wireless sensor network to improve efficiency by monitoring and coordinating multiple machines and processes without pulling cables.

Key Features:

- True self-contained wireless with no cables, cordsets or external power
- 1 km line-of-sight
- Built-in antenna
- Retroreflective and Diffuse models are preconfigured to count up to 960 parts per minute

* Emitter and Receiver (E/R) are normally specified in pairs

Photoelectric Q45 Sensor Specifications

Radio (2.4 GHz)	Range: Up to 1000 m (3280 ft) with line of sight Transmit Power: 65 mW EIRP
2.4 GHz Compliance	FCC ID UE300DX80-2400 - This device complies with FCC Part 15, Subpart C, 15.247 ETSI/EN: In accordance with EN 300 328: V1.8.1 (2012-04) IC: 7044A-DX8024
Spread Spectrum Technology	FHSS (Frequency Hopping Spread Spectrum)
Construction	Molded reinforced thermoplastic polyester housing, oring-sealed transparent Lexan® cover, molded acrylic lenses, and stainless steel hardware. Q45s are designed to withstand 1200 psi washdown.
Typical Battery Life	Up to 2 years, typical A typical battery life assumes an average of 10 seconds between sensor changes of state and the default 62.5 millisecond sample rate. Battery life is reduced to 1 year with an average of 1 second between changes of state.
Default Sensing Interval	62.5 milliseconds
Adjustments	Multi-turn sensitivity control (allows precise sensitivity setting - turn clockwise to increase gain.
Sensing Range	Retroreflective: 0.15 m to 6 m (6 in to 20 ft) Diffuse: 101 mm to 300 mm (4 in to 12 in) Opposed: Up to 30 m (100 ft) depending on Excess Gain requirements Glass Fiber Optic: 1½-in focal point
Report Rate	On Change of State
Indicators	Red and green LEDs (radio function); amber LED (only for alignment mode)
Environmental Rating	NEMA 6P, IEC IP67
Operating Conditions	–40 °C to 70 °C (–40 °F to 158 °F); 90% relative humidity at 50 °C (non-condensing)

Q45 1-Wire Serial Models

Q45U, Q45VT and Q45TH

The Q45 1-wire serial nodes are designed to pair with Banner 1-wire serial sensors. The compact size, integrated lithium batteries, and built-in LED indicator light make remote monitoring easy to do.

- The Q45U is a universal 1-wire serial node that reads any Banner 1-wire serial sensor and determines an efficient power setting accordingly. It includes a red/green/yellow/blue LED to provide local indication.
- The Q45VT is designed to pair with the QM42VT1 vibration and temperature sensor; vibration thresholds can be set using dip switches and a built-in LED is pre-mapped to illuminate when a threshold has been exceeded.
- The Q45TH connects directly to the M12FTH4Q temperature and humidity sensor; sample rates can be set using DIP switches, and a red/green LED can be used to provide local indication.

Q45VT, Q45TH, Q45U Specifications

	900 MHz	2.4 GHz
Radio Range	Up to 3.2 Km (2 miles) with line of sight	Up to 1000 m (3280 ft) with line of sight
Minimum Separation Distance	4.57 m (15 ft)	0.3 m (1 ft)
Transmit Power	1W (25 dBm)	65 mW
Compliance	FCC ID UE3RM1809 - This device complies with FCC Part 15, Subpart C, 15.247 ETSI EN 300 328 V1.8.1 IC: 7044A-RM1809	FCC ID UE300DX80-2400 - This device complies with FCC Part 15, Subpart C, 15.247 ETSI EN 300 328 V1.8.1 (2012-06) IC: 7044A-DX8024
Spread Spectrum Technology	FHSS (Frequency Hopping Spread Spectrum)	
Default Sensing Interval	Q45VT: 5 minutes Q45TH: 64 seconds Q45U: 5 minutes	
Temperature Sensor	Measuring Range: –40 °C to +85 °C (–40 °F to +185 °F) Resolution: 0.1 °C Accuracy: ±0.3 °C	
Humidity Sensor	Measuring Range: 0% to 100% relative humidity Resolution: 0.1% relative humidity Accuracy: $\pm 2\%$ relative humidity at 23 °C	
Indicators	Red and green LEDs (radio function)	
Connection	One 5-pin threaded M12/Euro-style female quick-disconnect	
Construction	Molded reinforced thermoplastic polyester housing, oring-sealed transparent Lexan® cover, molded acrylic lenses, and stainless steel hardware. Q45s are designed to withstand 1200 psi washdown.	
Typical Battery Life at Default Sensing Interval	Q45VT: Up to 2.5 years Q45TH: Up to 1.5 years Q45U: 2+ years	Q45VT: Up to 3 years Q45TH: Up to 2 years Q45U: 3+ years
Environmental Rating	NEMA 6P, IEC IP67	
Operating Conditions	–40 °C to 70 °C (–40 °F to 158 °F); 90% relative humidity at 50 °C (non-condensing)	

Q45 Switches and Pushbuttons

Q45RD and Q45BL

proximity sensors.

This Q45 family of products is designed to accept remote dry contact, NAMUR and discrete noncontact switch inputs to be used in many factory automation, remote monitoring and IIoT applications.

• Remote device models are designed to interface with isolated dry contact inputs or NAMUR inductive

- Button and light models have independently controlled push button inputs and a multi-color LED indicator light.
- Remote discrete non-contact switch models use a magnet to sense the position of mechanical devices, such as doors, levers, valves, and other actuators.

Q45RD and Q45BL Specifications

	900 MHz	2.4 GHz
Radio Range	Up to 3.2 Km (2 miles) with line of sight	Up to 1000 m (3280 ft) with line of sight
Minimum Separation Distance	1W: 4.57 m (15 ft) 150/250 mW: 2 m (6 ft)	0.3 m (1 ft)
Transmit Power	1W (25 dBm)	65 mW EIRP
Compliance	FCC ID UE3RM1809 - This device complies with FCC Part 15, Subpart C, 15.247 ETSI EN 300 328 V1.8.1 IC: 7044A-RM1809	FCC ID UE300DX80-2400 - This device complies with FCC Part 15, Subpart C, 15.247 ETSI/EN: In accordance with EN 300 328: V1.8.1 (2012-06) IC: 7044A-DX8024
Spread Spectrum Technology	FHSS (Frequency Hopping Spread Spectrum)	
Externally Powered Sourcing Sensors (Q45RD models)	ON Condition: 2 V to 5 V OFF Condition: Less than 1 V	
Button Input (Q45BL models)	Sample Rate: 62.5 milliseconds Report Rate: On change of state	ON Condition: Button pressed OFF Condition: Button not pressed
Construction	Molded reinforced thermoplastic polyester housing, oring-sealed transparent Lexan® cover, molded acrylic lenses, and stainless steel hardware. Q45s are designed to withstand 1200 psi washdown.	
Indicators	Red and green LEDs (radio function); amber LED indicates when input 1 is active	
Environmental Rating	NEMA 6P, IEC IP67	
Battery Life	See Datasheet	
Default Sample Rate	62.5 milliseconds (dry contact) or 125 milliseconds (NAMUR)	
Report Rate	On Change of State	
Operating Conditions	-40 °C to 70 °C (-40 °F to 158 °F); 90% relative humidity at 50 °C (non-condensing)	
Certifications	CE	

6-Button Pendant

Q120

The Sure Cross® Wireless Q120 button and light pendant is an autonomous wireless Node that enables two-way communication between an operator and up to six remote and/or mobile devices. Six independently controlled push-button inputs allow operators to wirelessly send status updates, acknowledgements, initiate processes, and actuate devices.

Key Features:

- DIP switch configurable
- Six push-button inputs with momentary or toggle operation
- Six sets of red and green LED indicator lights with solid or flashing operation
- Reliable, field-proven wireless architecture operates in the globally accepted 2.4 GHz frequency band or the long-range 900 Mhz frequency band, depending upon model

Applications:

- Call for parts, service, or pick up
- Motor, fan, pump control and status indication
- Light control

Q120 Specifications

	900 MHz	2.4 GHz
Radio Range	Up to 3.2 Km (2 miles)	Up to 1000 m (3280 ft)
Minimum Separation Distance	4.57 m (15 ft)	0.3 m (1 ft)
Compliance	FCC ID UE3RM1809: This device complies with FCC Part 15, Subpart C, 15.247 IC: 7044A-RM1809	FCC ID UE300DX80-2400 - This device complies with FCC Part 15, Subpart C, 15.247 ETSI EN 300 328 V1.8.1 (2012-06) IC: 7044A-DX8024
Spread Spectrum Technology	FHSS (Frequency Hopping Spread Spectrum)	
Construction	Polycarbonate housing; polyester labels; EDPM rubber cover gasket; nylon buttons Weight: 0.39 kg (0.85 lbs) Maximum Tightening Torque: 0.56 N·m (5 lbf·in)	
Indicators	Red and green LEDs (radio function)	
Environmental Rating	NEMA 6, IEC IP67	
Battery Life	See Datasheet	
Operating Conditions	-40 °C to 70 °C (-40 °F to 158 °F); 90% relative humidity at 50 °C (non-condensing)	

Wireless Tower Light

TL70

Easily add wireless communication and networking capabilities to your tower lights by using Banner's Wireless Base or Wireless Communication Segment.

Key Features:

- Easily add IIoT remote monitoring capabilites
- Enable Overall Equipment Effectiveness (OEE) data collection to optimize your operation
- Receive timely status information and remote notifications of problems
- Simplify installation by not having to run control wires
- Rugged, water-resistant IP65 housing with UV-stablilized material allows for use in harsh environments

Wireless Base

The Wireless Base provides full bi-directional communication, plus event counter inputs. It can be configured into preassembled tower lights,

Buy this if:

- You want to buy a preassembled tower light with wireless connectivity
- You can supply constand power to the light
- Your machines have PNP outputs to the tower light
- Your sole intent is to control light segements via the wireless radio

Wireless Communication Segment

The Communication segment adds wireless communication and networking capabilities to any standard TL70 Base, without requiring constant power or expensive wiring.

Buy this if:

TION

TION

TION

- You want to add wireless connectivity to an existing TL70 Tower Light
- You can not supply constant power to the light
- Your machines have both NPN and PNP inputs
- You have a TL70 ac base

TL70 Wireless Tower Light Specifications

Supply Voltage	12 to 30 V dc (Outside the USA: 12 to 24 V dc, ± 10%)	
Supply Protection Circuitry	Protected against transient voltages	
Indicator Response Time	OFF Response: 150 µs (maximum) at 12 to 30 V dc ON Response: 180 ms (maximum) at 12 V dc; 50 ms (maximum) at 30 V dc	
Audible Alarm	2.6 KHz \pm 250 Hz oscillation frequency; maximum intensity 92 dB (Audible) and 101dB (Louder Audible) at 1 m (3.3 ft) (typical)	
Indicators	1 to 5 colors depending on model: Green, Red, Yellow, Blue, and White $$ Flash rates: 1.5 Hz $\pm 10\%$ and 3 Hz $\pm 10\%$ LEDs are independently selected	
Construction	Bases, segments, covers: polycarbonate	
Operating Conditions	-40 °C to +50 °C (-40 °F to +122 °F) 95% at +50 °C maximum relative humidity (non-condensing)	
Environmental Rating	IEC IP65	
Vibration and Mechanical Shock	Vibration 10 to 55 Hz 0.5 mm p-p amplitude per IEC60068-2-6 Shock 15G 11 ms duration, half sine wave per IEC60068-2-27	
Radio Range	900 MHz, 1 W: Up to 9.6 km (6 miles)	2.4 GHz, 65 mW: Up to 3.2 km (2 miles)
Minimum Separation Distance	900 MHz 1 W: 4.57 m (15 ft)	2.4 GHz 65 mW: 0.3 m (1 ft)
Radio Transmit Power	900 MHz, 1 W: 30 dBm (1 W) conducted (up to 36 dBm EIRP)	2.4 GHz, 65 mW: 18 dBm (65 mW) conducted, \leq 20 dBm (100 mW) EIRP
Compliance	900 MHz Compliance (1 Watt) FCC ID UE3RM1809: This device complies with FCC Part 15, Subpart C,15.247 IC: 7044A-RM1809	2.4 GHz Compliance FCC ID UE300DX80-2400 - This device complies with FCC Part 15, Subpart C, 15.247 ETSI EN 300 328 V1.8.1 (2012-06) IC: 7044A-DX8024
Radiated Immunity HF	10 V/m (EN 61000-4-3)	
Spread Spectrum Technology	FHSS (Frequency Hopping Spread Spectrum)	
Link Timeout	Gateway: Configurable via User Configuration Tool (UCT) software	Node: Defined by Gateway
Certifications		

Wireless Indicator

K70

Wireless K70 Indicators are bright, 70 mm multicolored indicators offering increased communication possibilities and greater versatility in deployment.

Key Features:

- Models are available with up to five colors in one device
- Rugged, water-resistant IP65 housing
- SureCross wireless node built into the base
- 900 MHz and 2.4 GHz wireless options
- Input wires can be configured as auxiliary sourcing inputs from external devices or as a 20 Hz, 32-bit event counter

Applitcations:

- Clean room status indication
- Loading dock status
- High traffic forklift crossing status

K70 Wireless Indicator Light Specifications

Supply Voltage	12 to 30 V dc (Outside the USA: 12 to 24 V dc, ± 10%)	
Supply Protection Circuitry	Protected against transient voltages	
Indicator Response Time	OFF Response: 150 µs (maximum) at 12 to 30 V dc ON Response: 180 ms (maximum) at 12 V dc; 50 ms (maximum) at 30 V dc	
Audible Alarm	2.6 KHz ± 250 Hz oscillation frequency; maximum intensity 92 dB (Audible) and 101dB (Louder Audible) at 1 m (3.3 ft) (typical)	
Indicators	OFF Response: 150 μs (maximum) at 12 to 30 V dc ON Response: 180 ms (maximum) at 12 V dc; 50 ms (maximum) at 30 V dc

Wireless Touch Button

K70

The K70 Wireless Touch Button is an ergonomic solid-state switch with integrated multicolor indication functions and a wireless Node. Bidirectional wireless communication provides a simple operator interface for many industrial applications.

Key Features:

- Bidirectional wireless communication
- Ergonomically designed to eliminate hand, wrist, and arm stresses associated with repeated switch operation; requires no physical force to operate
- Can be actuated with bare hands or in gloves
- Up to three colors in one touch button; momentary and latching versions available
- Excellent immunity to false triggering by water spray, detergents, oils, and other foreign materials

Applications:

- Pick-to-light
- Call button
- General industrial applications

K70 Wireless Touch Button Specifications

Supply Voltage	12 to 30 V dc (Outside the USA: 12 to 24 V dc, ± 10%)	
Supply Current	< 220 mA maximum current at 12 V dc < 110 mA maximum current at 30 V dc	
Supply Protection Circuitry	Protected against transient voltages	
Indicators	1 to 3 colors depending on model: Green, Red, Yellow, E	Blue, and White LEDs are independently selected
Indicator Response Time	OFF Response: 150 µs (maximum) at 12 to 30 V dc ON Response: 180 ms (maximum) at 12 V dc; 50 ms (maximum) at 30 V dc	
Construction	Bases and cover: polycarbonate	
Operating Conditions	-40 °C to +50 °C (-40 °F to +122 °F) 95% at +50 °C maximum relative humidity (non-condensing)

Industrial wireless controllers that facilitate industrial Internet of Things (IIoT) applications.

DXM100 Wireless Controller

The DXM100 Controller is an industrial wireless controller developed to facilitate Ethernet connectivity and Industrial Internet of Things (IIoT) applications. Available with an internal DX80 Gateway or a MultiHop Data Radio, this powerful Modbus communications device connects local wireless networks with the internet and/or host systems.

Key Features:

- ISM radios available in 900 MHz and 2.4 GHz for local wireless network
- Converts Modbus RTU to Modbus TCP/IP or Ethernet I/P
- Logic controller can be programmed using action rules and text language methods
- Cellular connectivity
- Micro SD card for data logging
- Email and text alerts
- Local I/O options: universal inputs, NMOS outputs, and analog outputs
- Powered by 12 to 30 V dc, 12 V dc solar panel, or battery backup
- RS-232, RS-485, and Ethernet communications ports; and a USB configuration port
- LCD display for I/O information and user programmable LEDs

* For S1 and S2 models, only order the R2, R4, R5, and R9 radio configurations

Cellular Communication

Controllers accept Banner GSM and LTE modems only. Cellular modems are ordered separately as accessories under the following part numbers:

• GSM/3G (HSPA) – **SXI-GSM-001** • LTE – Verizon – **SXI-LTE-001**

DXM100 Controllers Specifications

Supply Voltage	12 to 30 V dc use only with a suitable Class 2 power supply (UL) or 9 SELV (CE) powers supply or 12 V dc solar panel and 12 V sealed lead acid battery	
Power Consumption	B1 and B2 models: 35 mA average at 12 V	S1 and S2 models: 20 mA average at 12 V
Solar Power Battery Charging	1 Amp maximum with 20 Watt solar panel	
Radio (ISM Band) Transmit Power	900 MHz at 1 Watt	2.4 GHz at 65 mW
Radio Range	900 MHz, 1 Watt: Up to 9.6 km (6 miles)	2.4 GHz, 65 mW: Up to 3.2 km (2 miles)
Minimum Separation Distance	900 MHz, 1 Watt: 4.57 m (15 ft) 900 MHz, 150/250 mW: 2 m (6 ft)	2.4 GHz, 65 mW: 0.3 m (1 ft)
Antenna Connection	Ext. Reverse Polarity SMA, 50 Ohms Max Tightening Torque: 0.	45 N·m (4 lbf·in)
Radio Transmit Power	900 MHz, 1 Watt: 30 dBm (1 Watt) conducted (up to 36 dBm EIRP)	2.4 GHz, 65 mW: 18 dBm (65 mW) conducted, less than or equal to 20 dBm (100 mW EIRP)
Compliance	900 MHz Compliance (1 Watt) FCC ID UE3RM1809: This device complies with FCC Part 15, Subpart C,15.247 IC: 7044A-RM1809	2.4 GHz Compliance FCC ID UE300DX80-2400 - This device complies with FCC Part 15, Subpart C, 15.247 ETSI/EN: In accordance with EN 300 328: V1.8.1 (2012-04) IC: 7044A-DX8024
Spread Spectrum Technology	FHSS (Frequency Hopping Spread Spectrum)	
Logging	8 GB maximum; removable Micro SD card format	
Protocols	Modbus RTU Master/Slave, Modbus TCP, and Ethernet/IP	
Construction	Polycarbonate; DIN rail mount option	
Communication Hardware (RS-232)	2-wire full duplex; flow control –15 to +15 Volts signaling Baud rates: 9.6k, 19.2k (default), or 38.4k Data format: 8 data bits, no parity, 1 stop bit	
Communication Hardware (RS-485)	2-wire half duplex RS-485 Baud rates: 9.6k, 19.2k (default), or 38.4k Data format: 8 data bits, odd, even or no parity, 1 stop bit	
Universal Inputs	Discrete sinking/sourcing, 4 to 20 mA analog, 0 to 10 V analog, 10k t	hermistor, counter
Courtesy Power	One output at 5 volts, 500 mA maximum	
Switched Power Outputs	B1 and S1 models: Two selectable 5 V or 16 V outputs 5 V: 400 mA maximum 16 V: 125 mA maximum	B2 and S2 models: Two adjustable 5 V or 24 V outputs One SDI-12 adjustable 5 V to 24 V output 5 V: 400 mA maximum 16 V: 125 mA maximum 24 V: 85 mA maximum
Environmental Rating	IEC IP20	
Operating Conditions	–40 °C to +85 °C (-40 °F to +185 °F) (Electronics); –20 °C to +80 °C 95% maximum relative humidity (non-condensing) Radiated Immunity: 10 V/m, 80-2700 MHz (EN 61000-4-3)	(-4 °F to +176 °F) (LCD)
Shock and Vibration	IEC 68-2-6 and IEC 68-2-27 Shock: 30g, 11 millisecond half sine wave, 18 shocks Vibration: .5 mm p-p, 10 to 60 Hz	
Analog Outputs	0 to 20 mA or 0 to 10 V dc output Accuracy: 0.1% of full scale +0.01% per °C Resolution: 12 bit	
Certifications	CE	

DXM150 Wireless Controller

The DXM150 Controller is an industrial wireless controller developed to facilitate Ethernet connectivity and Industrial Internet of Things (IIoT) applications. Available with an internal DX80 Gateway or a MultiHop Data Radio, this powerful Modbus communications device has expanded I/O options and connects local wireless networks with the internet and/or host systems.

Key Features:

- ISM radios available in 900 MHz and 2.4 GHz for local wireless network
- Converts Modbus RTU to Modbus TCP/IP or Ethernet I/P
- Logic controller can be programmed using action rules and text language methods
- Cellular connectivity
- Micro SD card for data logging
- Email and text alerts
- Local I/O options: 8 universal inputs, NMOS outputs, and relay and analog outputs
- Powered by 12 to 30 V dc, 12 V dc solar panel, or battery backup
- RS-232, RS-485, and Ethernet communications ports; and a USB configuration port
- LCD display for I/O information and user programmable LEDs

DXM150 Controllers Specifications

Supply Voltage	12 to 30 V dc or 12 V dc solar panel and 12 V sealed lead acid battery		
Power Consumption	B1 and B2 models: 35 mA average at 12 V	S1 and S2 models: 20 mA average at 12 V	
Solar Power Battery Charging	1 Amp maximum with 20 Watt solar panel		
Radio (ISM Band) Transmit Power	900 MHz at 1 Watt	2.4 GHz at 65 mW	
Radio Range	900 MHz, 1 Watt: Up to 9.6 km (6 miles)	2.4 GHz, 65 mW: Up to 3.2 km (2 miles)	
Minimum Separation Distance	900 MHz, 1 Watt: 4.57 m (15 ft)	2.4 GHz, 65 mW: 0.3 m (1 ft)	
Antenna Connection	Ext. Reverse Polarity SMA, 50 Ohms Max Tightening Torque: 0	.45 N·m (4 lbf·in)	
Radio Transmit Power	900 MHz, 1 Watt: 30 dBm (1 Watt) conducted (up to 36 dBm EIRP)	2.4 GHz, 65 mW: 18 dBm (65 mW) conducted, less than or equal to 20 dBm (100 mW EIRP)	
Compliance	900 MHz Compliance (1 Watt) FCC ID UE3RM1809: This device complies with FCC Part 15, Subpart C,15.247 IC: 7044A-RM1809	2.4 GHz Compliance FCC ID UE300DX80-2400 - This device complies with FCC Part 15, Subpart C, 15.247 ETSI/EN: In accordance with EN 300 328: V1.8.1 (2012-04) IC: 7044A-DX8024	
Spread Spectrum Technology	FHSS (Frequency Hopping Spread Spectrum)		
Logging	8 GB maximum; removable Micro SD card format		
Protocols	Modbus RTU Master/Slave, Modbus TCP, and Ethernet/IP		
Construction	Polycarbonate; DIN rail mount option		
Communication Hardware (RS-232)	Interface: 2-wire RS-232 Baud rates: 9.6k, 19.2k (default), or 38.4k via DIP switches; 1200 and 2400 via the MultiHop Configuration Tool Data format: 8 data bits, no parity, 1 stop bit		
Communication Hardware (RS-485)	Interface: 2-wire half-duplex RS-485 Baud rates: 9.6k, 19.2k (default), or 38.4k via DIP switches; 1200 and 2400 via the MultiHop Configuration Tool Data format: 8 data bits, no parity, 1 stop bit		
Switched Power Outputs	5 Volts/400 mA maximum; 16 V/125 mA maximum		
Environmental Rating	IEC IP20		
Operating Conditions	–40 °C to +85 °C (–40 °F to +185 °F) (Electronics); –20 °C to +80 °C (–4 °F to +176 °F) (LCD) 95% maximum relative humidity (non-condensing) Radiated Immunity: 10 V/m (EN 61000-4-3)		
Shock and Vibration	IEC 68-2-6 and IEC 68-2-27 Shock: 30g, 11 millisecond half sine wave, 18 shocks Vibration: .5 mm p-p, 10 to 60 Hz		
Selectable (Jumper) Power Out	Output on pin 45, jumper selects 2.7 V or battery Output on pin 35, jumper selects 4.2 V or incoming power 100 mA maximum		
Discrete Inputs	Optically isolated AC input type Input to output isolation: 2.5 kV		
Counters, Synchronous	32-bits unsigned 10 ms clock rate minimum		
Universal Inputs	Sinking/Sourcing discrete, 4-20 mA analog, 0-10 V analog, counter,	and temperature 10 kOhm thermistor	
Indicators	Four LEDs, four control buttons, one LCD		
Security Protocols	VPN, SSL, and HTTPS		
Analog Outputs	0 to 20 mA or 0 to 10 V dc output Accuracy: 0.1% of full scale +0.01% per °C Resolution: 12 bit		
Discrete Output Rating (NMOS)	Less than 1 A max current at 30 V dc ON-state saturation: less than 0.7 V at 20 mA ON condition: Less than 0.7 V Off condition: Open		
Relay Outputs	One; output at 5 volts , 500 mA maximum		
Certifications	CE		

Industrial Wireless Radios

Banner's network radios provide the backbone of a very flexible and highly expandable wireless network for industrial environments. Simple wire replacement products easily replace discrete, analog, Serial, and Ethernet signal wires with no setup software needed. The Performance Series centers around a Gateway and up to 47 remotely located Nodes with multiple I/O options. The MultiHop Series uses repeaters to extend the range of the network using multiple "hops" to cover larger distances or to circumvent obstacles (trees, buildings, topology, etc.).

Sure Cross® PM Series

An I/O Radio network that combines long range line-of-sight coverage with ease of deployment and use.

Banner's PM Series provides a flexible network that easily sets up without software. Setting up a basic point-to-point network is as easy as pairing a cell phone to a headset. You can replace cables and extend the range of digital and analog signals with minimum effort.

Key Features:

to six Nodes

- Menu-driven LCD user interface
- Choose from two I/O configurations

- No software needed
- IP67-rated housing for demanding environments
- One Gateway is preconfigured to support up
- Choose from two i/O configuration
- Select from multiple I/O maps

* Available on PM8 models only

Sure Cross® PM Kit

Simple wire replacement is even simpler with Banner's fully integrated kit.

Plug-and-play with one Gateway and one Node, pre-bound and mapped to solve your first wireless challenge, and provide the start of a flexible network that can be expanded as production needs change.

Key Features:

- Pre-bound and mapped expandable bi-directional radios
- Eight LCD menu selectable I/O mapping options
- IP67-rated housing for demanding environments
- One Gateway is preconfigured to support up to six Nodes

PM2 and PM8 Gateways and Nodes Specifications

Radio Range	900 MHz (1 W): Up to 9.6 kilometers (6 miles)* 2.4 GHz (65 mW): Up to 3.2 kilometers (2 miles)*	
	*Line of sight with included 2 dB antenna	
Minimum Separation Distance	900 MHz (1 W): 4.57 m (15 ft) 2.4 GHz (65 mW): 0.3 m (1 ft)	
Transmit Power	900 MHz (1 Watt): 30 dBm (1 W) conducted (up to 36 dBm EIRP) 2.4 GHz: 18 dBm (65 mW) conducted, less than or equal to 20 dBm (100 mW) EIRP	
900 MHz Compliance	FCC ID UE3RM1809: This device complies with FCC Part 15, Subpart C, 15.247 IC: 7044A-RM1809	
2.4 GHz Compliance	FCC ID UE300DX80-2400 - This device complies with FCC Part 15, Subpart C, 15.247 ETSI/EN: In accordance with EN 300 328: V1.8.1 (2012-06) IC: 7044A-DX8024	
Spread Spectrum Technology	FHSS (Frequency Hopping Spread Spectrum)	
Linked Timeout	Gateway: Configurable via User Configuration Tool (UCT) software Node: Defined by Gateway	
Communication Hardware (RS-485) - Gateways Only	Interface: 2-wire half duplex RS-485 Baud rates: 9.6k, 19.2k (default), or 38.4k Data format: 8 data bits, no parity, 1 stop bit	
	NOTE: Battery life is reduced to 1 year when the sample/report rate is increased to 16 seconds	
Communication Protocol	Modbus RTU	
Supply Voltage	10 to 30 V dc (Outside the USA: 12 to 24 V dc, ±10%) 900 MHz Consumption: Maximum current draw is < 100 mA and typical current draw is < 50 mA at 24 V dc (2.4 GHz consumption is less)	
Construction	Polycarbonate housing and rotary dial cover; polyester labels; EDPM rubber cover gasket; nitrile rubber, non-sulphur cured button covers Weight: 0.26 kg (0.57 lbs) Mounting: #10 or M5 (SS M5 hardware included) Max. Tightening Torque: 0.56 N-m (5 lbf·in)	
Antenna Connection	Ext. Reverse Polarity SMA, 50 Ohms Max Tightening Torque: 0.45 N·m (4 lbf·in)	
Interface	Indicators: Two bi-color LEDs Buttons: Two Display: Six character LCD	
Wiring Access	Two 1/2-in NPT ports	
Environmental Rating	PM2 and PM8 Models: IEC IP67; NEMA 6 PM2C and PM8C Models: IP20; NEMA 1	
Operating Conditions	Temperature: –40 °C to +85 °C (–40 °F to +185 °F) (Electronics); –20 °C to +80 °C (–4 °F to +176 °F) (LCD) Humidity: 95% max. relative (non-condensing) Radiated Immunity: 10 V/m, 80-2700 MHz (EN61000-4-3)	
Shock and Vibration	IEC 68-2-6 and IEC 68-2-27 Shock: 30g, 11 millisecond half sine wave, 18 shocks Vibration: 0.5 mm p-p, 10 to 60 Hz	
Certifications	CE	

Performance Board Modules

Sure Cross® Performance Embeddable Board Modules were specifically designed for the needs of industrial users to provide connectivity where traditional wired connections are not possible or cost prohibitive. Performance Embeddable Board Modules communicate with all Sure Cross Performance radios.

Key Features:

- Simple yet highly expandable
- Supports Point-to-Point and Star network topologies
- DIP switch mapping for up to two Nodes

star

PB2 Gateway and Node Specifications

Radio Range	900 MHz (1 Watt): Up to 9.6 kilometers (6 miles)* 2.4 GHz (65 mW): Up to 3.2 kilometers (2 miles)*
	*Line of sight with included 2 dB antenna
Minimum Separation Distance	900 MHz (1 Watt): 4.57 m (15 ft) 2.4 GHz (65 mW): 0.3 m (1 ft)
Transmit Power	900 MHz (1 Watt): 30 dBm (1 W) conducted (up to 36 dBm EIRP) 2.4 GHz: 18 dBm (65 mW) conducted, less than or equal to 20 dBm (100 mW) EIRP

Antenna Connection	Ext. Reverse Polarity SMA, 50 Ohms; Max Tightening Torque: 0.45 N·m (4 lbf·in) U.FL-R-SMT.(01); Use cable BWA-HW-030 (U.FL to RP-SMA) or the equivalent
Linked Timeout	Gateway: Configurable via User Configuration Tool (UCT) software Node: Defined by Gateway
Operating Conditions	Temperature: –40 °C to +85 °C (–40 °F to +185 °F) Humidity: 95% max. relative (non-condensing)
Radiated Immunity	10 V/m, 80-2700 MHz (EN61000-4-3)

Serial Data Radio

Sure Cross® MultiHop Serial Data Radios are wireless industrial communication devices used to extend the range of Serial communication networks.

Key Features:

- DIP switches select operational modes: master, repeater or slave
- No software required for deployment
- Serial communication style (RS-232 or RS-485) is user-selectable

Serial Data Radio Specifications

Radio Range	900 MHz (1 Watt): Up to 9.6 kilometers (6 miles)* 2.4 GHz (65 mW): Up to 3.2 kilometers (2 miles)*		
	*Line of sight with included 2 dB antenna		
Minimum Separation Distance	900 MHz (1 Watt): 4.57 m (15 ft) 2.4 GHz (65 mW): 0.3 m (1 ft)		
Transmit Power	900 MHz (1 Watt): 30 dBm (1 W) conducted (up to 36 dBm EIRP) 2.4 GHz: 18 dBm (65 mW) conducted, less than or equal to 20 dBm	(100 mW) EIRP	
900 MHz Compliance	FCC ID UE3RM1809: This device complies with FCC Part 15, Subpart C, 15.247 IC: 7044A-RM1809		
2.4 GHz Compliance	FCC ID UE300DX80-2400 - This device complies with FCC Part 15, Subpart C, 15.247 ETSI/EN: In accordance with EN 300 328: V1.7.1 (2006-05) IC: 7044A-DX8024		
Spread Spectrum Technology	FHSS (Frequency Hopping Spread Spectrum)		
Supply Voltage	10 to 30 V dc (Outside the USA: 12 to 24 V dc, $\pm 10\%)$		
Current Draw	Idle: At 30 V dc: 0.011 A At 24 V dc: 0.012 A At 10 V dc: 0.020 A	Transmitting: At 30 V dc: 0.007 A At 24 V dc: 0.008 A At 10 V dc: 0.011 A	
Housing	Polycarbonate housing and rotary dial cover; polyester labels; EDPM Weight: 0.26 kg (0.57 lbs) Mounting: #10 or M5 (SS M5 hardware included) Max. Tightening Torque: 0.56 N·m (5 lbf-in)	rubber cover gasket; nitrile rubber, non-sulphur cured button covers	
Interface	Indicators: Two bi-color LEDs Buttons: One (under small round cover)		
Wiring Access	4-position terminal		
Antenna Connection	Ext. Reverse Polarity SMA, 50 Ohms Max Tightening Torque: 0.45 N·m (4 lbf·in)		
Hardware (Serial Data Radio SRxM-H)	Interface: 2-wire half-duplex RS-485 (default) or RS-232 Baud rates: 1200, 2400, 9600, 19.2k (default), 38.4k, 57.6k, 115.2k Data format: 8 data bits, 1 stop bit, no parity (default), even parity, oc	dd parity	
Packet Size (Serial Data Radio)	1500 bytes maximum		
Wireless Data Transfer Rate	900 MHz: 300 kbps 2.4 GHz: 250 kbps		
Environmental Rating	IEC IP67; NEMA 6		
Operating Conditions	Operating Temperature: -40 °C to +85 °C (-40 °F to +185 °F) (Elect Operating Humidity: 95% max. relative (non-condensing) Radiated Immunity: 10 V/m, 80-2700 MHz (EN61000-6-2)	ronics); –20 °C to +80 °C (–4 °F to +176 °F) (LCD)	
Shock and Vibration	IEC 68-2-6 and IEC 68-2-27 Shock: 30g, 11 millisecond half sine wave, 18 shocks Vibration: 0.5 mm p-p, 10 to 60 Hz		

Ethernet Data Radio

Sure Cross® MultiHop Ethernet Data Radios are wireless industrial communication devices used to create point-to-multipoint configurations of wireless Ethernet networks.

Key Features:

- No IP address configuration is required
- Self-healing, auto-routing RF network with multiple hops extends the network's range
- DIP switches select operational modes: master, repeater or slave
- Built-in site survey mode enables rapid assessment of a location's RF transmission properties

Antenna Connection	Ext. Reverse Polarity SMA, 50 Ohms Max Tightening Torque: 0.45 N·m (4 lbf·in)
Interface	Indicators: Two bi-color LEDs Buttons: Two Display: Six character LCD
Environmental Rating	IEC IP20; NEMA 1
Operating Conditions	–40 °C to +85 °C (–40 °F to +185 °F) (Electronics); –20 °C to +80 °C (–4 °F to +176 °F) (LCD) 95% maximum relative humidity (non-condensing) Radiated Immunity: 10 V/m (EN 61000-4-3)
Shock and Vibration	IEC 68-2-6 and IEC 68-2-27 Shock: 30g, 11 millisecond half sine wave, 18 shocks Vibration: 0.5 mm p-p, 10 to 60 Hz

DXER9 Ethernet Data Radio

Sure Cross® Ethernet Radio is an industrial grade, long range, 900 MHz radio used to create point-to-multipoint configurations of wireless Ethernet networks.

Key Features:

- DIP switches select operational modes
- FHSS radios operate and synchronize automatically
- RF transmission rate of 1.536 Mb/s and a throughput of 935 Kb/s
- 128 bit AES encryption for Ethernet data packets
- Point-to-multipoint configurations with up to 16 subscriber units

Ethernet Data Radio Specifications

RF Transmission Rate	1.536 Mb/s		
Ethernet Throughput	935 Kb/s		
Output Power	+21 dBm (4 Watts EIRP used with 15 dBi antenna)		
Receive Sensitivity	–97 dBm at 10e-4 BER (–112 dBm with 15 dBi antenna)		
Radio Link Budget	148 dB with 15 dBi antenna		
Range	Up to 3 miles		
Radio Channels/Bandwidth	12 non-overlapping with 2.0833 MHz spacing and 1.75 MHz occupied bandwidth		
Spread Spectrum Technology	Direct Sequence Spread Spectrum		
Manual Frequency Select	Channel selected with DIP switch or via Web browser interface		
Connector Types	Ext. Reverse Polarity SMA / 10-100 baseT Industrial Ethernet / 5-pin or 4-pin M12/Euro-style power connection		
Status LEDs	Power, Ethernet Link, RF RX, RF TX, 4/Channel, and 6/Link Quality		
Error Correction Technique	Sub-block error detection and retransmission		
Adjacent-Band Rejection	SAW receiver filter attenuates cellular and pager interference		
Regulator Type	Switching regulator		
Browser Management Tools	QoS Statistics, Network Settings, Spectrum Analyzer, and Firmware Upgrading		
Power Consumption	Transmit: 1.7 Watts Receive: 0.8 Watts		
Voltage	Apply power using one of the following connections: Euro-style connector: 5 to 48 V dc with pin 1 positive and pin 3 ground		
Temperature Range	-40 °C to 70 °C (-40 °F to +158 °F)		
Mounting	#10 or M5 (M5 hardware included)		
M5 Fasteners Max Tightening Torque	0.56 N·m (5 in·lbf)		
Material	Case: PBT		
Environmental Rating	IEC IP65; NEMA 4X		
Certifications	Maximum ambient temperature: 70 °C Power rating: UL Class 2 Enclosure environmental rating: UL Type 1		

Performance Series—Gateways

Create point-to-multipoint networks that distribute I/O over large areas. Input and output types include discrete (dry contact, PNP/NPN), analog (0 to 10 V dc, 0 to 20 mA), temperature (thermocouple and RTD), and pulse counter.

Key Features:

- Enhanced Gateways offer increased range in the 900 MHz frequency band
- \bullet High density I/O capacity provides up to 12 discrete inputs or outputs or a mix of discrete and analog I/O
- Universal analog inputs allow current or voltage to be selected in the field

Performance Series-P6 Nodes

The -P6 Performance Node is an industrial radio device with a 1-wire Serial Interface that is designed to transmit data from 1-wire Serial sensors, such as the Banner Temperature and Humidity (M12FTH4Q), Vibration and Temperature (QM42VT1), or Ultrasonic (K50UX1RA) sensors.

Key Features:

- 1-wire Serial Interface
- Battery-powered models for a completely wireless solution
- Line-powered models for continuous sampling

Certifications	CE		

Performance Series–P14 Nodes

The -P14 Performance Node is an industrial radio device that makes it easy to add a remote monitoring point to a wireless network. Simply select one I/O from multiple options, then wire a sensor into the easily accessible wiring terminals inside the Node. The integrated D-cell lithium battery makes it easy to deploy, even where power is not readily available.

Key Features:

- Inputs include: One configurable discrete, one configurable analog, one thermistor, one asynchronous counter
- Battery-powered models for a completely wireless solution
- Field-wireable terminal for wiring I/O

Applications:

- Door monitoring
- Tank level monitoring
- High speed counting
- Flow monitoring

- RPM monitoring
- Non-contact temperature monitoring
- Pressure monitoring

Used with	
T30UX	Long-range ultrasonic sensor
QT50ULB	Long-range ultrasonic sensor
M18T	Non-contact temperature sensor
TL70	Wireless modular tower light

Spread Spectrum Technology	FHSS (Frequency Hopping Spread Spectrum)		
Link Timeout	Gateway: Configurable via User Configuration Tool (UCT) software Node: Defined by Gateway		
Operating Conditions	–40 to +85 °C (–40 to +185 °F) (Electronics); –20 to +80 °C (–4 to +176 °F) (LCD) 95% maximum relative humidity (non-condensing) Radiated Immunity: 10 V/m (EN 61000-4-3)		
Shock and Vibration	IEC 68-2-6 and IEC 68-2-27 Shock: 30g, 11 millisecond half	sine wave, 18 shocks Vibration: 0.5 mm p-p, 10 to 60 Hz	
Discrete Input	Rating: 3 mA max current at 30 V dc Sample / Report Rates: DIP switch configurable		
Discrete Input ON Condition	PNP: Greater than 8 V NPN: Less than 0.7 V		
Discrete Input OFF Condition	PNP: Less than 5 V NPN: Greater than 2 V or open		
Supply Voltage	3.6 V dc low power option from an internal battery		
Construction	Polycarbonate housing and rotary dial cover; polyester labels; EDPM rubber cover gasket; nitrile rubber, non-sulphur cured button covers Integrated battery models: Weight: 0.30 kg (0.65 lbs) Non-battery models: Weight: 0.26 kg (0.57 lbs) Mounting: #10 or M5 (SS M5 hardware included) Max. Tightening Torque: 0.56 N·m (5 lbf-in)		
Antenna Connection	Ext. Reverse Polarity SMA, 50 Ohms Max Tightening Torque	: 0.45 N·m (4 lbf·in)	
Interface	Indicators: Two bi-color LEDs Buttons: Two Display: Siz	< character LCD	
Wiring Access	Two 1/2-inch NPT		
Switch Power Outputs	Analog configuration: one (SP1) Discrete configuration: one (SP1)		
Thermistor Input	Model: 44006, 44016, or 44031 Series of 10 kOhm thermistors Sample Rate: 16 seconds Report Rate: 64 seconds Accuracy: 0.4 °C (10 °C to 50 °C); Up to 0.8 °C (-40 °C to 85 °C)		
Counter Input	Event counter: Input rating 1 Hz to 10 kHz (For battery powered devices, the recommended input rating is less than 1 kHz) Rate (frequency) counter: 1 Hz to 10 kHz Threshold: 1.7 V		
Environmental Rating	IEC IP67; NEMA 6		
Certifications	CE		

Performance Series–P15E Nodes

The P15E Performance Node enables users to wirelessly power and control any connected devices and easily monitor device status and performance. It is easy to deploy and a simple way to remotely control lights, fans, motors, and other AC-powered devices without the trouble or expense of running cable.

Key Features:

- Switch AC loads up to 10 amps
- AC-power field-wireable
- No separate power supply required
- Supply voltage of 100 to 277 V AC at 50/60 Hz

Applications:

- Remotely control lights, dimming levels, fans, and motors
- Provide power and control connectivity to remote I/O devices

DX80 Performance -P15E Specifications

MultiHop Modbus Radios

MultiHop Modbus Data Radios extend the range of Modbus or other Serial communication networks. Each radio may be set to act as either a master, repeater or slave. Models are available with built in discrete and analog I/O, which can be accessed using the Modbus protocol.

Key Features:

- Self-healing, auto routing RF network with multiple hops extends the network's range
- Flexible: DIP switch selectable to be a master, repeater or slave
- User-selectable communication between RS-485 and RS-232

MultiHop Modbus Radios

MultiHop Modbus Radios with I/O

- H1 = FlexPower, 4 Discrete IN, 2 Discrete OUT, 4 Analog IN, 1 thermistor IN, 1 Counter IN
- H2 = 4 Discrete IN, 4 Discrete OUT, 2 Analog IN, 2 Analog OUT

MultiHop Modbus-H6

The -H6 MultiHop Modbus Data Radio has a 1-wire Serial Interface that is designed to transmit data from 1-wire Serial sensors, such as the Banner Temperature and Humidity (M12FTH4Q), Vibration and Temperature (QM42VT1), or Ultrasonic (K50UX1RA) sensors.

Key Features:

- 1-wire Serial Interface
- Battery-powered models for a completely wireless solution
- Tree topology allows for multiple hops to cover longer distances and circumvent obstacles

MultiHop Modbus–H14

The -H14 MultiHop Modbus Data Radio makes it easy to add a remote monitoring point to a wireless network. Simply select one I/O from multiple options, then wire a sensor into the easily accessible wiring terminals inside the Node. The integrated D-cell lithium battery makes it easy to deploy, even where power is not readily available.

Key Features:

- Inputs include: One configurable discrete, one configurable analog, one thermistor, one asynchronous counter, and one SDI-12
- Battery-powered models for a completely wireless solution
- Tree topology allows for multiple hops to cover longer distances and circumvent obstacles
- Field-wireable terminal for wiring I/O

Applications:

- Door monitoring
- Tank level monitoring
- High speed counting
- Flow monitoring

- RPM monitoring
- Non-contact temperature monitoring
- Pressure monitoring

MultiHop Modbus–H15E

The H15E MultiHop Modbus Data Radio enables users to wirelessly power and control any connected devices and easily monitor device status and performance. It is easy to deploy and a simple way to remotely control lights, fans, motors, and other AC powered devices without the trouble or expense of running cable.

Key Features:

- Switch AC loads up to 10 amps
- AC power field wireable
- No separate power supply required
- Supply voltage of 100 277 V AC at 50/60 Hz

Applications:

- Remotely control lights, dimming levels, fans, and motors
- Provide power and control connectivity to remote I/O devices
- Use as an AC powered repeater to extend the range of the wireless network

Intrinsically Safe Nodes

Hazardous area radios are a state-of-the-art combination of wireless communication, battery technology and intrinsically safe electronics. Networks are formed using DX80 Preformance Gateways installed beyond the hazardous area and one or more Nodes operating in the same frequency band.

Key Features:

- The DX99 is a state-of-the-art combination of wireless communication, battery technology and intrinsically safe electronics
- All models are certified for operation in Class I, Division 1 and ATEX Zone 0 locations
- Networks formed using DX80 Performance Gateways installed beyond the hazardous area and one or more Nodes operating in the same frequency band
- Both 900 MHz 150 mW and 2.4 GHz 63 mW models are available

Wiring Access	Two 1/2-in NPT ports, one 3/4-in NPT port (internal threads)	
Environmental Rating	IEC IP68	
Operating Conditions	–40 °C to +65 °C (–40 °F to +149 °F) (Electronics); –20 °C to +80 °C (95% maximum relative humidity (non-condensing) Radiated Immunity: 10 V/m (EN 61000-4-3)	(–4 °F to +176 °F) (LCD)
Shock and Vibration	IEC 68-2-6 and IEC 68-2-27 Shock: 30g, 11 millisecond half sine wave, 18 shocks Vibration: 0.5 mm p-p, 10 to 60 Hz	
Certifications	CSA: Class I, Division 1, Groups A, B, C, D; Class II, Division Certificate: 2008243	on 1, Groups E, F, G; Class III, Division 1 (Ex ia IIC T4 / AEx ia IIC T4)

LCIE/ATEX: Zone 0 (Category 1G) and 20 (Category 1D), Temperature Class T4 (II 1 GD / Ex ia IIC T4/Ex iaD 20 IP68 T82°C) Certificate: LCIE 08 ATEX 6098 X

Special Conditions for Safe Use imposed by Intrinsic Safety Certificate LCIE 08 ATEX 6098 X: Ambient temperature range is -40 to 70 °C. Sure Cross® DX99 *Flex*Power devices can only be connected to Intrinsically Safe certified equipment or simple apparatus as defined by EN 60079-11. All connected equipment must comply with the Entity Parameters (Safety Parameters) listed in the Control Drawings (p/n 141513). The device must only use a lithium battery manufactured by XENO, type XL-205F.

K50 and K30 Hazardous Indicators

Banner's K50 and K30 Indicator Lights for hazardous areas have a smooth 50 or 30 mm diameter dome that provides uniform illumination from all directions.

- Up to three colors in one device and five colors to choose from
- Models rated to IP67 and IP69K for use in harsh environments
- Unique design appears gray when OFF, eliminating false indication from ambient light
- Easy mounting and configuration
- Worldwide IECEx approval for quicker access into countries outside Europe and North America

Accessories

NOTE: The Sure Cross® Radio installation shown includes wireless accessories available from Banner. It is for illustration purposes only. Installations may vary.

6 × 6 in: Fits a single DX80.

10 × 8 in: Fits a power supply, surge suppressor, a single DX80, and a few relays. This is a popular size but can get cramped.

Polycarbonate Enclosures

12 × 10 in: This is the recommended size; provides ample room for multiple radios and accessories.

(1) Enclosures

BWA-AH664	Enclosure, Polycarbonate, with Opaque Cover, $6 \times 6 \times 4$ in
BWA-AH864	Enclosure, Polycarbonate, with Opaque Cover, $8 \times 6 \times 4$ in
BWA-AH1084	Enclosure, Polycarbonate, with Opaque Cover, $10 \times 8 \times 4$ in
BWA-AH12106	Enclosure, Polycarbonate, with Opaque Cover, $12 \times 10 \times 6$ in
BWA-AH14126	Enclosure, Polycarbonate, with Opaque Cover, $14 \times 12 \times 6$ in
BWA-AH16148	Enclosure, Polycarbonate, with Opaque Cover, $16 \times 14 \times 8$ in
BWA-AH181610	Enclosure, Polycarbonate, with Opaque Cover, $18 \times 16 \times 10$ in

Enclosure Accessories

BWA-AHAK

Accessory Kit, Includes all screws, inserts, and mounting feet (Replacement Only)

Fiberglass Enclosures

BWA-EF1086	Enclosure Fiberglass Hinged $10 \times 8 \times 6$ in
BWA-EF866	Enclosure Fiberglass Hinged 8 \times 6 \times 6 in
BWA-PANEL108	Panel, 10 × 8 in
BWA-PANEL86	Panel, 8 × 6 in

(2) Antennas

Select your antenna based on your specific application needs. There are three basic antenna solutions:

- Use the supplied rubber duck antenna inside the enclosure. DX80 products come with a 2 dBi rubber duck antenna. Often simply attaching the supplied antenna to the radio provides enough radio range to meet your needs.
- Mount a dome antenna to the enclosure. The -D antennas can be mounted directly on the enclosure.
- Use an N-type pole-mounted antenna, with surge suppressor. The -A and -AS antennas can be mounted remotely from the enclosure and require the BWC-LFNBMN-DC surge suppressor.

Omni-Directional Antennas with RP-SMA Male Connections

BWA-902-C	900 MHz	2 dBi, Rubber swivel (ships with 900 MHz radios)
BWA-905-C	300 Wi 12	5 dBi, Rubber swivel
BWA-202-C		2 dBi, Rubber swivel, 3 1/4 in (ships with 2.4 GHz radios)
BWA-205-C	2.4 GHz	5 dBi, Rubber swivel, 6 1/2 in
BWA-207-C		7 dBi, Rubber swivel, 9 1/4 in
BWA-902-RA	900 MHz	2 dBi, Rubber fixed right-angle
BWA-902-RA2	900 MHz	2 dBi 1/2 wave, Rubber fixed right-angle, 160 mm tall
BWA-201-001	2.4 GHz	1 dBi, Rubber, 1 in tall
	BWA-902-C BWA-905-C BWA-202-C BWA-205-C BWA-207-C BWA-902-RA BWA-902-RA2 BWA-201-001	BWA-902-C 900 MHz BWA-905-C 900 MHz BWA-202-C 2.4 GHz BWA-205-C 2.4 GHz BWA-207-C 900 MHz BWA-902-RA 900 MHz BWA-902-RA2 900 MHz BWA-201-001 2.4 GHz

(2) Antennas, continued

Omni-Directional Dome Antennas

BWA-902-D	900 MHz	2 dBi, 18 inch cable	RP-SMA Box Mount
BWA-202-D	2.4 GHz	2 dBi, 18 inch cable	RP-SMA Box Mount
Other			
BWA-205-M	2.4 GHz	5 dBi, Magnetic whip antenna, 12 ft cable	RP-SMA Male

Omni-Directional Fiberglass Antennas with N-Type Female Connections

BWA-906-A	900 MHz	2 dBi, Rubber swivel (ships with 900 MHz radios)
BWA-208-A		8.5 dBi, Fiberglass, 24 in
BWA-206-A	2.4 GHZ	6 dBi, Fiberglass, 16 in (shown)
BWA-906-AS		6 dBi, Fiberglass, 1/4 Wave, 23.6 in (1.3 inch diameter)
BWA-908-AS	900 MHZ	8 dBi, Fiberglass, 3/4 Wave, 63 in (1.5 inch diameter)

Directional (Yagi) Antennas with N-Type Female Connection

BWA-9Y6-A	900 MHz	6.5 dBd, 6.8 × 13 inches Outdoor
BWA-9Y10-A	900 MHz	10 dBd, 6.8 × 24 inches Outdoor

Cellular (CDMA multi band)

BWA-CDMA-002 RP-SMA male connection 2 dBi, 6.3 in blade style

(3) Antenna Cables

Antenna Cables: RP-SMA to RP-SMA

BWC-1MRSFRSB0.2	RG58, RP-SMA Male to RP-SMA Female Bulkhead, 0.2 m
BWC-1MRSFRSB1	RG58, RP-SMA Male to RP-SMA Female Bulkhead, 1 m
BWC-1MRSFRSB2	RG58, RP-SMA Male to RP-SMA Female Bulkhead, 2 m
BWC-1MRSFRSB4	RG58, RP-SMA Male to RP-SMA Female Bulkhead, 4 m
BWC-2MRSFRS3	LMR200, RP-SMA Male to RP-SMA Female, 3 m
BWC-2MRSFRS6	LMR200, RP-SMA Male to RP-SMA Female, 6 m
BWC-2MRSFRS9	LMR200, RP-SMA Male to RP-SMA Female, 9 m
BWC-2MRSFRS12	LMR200, RP-SMA Male to RP-SMA Female, 12 m

Antenna Cables: RP-SMA to N-Type

BWC-1MRSMN05	LMR100 RP-SMA to N-Type Male, 0.5 m
BWC-1MRSMN2	LMR100 RP-SMA to N-Type Male, 2 m

Antenna Cables: N-Type

BWC-4MNFN3	LMR400 N-Type Male to N-Type Female, 3 m
BWC-4MNFN6	LMR400 N-Type Male to N-Type Female, 6 m
BWC-4MNFN15	LMR400 N-Type Male to N-Type Female, 15 m
BWC-4MNFN30	LMR400 N-Type Male to N-Type Female, 30 m

(4) Surge Suppressors

BWC-LFNBMN-DC

Surge Suppressor, bulkhead, N-Type Female, N-Type Male, dc Blocking

BWC-LMRSFRPB

Surge Suppressor, bulkhead, RPSMA to RP-SMA

(5) Power Supplies

000	
N EM	
PULS	
10 (0 (0	

PSW-24-1	DC Power Supply, 100-240 V ac 50/60 Hz input, 24 V dc 1 A output, UL Listed Class 2
PSD-24-4	DC Power Supply, 90-264 V ac 50/60 Hz input, 24 V dc output, US-style wall plug input, 4-pin M12/Euro-style output; 2 m (6 ft) cable, UL Listed Class 2
PSDINP-24-06	DC Power Supply, 0.63 Amps, 24 V dc, with DIN Rail Mount, Class I Division 2 (Groups A, B, C, D) Rated
PSDINP-24-13	DC Power Supply, 1.3 Amps, 24 V dc, with DIN Rail Mount, Class I Division 2 (Groups A, B, C, D) Rated
PSDINP-24-25	DC Power Supply, 2.5 Amps, 24 V dc, with DIN Rail Mount, Class I Division 2 (Groups A, B, C, D) Rated

FlexPower Supplies and Replacement Batteries

DX81-LITH	Battery Supply Module with mounting hardware		
DX81H	Battery Supply Module with mounting hardware, for DX99 polycarbonate housing		
DX81P6	Battery Supply Module, six "D" cells, with mounting hardware		

Solar Panels

DC Power Supplies

BWA-SOLAR PANEL 3W	Solar Panel, 12 V, 3 W, Multicrystalline, 188 × 195 × 15, Wall/ Pole clamp style mounting bracket included
BWA-SOLAR PANEL 5W	Solar Panel, 12 V, 5 W, Multicrystalline, 270 × 222 × 17, Wall/ Pole clamp style mounting bracket included
BWA-SOLAR PANEL 20W	Solar Panel, 12 V, 20 W, Multicrystalline, 573 \times 357 \times 30, "L" mounting bracket included
BWA-SOLAR CNTRL-12V	Solar Controller, 6 A Load Current 12 V System Voltage, recommended for 20 watts or less solar panel AND Sealed Lead Acid Battery (SLA)

BANNER

(5) Power Supplies, continued

Replacement Batteries

BWA-BATT-001	Lithium "D" cell, single, for DX81-LITH and DX81H Battery Supply Module
BWA-BATT-006	Lithium "AA" cell, single, for Wireless Q45 Sensors for DX81x models

Relays

IB6RP	Interface Relay Box, 18 to 26 V dc inputs, isolated relay outputs (not shown)
BWA-RELAY-12V	Relay, Blade Style with Base, 12 V
BWA-RELAY-24V	Relay, Blade Style with Base, 24 V
BWA-RH1B-UDC12V	Relay, Blade Style, No Base, 12 V (replacement part)
BWA-RH1B-UDC24V	Relay, Blade Style, No Base, 24 V (replacement part)
BWA-SH1B-05	Relay Base Only (replacement part)

(6) Brackets and Mounting Options

Mounting Kit

BWA-HW-001 • Screw, M5-0.8 x 25 mm, SS (4) • Screw, M5-0.8 x 16 mm, SS (4) • Hex nut, M5-0.8 mm, SS (4) • Bolt, #8-32 x 3/4-in, SS (4) • Bolt, #8-32 x 3/4-in, SS (4)

Brackets

	SMBDX80DIN	• Black reinforced thermoplastic bracket for mounting on a 35 mm DIN rail
P	BWA-HW-034	 DIN rail clip, black plastic Used with the M-HBx MultiHop and -PBx Performance board modules
Hole center spacing: A = 26.0, A to B = 13.0 Hole size: A = 26.8 \times 7.0, B = \emptyset 6.5, C = \emptyset 19.0	SMBAMS18RA	 Right-angle SMBAMS series bracket with 18 mm hole Articulation slots for 90+° rotation 12-ga. (2.6 mm) cold-rolled steel

BWA-BK-001	 Use to mount vibration sensor models QM42VT1 and QM42VT2 Includes magnetic mounting bracket SMB42FLM12 and 2 mounting screws
BWA-BK-004	• Mounts both the K50U Ultrasonic sensor and a Wireless Q45U Node or DX80 Node
BWA-BK-005	• Mounts both the K50U Ultrasonic sensor and a Wireless Q45U Node
BWA-BK-008	QM42 Center-mount magnetic bracket for round objects
BWA-HW-057	 3M[™] Thermally Conductive Adhesive Transfer Tape 8820 Provides a heat-transfer path between heat-generating components and heat sinks or other cooling devices 3 pieces per pack Tape is 20 mils (0.50 mm) thick; liner is 1.5-2 mil (37.5-50 µm) thick Thermally conductive ceramic filler Dual liner using silicone-treated polyester: easy-release PET

Hole center spacing: 35.1 Hole size: 25.4 x 5.3

DIN-35-70 = 70 mm **DIN-35-105** = 105 mm • 35 mm DIN Rail **DIN-35-140** = 140 mm

Cables

Ethernet Cables

Use a crossover cable to connect the GatewayPro or DX83 Ethernet Bridge to a host system without using an Ethernet switchbox or hub. When using a switchbox or hub, use a straight cable.

BWA-E2M	Ethernet cable, RSCD RJ45 440, 2 m
BWA-E8M	Ethernet cable, RSCD RJ45 440, 8 m
BWA-EX2M	Ethernet cable, crossover, RSCD RJ45CR 440, 2 m

Adaptor Cables

BWA-HW-006	Adapter cable, USB to RS-485, for use with the User Configuration Tool software (UCT)
BWA-UCT-900 (shown)	Adapter cable with power, USB to RS-485, for use with the User Configuration Tool software (UCT), supplies power to 1 Watt radios
BWA-USB1WIRE-01	PC USB to 1-wire Serial Interface converter. Use with the Sensor Configuration Tool software to communicate directly with 1-wire Serial Interface sensors

Splitter Cables

Use CSRB-M1250M125.47M125.73 to split power between two FlexPower® or solar powered devices. DO NOT use this cable to connect a FlexPower devices to a 10 to 30 V dc powered device.

Use CSRB-M1253.28M1253.28M1253.28 to connect one *Flex*Power device (data radio, FlexPowered Gateway, etc) to two power sources, such as the *Flex*Power Solar Supply and DX81P6 Battery Pack.

Model	Length	Style	Pinout
CSRB-M1250M125.47M125.73	Trunk: 0 m (male) Branches: 0.14 m and 0.22 m (female)	Straight	Male Female 2 3 4 5 4 4 5
CSRB-M1253.28M1253.28M1253.28	Trunk: 1 m (female) Branches: 1 m (male)	Straight	1 = Brown 2 = White 3 = Blue 4 = Black 5 = Green/Yellow

Model	Branches	Trunk	Pinout	
CSB-M1240M1240	No branch	No trunk	Female Female	
CSB-M1240M1241	2 x 0.30 m (1 ft)	No trunk		
CSB-M1241M1241		0.30 m (1 ft)	4 00 3 3 - 4	
CSB-M1248M1241		2.50 m (8 ft)		
CSB-M12415M1241	2 x 0.30 m (1 ft)	4.57 m (15 ft)	1 = Brown 2 = White	
CSB-M21425M1241		7.60 m (25 ft)	3 = Blue 4 = Black	
CSB-UMT425M1241		7.60 m (25 ft) Unterminated	o = Gray	

Cordsets

Euro-Style — Single-Ended

Right-angle cordsets are not compatible with the DX70 devices. When facing the Node or Gateway toward you and the quick-disconnect connection is facing down, the right-angle cables exit to the right.

When using the *Flex*Power[®] Node with integrated battery, use a double-ended cordset. When using a *Flex*Power Node with external power supply, use a single-ended cordset. If using the communication lines, the cable length cannot exceed 3 meters (10 ft).

Cordsets, continued

Model	Length	Style	Description
BWA-QD5.5	-	_	Prewired 5-pin Euro connector, 1/2-14 NBSM
BWA-QD8.5	_	_	Prewired, 8-pin Euro connector, 1/2-14 NBSM
BWA-QD12.5	-	_	Prewired 12-pin Euro connector, 1/2-14 NBSM
FIC-M12F4	_	Straight	Euro-Style Field-Wireable Connector 4-pin Female Straight
MQDMC-401	0.5 m	Straight	Cordset, 4-pin Euro-style, single ended, male, longer pigtails for DX80C models

Euro-Style - Double-Ended

When using the *Flex*Power[®] Node with integrated battery, use a double-ended cordset. When using a *Flex*Power Node with external power supply, use a single-ended cordset. If using the communication lines, the cable length cannot exceed 3 meters (10 feet).

Other Cordsets

BWA-RIBBON-001	Ribbon cable, 20-pin DBL socket
BWA-HW-010	Cable, <i>Flex</i> Power Current Monitoring

DX85 Modbus RTU Remote I/O Devices

IP67 Housing	Model	Description	
		DX85M6P6	DX85 Modbus RTU Remote I/O, 6 Discrete IN, 6 Discrete OUT
	P67 Housing	DX85M4P4M2M2	DX85 Modbus RTU Remote I/O, 4 Discrete IN, 4 Discrete OUT, 2 Analog IN, 2 Analog OUT (0 to 20 mA)
		DX85M4P8	DX85 Modbus RTU Remote I/O, 4 Discrete IN, 8 Discrete OUT
	DX85M8P4	DX85 Modbus RTU Remote I/O, 8 Discrete IN, 4 Discrete OUT	
		DX85M0P0M4M4	DX85 Modbus RTU Remote I/O, 4 Analog IN, 4 Analog OUT (0 to 20 mA)
	P20 Housing	DX85M-P7	DX85 Modbus RTU Remote I/O, Up to 12 sinking inputs or up to 12 NMOS sinking outputs (for a total of 12 I/O)
		DX85M-P8	DX85 Modbus RTU Remote I/O, Up to 12 sourcing inputs or up to 12 sourcing outputs (for a total of 12 I/O)

NOTE: Add a "C" to the end of any DX85 model to order that I/O mix with an IP20 housing. The IP20 models are Class I, Division 2 certified when installed in a suitable enclosure.

Cable Glands and Plugs

Model	Description
BWA-HP.5-10	Dummy Hole Plugs, 1/2-in NPT, 10 pieces
BWA-HW-031	Vent Plug, 1/2-in NPT, IP67
BWA-HW-059	Vent Plug, Plastic, 1/2-inch NPT, Strain-relief fitting, with o-ring, for 0.2 to 0.35 dia cable
BWA-HW-053	Plug Conduit, Plastic Hex, 1/2-14 NPT, for 1.2 to 2.5 mm dia
BWA-HW-052	Cable Gland Pack: 1/2-inch NPT gland, 1/2-inch NPT multi-cable gland, and 1/2-inch NPT vent plug
BWA-CG.5-10	Cable Glands, 1/2-in NPT, Cordgrip for 3 holes of 2.8 to 5.6 mm diameter, 10 Pack
BWA-CG.5-3X5.6-10	Cable Glands, 1/2-inch NPT, Cordgrip for 3 holes of 2.8 to 5.6 mm diam, 10 Pack
BWA-CG.5-2X2.5-10	Cable Glands, 1/2-in NPT, Cordgrip for 2 holes of 1.2 to 2.5 mm diameter, 10 Pack
BWA-CG.5-6X4.0-10	Cable Glands, 1/2-in NPT, Cordgrip for 6 holes of 2 to 4 mm diameter, 10 Pack
BWA-CG.5-6X3.0-10	Cable Glands, 1/2-in NPT, Cordgrip for 6 holes of 1.5 to 3 mm diameter, 10 Pack

Hardware and Replacement Parts

Model	Description
BWA-HW-002	DX80 Access Hardware Kit: Plastic threaded plugs, PG-7 (4) Nylon gland fittings, PG-7 (4) Hex nuts, PG-7 (4) Plug, 1/2-in NPT Nylon gland fitting, 1/2-in NPT
BWA-HW-003	PTFE Tape, 1/4-in wide, 600-in long
BWA-HW-004	Replacement Seals: O-ring, rotary access cover, PG21 (2) O-ring, body gasket (2) Access cover, rotary dials, clear plastic (2)
BWA-HW-009	Solar assembly hardware pack, includes brackets, bolts, and set screws
BWA-HW-007	Housing Kit, DX80, top and bottom, 10 pieces
BWA-HW-008	Housing Kit, DX81, top and bottom, 10 pieces
BWA-HW-044	Terminal header for the MultiHop Ethernet Data Radio
BWA-HW-011	Terminal Block Headers, IP20, 2 pack
BWA-HW-012	DX99 Antenna Extension Pack: Screw, M4-0.7 x 20, pan head, black steel Flexible Antenna Cable, 12 in, SMA male to SMA female
BWA-HW-032	Access hardware for the E housing, one 1/2-in plug, one 1/2-in gland
BWA-HW-037	Clear plastic retaining ring for DX99 metal housings, 10 pack

Metal Housing Accessories

Model	Description
BWA-HW-016	Antenna Feedthrough, Stainless Steel, 1/2-in NPT
BWA-HW-017	Antenna Feedthrough, Stainless Steel, 3/4-in NPT
BWA-HW-012	DX99 Antenna Extension Pack (M4-0.7 \times 20 black steel pan head screw, flexible antenna cable 12-in SMA male to SMA female)
BWA-HW-037	Clear plastic retaining ring for DX99 metal housings (10 pack)
BWA-AXFS0130	AXF™ Explosion-Proof Antenna Coupler

Omni-Directional Dome Antennas

Models	Frequency	Description	Connection
BWA-902-001	900 MHz	2 dBi, 18 inch cable	1/2-in SS NPT Port
BWA-902-002			3/4-in SS NPT Port
BWA-202-001			1/2-in SS NPT Port
BWA-202-002	2.4 GHZ		3/4-in SS NPT Port

Additional Devices and Sensors

DX85 Modbus RTU Remote I/O Devices

These remote I/O devices have a Modbus Interface and are used to expand the I/O of the Gateway or the Modbus host.

Models	I/O
DX85M6P6	DX85 Modbus RTU Remote I/O, 6 Discrete IN, 6 Discrete OUT
DX85M4P4M2M2	DX85 Modbus RTU Remote I/O, 4 Discrete IN, 4 Discrete OUT, 2 Analog IN, 2 Analog OUT (0 to 20 mA)
DX85M4P8	DX85 Modbus RTU Remote I/O, 4 Discrete IN, 8 Discrete OUT
DX85M8P4	DX85 Modbus RTU Remote I/O, 8 Discrete IN, 4 Discrete OUT
DX85M0P0M4M4	DX85 Modbus RTU Remote I/O, 4 Analog IN, 4 Analog OUT (0 to 20 mA)
DX85M-P7	DX85 Modbus RTU Remote I/O, Up to 12 sinking inputs or up to 12 NMOS sinking outputs (for a total of 12 I/O) $$
DX85M-P8	DX85 Modbus RTU Remote I/O, Up to 12 sourcing inputs or up to 12 sourcing outputs (for a total of 12 I/O)

NOTE: Add a "C" to the end of any DX85 model to order the I/O mix with an IP20 housing. The IP20 models are Class I, Division 2 certified when installed in a suitable enclosure.

Sensors Optimized for Use with FlexPower® Devices

GPS50M GPS Module

Low power consumption, ability to withstand harsh environments, flexible power supply requirements and Modbus RTU communications makes this module ideal for the industrial market.

- Self-contained GPS Module for industrial use.
- Flexible Power Requirements: 5 to 30 V dc with power consumption as low as 100 mW
- Positional error of less than 2.5 meters
- Self-contained for harsh environment; IP69K-rated

GPS50M GPS Module Specifications

Power Requirements	5 to 30 V dc			
Current	Maximum: < 0.5 W Power Save Mode ON Typ. Average: 4 mA at 24 V dc Power Save Mode OFF Tye. Average: 10 mA at 24 V dc			
Indicators	Green flashing: Power ON	Amber flashing: N	Nodbus communication active	
Indicators	Green flashing: Power ON	Red flicker: Serial	Tx	
Operating Temperature	-40 to +85 °C (-40 to +185 °F)			
GPS Features	• SiRF Star IV GPS chip • Satellite-based augmentation systems: WAAS, EGNOS, MSAS, GAGAN		 High sensitivity navigation engine (PVT) tracks as low as -163 dBm Update Rate: 1 Hz 	
Communication	 Interface: RS-485 Serial Baud rates: 9.6k, 19.2k (default), or 38.4k Data format: 8 data bits, no parity (default), 1 stop bit (even or odd parity available) 		 Do not use termination resistor Protocol: Modbus RTU 	
Shock and Vibration• IEC 68-2-6 and IEC 68-2-27• Shock: 30g, 11 millisecond half wave, 18 shocks • Vibration: 0.5 mm p-p, 10 to 60 Hz		S		
Accuracy	 Positional error of less than 2.5 m (8') with augmentation Positional error of less than 10 m (33') with no augmentation 		uentation Ligmentation	

Other Sensors or Sensor Components

Models	I/O
BWA-THERM-PROBE-001	Temperature sensor with thermistor PS103G2 Operating Temperature Range -20 °C to +105 °C Maximum Power Rating 30 mW Accuracy +/- 0.2%; Plated nickel finish
BWA-S612-30-100	NoShok Series 612 Submersible Level Transmitter, model 612-30-1-1-N-100, 0 to 30 psig, 100' cable
BWA-S612-15-100	NoShok Series 612 Submersible Level Transmitter, model 612-15-1-1-N-100, 0 to 15 psig, 100' cable
BWA-625-5000-1-1-8-25	NoShok Series 625 Intrinsically Safe Pressure Transmitter, model 625-5000-1-1-8-25, 0 to 5000 psig, 1/2-in NPT,4–20mA, M12 QD
BWA-625-10000-1-1-8-25	NoShok Series 625 Intrinsically Safe Pressure Transmitter, model 625-10000-1-1-8-25, 0 to 10000 psig, 1/2-in NPT, 4–20mA, M12 QD
BWA-P-RKGV 5.33T-1727-2.0	Cable, female M12 4-pin, blue PVC, SS connector, for NoShok Series 625 IS Pressure Transmitter
BWA-ACC-SEN-SDI	Acclima SDI-12 Soil Moisture Transducer

Reference

Data Security

Binding the radios in a network (similar to pairing a phone to a headset, but more secure) locks them to a specific master radio by teaching them the master radio's access code. After the devices are bound, the radios only accept data from that master radio and the master radio only accepts data from the radios that are bound to it.

The proprietary protocol used in Banner's wireless networks provides a high level of data security.

A pseudo-random frequency hopping table is used to provide noise immunity and data security. Each time a message is sent a new frequency is chosen, which makes it almost impossible for any system listening at a given time to hear more than a few messages out of hundreds.

Generic data transfer without context also keeps data secure. Even if a hacker managed to crack the data packet format, all they would see is a set of 16-bit numbers with no reference as to what the numbers mean.

Deterministic System

Determinism is the ability to predict and control network behavior by establishing default states for specific conditions. Banner's deterministic system defines how network endpoints behave during the loss of communications. The network identifies when the communications link is lost and sets relevant outputs to user defined conditions. Once the radio signal is reestablished, the network returns to normal operations.

Example: If a tank level sensor is being used to turn a pump on to refill the tank, the deterministic system will allow you to set the default output state as "OFF" if the wireless signal is lost. With the output set at "OFF", the pump will not be able to over fill the tank in the event of a loss of communications.

Frequency

Banner's wireless products operate in the license free ISM band with products that operate at the 900 MHz and 2.4 GHz frequencies.

- 2.4 GHz radios transmit data packets faster and require less power. They are primarily used outside North America.
- 900 MHz radios have a longer range and a better ability to penetrate walls and other obstacles. It is typically used in North America.

Frequency Hopping Spread Spectrum (FHSS)

Frequency Hopping Spread Spectrum is a radio communication technology where the frequency spectrum is divided into channels. Data packets are split up and transmitted on these channels in a random pattern known only to the transmitter and receiver (e.g., Gateway and Node). Because colocated networks follow different random patterns, or hop code tables, multiple networks can operate in close proximity without interfering. If interference is present on one channel, data transmission is blocked. The transmitter and receiver hop to the next channel in the hop table and the transmitter resends the data packet.

Intrinsically Safe

The Sure Cross® DX99 product line is classified as intrinsically safe (IS), not explosion proof, and is certified for a variety of hazardous locations. Intrinsically safe products limit electrical and thermal energy to levels below that required to ignite a flammable or combustible atmospheric mixture in hazardous areas. Each product's datasheet lists the specific certifications for that product.

Network Interference

The Banner wireless system can be installed within any existing 802.11b (Wi-Fi) environment. The low data rates and narrow frequency band of the Banner wireless system make it essentially silent to existing Wi-Fi networks. Additionally, Banner's Gateways and Nodes exchange a binding code that prevents radios outside the network from communicating with it. Finally, they also use multiple frequency hops to eliminate data collisions.

Network Security

The Banner wireless systems use a proprietary protocol and are designed to completely eliminate all Internet Protocol (IP) based security threats. Open protocols, such as Wi-Fi, can route malicious TCP/IP packets that can cause security breaches; however, the Banner wireless systems can not. The Banner protocol only carries sensor data values. It is not possible to gain access to the organization's main network through the Sure Cross wireless system and it is not possible to receive a web page or executable file over the wireless communication layer. Only I/O data is transmitted in the Banner wireless network.

Network Topologies

Point-to-Point

The most basic form of a radio network is called point-to-point. As the name implies, there are only two radios in this network, one Gateway and one Node.

Point-to-Multipoint

Point-to-multipoint is a relatively simple network with one Gateway and a few Nodes. Banner's PM Series is preconfigured to handle up to six Nodes.

Star

This network is formed by connecting multiple Nodes to a single Gateway. The Gateway maintains a communications connection with each Node on a separate communications path. If the communication between one of the Nodes and the gateway fails, the rest of the network remains unaffected.

Tree

This network involves several slaves that transmit information to repeaters, which ultimately transmit to the master radio. The use of repeaters can greatly extend the range of the network. This network must have a host controller that controls the master radio.

Network Scalability

Banner's Simple Wire Replacement products come preconfigured to handle up to 6 Nodes (PM8) so that it is easy to set up your network without software. The DX80 Performance Series offers Gateways that support multiple host communication protocols and up to 47 Nodes. Data Radios can handle up to 50 slave radios, and MultiHop Radios can handle up to 100 slave radios.

MultiHop

A MultiHop network uses repeaters to extend the range of the network with multiple "hops" to cover longer distances or to circumvent obstacles (trees, buildings, topology, etc.). MultiHop networks are also self-forming (all radios added to the network will automatically connect to the master or a repeater within its range) and self-healing (if a repeater is removed from the network, the radios connected to it can find a new path back to the master radio).

At the root of the MultiHop network is the master radio. All radios within range of the master (whether slave or repeater) connect to it. The master serves as the parent (controls the timing of the network), repeaters and slaves connect as children.

MultiHop Master Radio: Within a MultiHop network, there is only one master radio. It controls the overall timing of the network and is always the parent device. The master radio must be controlled by a host system.

MultiHop Repeater Radio: The repeater acts as a child to the master radio and a parent a slave radio. It retransmits data packets between the master radio and slave radios.

MultiHop Slave Radio: The slave radio is the end device of the network. A radio in slave mode does not retransmit data packets on the radio link.

Radio Range

Banner's wireless network is designed for long distance applications. The signal for 900 MHz, 1 Watt radios will travel up to 6 miles and 2.4 GHz, 65 mW radios will travel up to 2 miles line-of-sight.

Line-of-sight is the unobstructed path between radio antennas; however, signals can penetrate walls, floors and other indoor obstructions. Buildings, trees and large metal objects will impact signal strength in outdoor applications.

To verify range, Banner integrates a site survey tool into each Gateway and Node that displays real time signal quality results. Always conduct a site survey prior to installing a wireless network.

TDMA Time Division Multiple Access (TDMA)

TDMA provides a specific communication time slot for each device in the network, eliminating data collisions. The master radio "requests" data from each node during its time slot, and the node then sends the data. A TDMA architecture also lends itself to efficient power management procedures. When each device knows the time period to receive or send, the radio doesn't have to 'listen' all the time. Power usage can be managed efficiently, allowing radio devices to operate from 3.6 V lithium batteries when necessary.

Industry 4.0

Industry 4.0, IoT, and IIoT

The technologies of **Industry 4.0** make data readily available and automate the communication between industrial automation equipment and systems. This enables predictive analysis for machines as well as process optimization across the factory floor.

The **Internet of Things (IoT)** describes the technologies that connect objects—from consumer electronics to industrial components—to the internet.

The **Industrial Internet of Things** (or IIoT) refers specifically to the impact of this innovation on industrial applications.

The key benefits include:

- Visibility and Remote Access to the operational status of machine components (both historically and in real-time)
- Predictive Analytics for more accurate planning of machine maintenance
- Interconnectivity for seamless communication among machines, components, and people

Is Your Business IIoT-Ready?

What Does IIoT Mean For Factories?

Visibility and Remote Access Increase Efficiency

In order to ensure efficient processes throughout the factory, machine operators must quickly and easily determine the status of machines. The greater the visibility, the easier it is to identify and resolve problems and keep operations running smoothly.

Traditional tower lights provide visibility wherever they can be physically seen. However, tower lights equipped with wireless communication capabilities both display a visual indication of an event and transmit wireless alerts. This helps ensure that operational problems are identified and addressed immediately, regardless of whether a machine operator is physically present to see the visual indicator.

An additional benefit of wireless indicators is data logging for use in OEE (Overall Equipment Effectiveness) calculations. Not only can operators respond to alerts quickly as they occur, but a history of alerts can also be stored and analyzed offline. This historical data can be used to track machine uptime, production volume, rejected parts, and other key metrics to make more informed decisions over time.

Predictive Maintenance Increases Machine Uptime and Availability

In addition to real-time status monitoring, IIoT technologies can also be used to help avoid machine failures thanks to predictive maintenance.

By monitoring machine components in real-time for increases in vibration and temperature, problems can be detected and resolved before they become too severe and cause additional damage or result in unplanned downtime. Over time, the historical data creates a valuable machine performance log that can be used to make more informed maintenance decisions down the line.

Interconnectivity Streamlines Factory Communications

Wireless technologies also enable seamless interaction among human workers, and can have a significant impact on the efficiency of manual production lines. For example, instead of requiring machine operators to walk over to the manager area for assistance with a technical issue, a wireless system utilizing connected pushbuttons or switches and tower lights can be used to alert managers when assistance is needed on the line.

From keeping machines running smoothly to enabling seamless communication among machines, components, and people, the benefits of IIoT technologies are tangible. It can be challenging knowing where to start and how to use these technologies to their fullest advantage. Answering the following questions can help manufacturing facilities identify the best technologies to meet their immediate business needs and start taking advantage of the long-term benefits of IIoT.

- What are the inefficiencies in your operations?
- What kind of data would help you overcome these inefficiencies?
- What communication processes need to be in place in order to utilize data in a meaningful way?

5 Advantages of IO-Link

1. Standardized and Reduced Wiring

IO-Link devices do not require any special or complicated wiring, but can be connected using the same cost-effective standard unshielded 3-wire cables as conventional discrete I/O. In addition, IO-Link also eliminates the need for analog sensors and reduces the variety of cord sets required for sensors, which saves inventory costs. IO-Link also supports a master-slave configuration with passive connection points, which further reduces wiring requirements.

2. Increased Data Availability

Access to sensor-level data helps ensure the smooth operation of system components, streamlines device replacement, and enables optimized machine maintenance schedules—all of which save costs and reduce the risk of machine downtime.

This wealth of valuable data made available through IO-Link is integral for the Industrial Internet of Things (IIoT) and Industry 4.0 initiatives.

3. Remote Configuration and Monitoring

With IO-Link, users can read and change device parameters through the control system software, enabling fast configuration and commissioning that saves time and resources. In addition, IO-Link allows operators to dynamically change the sensor parameters from the control system as needed—such as in the case of product changeover—which reduces downtime and allows machines to accommodate greater product diversity. In addition, the ability to monitor sensor outputs, receive real-time status alerts, and adjust settings from virtually anywhere allows users to identify and resolve problems that arise on the sensor level in a timely manner. This capability reduces costly downtime and improves overall efficiencies.

4. Simple Device Replacement

In addition to the ability to remotely adjust sensor settings, IO-Link's data storage capability also allows for automated parameter reassignment in case of device replacement (also known as Auto-Device Replacement or ADR). Users can import existing sensor parameter values into a replacement sensor for seamless replacement, getting the new device up and running as quickly as possible.

5. Extended Diagnostics

IO-Link provides users with visibility into errors and health status from each device. This means that users can see not only what the sensor is doing but also how well it is performing—a valuable insight into a machine's efficiency. In addition, extended diagnostics allow users to easily identify when a sensor is malfunctioning and diagnose the problem without shutting down the line or machine.

The combination of real-time and historic data not only reduces troubleshooting efforts as issues arise but also allows for optimization of machine maintenance schedules, saving costs and increasing efficiency in the long term.

Lithium Ion Battery Production

From precise edge guiding and roll diameter monitoring to glue and tape detection, lithium ion battery production processes require a variety of presence detection, measurement, and inspection solutions to ensure quality control within tight tolerances. Banner Engineering offers an extensive portfolio of fiber optic sensors, photoelectric and laser measurement sensors, and machine vision products for reliable error-proofing in this industry.

Solutions for Lithium Ion Battery Production

see page 45

Tape Detection

Challenge

- Detect tape used to identify damaged film
- Low optical contrast between tape and film
- High speed processing: 1.5 meters
 per second
- Hard-to-access deployment area with very limited space

Key Features

Challenge

high-speed roll

Machine vibration

Key Features

analog output

- White, green, blue, and infrared LED sensing
- Best-in-class response speeds: up to 10 µs
- Very small, very flexible fiber optic sensors
- IO-Link models available

Roll Diameter Monitoring

• Continuous measurement on

Hard to detect reflective material

• Available ranges of 100 mm to 1 m,

224 kHz ultrasonic frequenciesBuilt-in temperature compensation

200 mm to 2 m, or 300 mm to 3 m

• Provides continuous 0-10 V dc or 4-20 mA

• Detects targets using 114 kHz, 174 kHz, or

Control diameter of lithium ion battery film

Featured Solution

 DF-G2 Series High-Speed Fiber Optic Amplifier and plastic fiber optic sensors

Key Benefits

- Detect low-contrast, multicolored, reflective, and other difficult targets
- Reliable performance in challenging high-speed applications
- Easily fits in tight, confined spaces and can be precisely positioned to perform inspections
- Advanced diagnostics, remote monitoring, teaching, and configuration

Edge Guiding

Challenge

- Monitor position of film edge on winding machine
- Minute detection of variation in edge position needed
- High-speed winder: up to 1.5 meters of film per second
- Hard-to-access deployment area with very limited space

Key Features

- Heavy-duty shielded fibers
- Detects 500 µm variation in edge position
 High-power amplifier with world-class long-
- range sensing capability
- IO-Link models available

Featured Solution

T30UX Series
 Ultrasonic Sensor

Key Benefits

- Reliable monitoring of rolls regardless of size
- Reduced machine downtime and product
- damaged by incorrect tension controlImmune to target reflectivity and variations in color
- Provides more reliable measurements to minimize waste left on the roll

Featured Solution DF-G3 Series

Long-Range Fiber Optic Amplifier and heavy-duty shielded fiber array

Key Benefits

- Resists kinking, cutting, and snagging as well as chemicals and other environmental hazards
- Detects tiny misalignments, enabling precise adjustments to prevent winding errors and reduce material waste
- Advanced diagnostics, remote monitoring, teaching, and configuration

see page 44

see page 66

see page 36

Glue Detection

Challenge

- Verify presence and consistency of adhesive on the outer casing of a battery
- Crowded production area with limited deployment space
- · Frequent product changeover

Key Features

- All-in-one solution with camera, controller, lens, and light included in one package
- PC, remote or integrated touchscreen operation
- EtherNet/IP[™], Modbus/TCP, PROFINET[®]
- PCCC and Serial RS-232 communication
- Full runtime editing capability

Thickness Monitoring

Challenge

- Maintain consistent thickness battery film
- High-speed production process
- Hard-to-access, space-constrained deployment area

Key Features

- 0.002 mm resolution and repeatably
- Fast 0.5 ms response speed and 0.25 ms sampling rate
- Best in class thermal and mechanical stability
- Optional Remote Sensor Display (RSD)

Featured Solution

Featured Solution

Other Solutions

Key Benefits

equipment

progress

iVu Series Image Sensor

• VE Series Smart Camera

 I M Series Laser Measurement Sensor

Key Benefits

• Precise measurements for reliable quality and process control

· Enables seamless integration with existing

· Reduces costly downtime by changing inspection parameters while inspections are in

- Reliably solves high-speed applications with fast-moving targets
- · Superior thermal stability for more accurate and reliable measurements
- Simplifies setup and monitoring of sensors in difficult-to-access locations

Monitoring Safety Doors

Challenge

- Monitor multiple guard doors • Staff need to frequently access the
- protected area
- Prevent staff from bypassing safety functions

Key Features

- Achieves Cat 4, PL e, or SIL CL 3 safety ratings alone or in a cascade chain
- Cascade up to 32 switches together in a series
- No contact between switch and actuator
- Unique, high, and low code tamper resistance
- In-Series Diagnostics (ISD)

Featured Solution

 SI-RF Series RFID safety switches

Other Solutions

• SI-MAG Series magnetic safety switches

Key Benefits

- Operates at the highest levels of safety (PL e) without the possibility of fault masking
- Simplifies installation and wiring and frees space on the safety controller
- · Allows easy access and minimizes wear and tear
- Ensures that safety functions cannot be bypassed
- Makes it easy to identify and resolve issues, minimizing downtime

Q

see page 44

Presence of Liquid

Challenge

- Detect presence of liquid at a collection site
- Potential exposure to oil and chemicals
- Below ground deployment area
- Provide indication if sensor is non-functional

Key Features

- Small, flexible and chemically resistant fiber optics
- High-performance sensing for low-contrast application
- Intuitive user interface and easy-to-read dual digital display

Featured Solution

DF-G3 Series fiber optic amplifier

Key Benefits

- Reliable detection in challenging environments
- · Detects very small amounts of liquid
- Provides output for detection of liquid or damaged fibers
- Simplifies setup, programming, and application monitoring

see page 44

Liquid Detection in a Tube

Challenge

- Detect the presence of liquid in a tube • Low optical contrast between the tube
- and liquid
- Multiple inspection points in hard-to-access areas

Key Features

- High-performance sensing in low-contrast application
- Expert TEACH and SET methods
- Cross talk avoidance algorithm
- Easy-to-use mounting straps

Featured Solution DF-G3LIR Infrared water sensor

Other Solutions

DF-G1 Series general purpose fiber optic amplifier

Key Benefits

- Reliably detects liquids inside translucent or semi-opaque plastic and glass tubing
- Ensures optimal gain and threshold for all applications, including challenging high-speed and low-contrast applications
- Amplifiers can be deployed in close proximity to each other
- Simplifies setup, programming, and application monitoring

see page 68

Liquid Level Detection

Challenge

- Monitor fill levels of tanks to ensure steady supply and prevent overfills
- Hard-to-access equipment
- No wired infrastructure

Key Features

- Combines ultrasonic sensor, wireless node, and battery power supply in one device
- Secure, robust Sure Cross® wireless network · Immune to variations in target color,
- reflectivity, and transparency • Plug-and-play compatibility with Wireless
- Solutions Kit for tank monitoring

Featured Solution

Q45UA all-in-one ultrasonic sensor and wireless node

Other Solutions

K50U ultrasonic sensor QT50U with Performance Series -P14 Node

Key Benefits

- Installs easily and can be deployed permanently or redeployed without altering infrastructure
- Eliminates the hassle and expense of running communication cable to connect devices
- Can be used to monitor a wide range of wet or dry materials
- Provides access to real time and historical data and makes it easy to create visualization tools, warnings, and alarms to ensure maximum uptime

Film Slicing Machine

Safety Monitoring

see page 46

Challenge

- Safeguard multiple safety devices
- Complex logic and multiple safety scenarios
 Communicate with HMI to display machine
- status

Featured Solution

XS26 Series expandable safety controllers with Ethernet

Other Solutions SC26 Series safety controllers

SC10

Key Features

- Powerful software offering intuitive icon-based, drag-and-drop operation
- Base controller with 26 inputs and two dualchannel safety outputs supports up to eight expansion I/O modules
- Can be configured for virtual non-safety status outputs and virtual non-safety inputs

Key Benefits

- Configure safety program in minutes and test configuration prior to implementation
- Scalable solution can be expanded to fit changing machine requirements
- Two-way communication between the safety controller and PLC, HMI, and other devices for advanced functionality and diagnostic

Access Protection

Challenge

- Safeguard access to film slicing area
- Requires redundant, self-checking outputs
- Limited space for deployment

Featured Solution

LP Basic Series compact Type 4 safety light curtain

Other Solutions

LP Series full feature compact Type 4 safety light curtain

Key Features

SLC4

- Low-profile, compact design
- Provides basic functionality auto start/restart (trip output)
- Zone and status indicators plus digital display to indicate number of beams blocked and detailed diagnostics

Key Benefits

- Fits easily into small spaces without interfering with operations or processes
- Cost-effective safety device for simple applications
- Minimizes downtime by making it easy to troubleshoot and quickly resolve issues

Cabinet Illumination

see page 53

Challenge

- Illuminate interior of a machine control panel
- Space-constrained deployment area
- DC powered equipment

Featured Solution

WLS15 Series Low Profile, Low Power LED Strip Light

Key Features

- Bright LED strip light with diffuse window
- Slim, space-saving 15 mm profile
- Flexible mounting options
- Operates on 12 V dc or 24 V dc in one model

Key Benefits

- Provides bright, even illumination with no hot spots
- Installs easily in confined areas without disrupting the work environment or obstructing sightlines
- · Integrates easily into existing equipment

see page 49

Solar Cell Production

Printed circuit board (PCB) manufacturing lines include several types of equipment and conveyors that all can benefit from the broad product offering provided by Banner Engineering. From presence detection in high temperatures to ultra-precise measurements to machine safety, Banner Engineering has solutions to critical challenges for PCB and IC chip production lines.

Solutions for Solar Cell Production

Solar Wafer Detection

Challenge

- Detect the presence/absence of a solar wafer
- Low reflectivity from light absorbing material
- Minimize interference with processes

Key Features

- Dual teach mode measures distance and light intensity changes compared to a background reference condition
- Reliable sensing range from 25 up to 610 mm

Featured Solution

Q4X Series Laser Distance Sensor

Key Benefits

- Reliably detects across a variety of target colors, materials, and surfaces
- No reflector required for detection
- Can be installed in a convenient location away from the line

Solar Wafer Flipping

Challenge

- Detect the presence/absence of a solar wafer
- Low reflectivity from light absorbing material
- Minimize interference with processes

Key Features

- Universal housing with an 18 mm threaded lens or side mounts
- Wide operating range up to 20 m
- Bright LED operating status indicators visible from 360°
- IO Link models available

Featured Solution

QS18 Series Photoelectric Sensors

Key Benefits

- Quick, easy installation
- Real-time feedback simplifies operation and troubleshooting
- · Easy installation, wiring, preventative maintenance, and sensor backup

Solar Wafer Counting

Challenge

- Detect the presence/absence of a solar wafer
- Low reflectivity from light absorbing material
- Space constrained deployment area

Featured Solution

VS8 Series miniature sensors

Key Features

- Ultra-miniature housing (22 x 8 x 12 mm)
- High switching frequency
- Blue LED models reliably detect dark, reflective, and transparent objects
- Electronic push button or remote teach

Key Benefits

- Fits easily in very small spaces
- Reliable performance in high-speed applications
- Detects challenging targets without requiring a reflector
- Quick, easy setup enables rapid deployment

see page 40

see page 39

Challenge

- Detect the presence/absence of a solar cell
- Light absorbing solar cell reflects very little light
- Reflective surface of the metallic trace between cells

Key Features

- High-speed detection as fast as 250 us, capturing up to 2,000 events per second
- Reliable sensing range up to 300 mm
- Clear intensity readout from angled
- three-digit display • Superior resistance to ambient light interference
- Two-point teach can easily detect the metal trace versus the light absorbing material

Featured Solution

Q3X Series Laser Contrast Sensor

Key Benefits

- Reliable performance in high-speed applicationsSensor can be deployed off the line to avoid
- interfering with processesEasy-to-see feedback simplifies operation and troubleshooting
- Resists nuisance output trips caused by changing light conditions

see page 70

Pressure Monitoring

Challenge

- Ensure pressure levels remain within recommended range
- Identify system problems before failure can
 occur
- Monitor large, complex system with multiple hard-to-access inspection points

Key Features

- Combines pressure sensor, wireless node, and battery power supply in one device
- Field-proven Sure Cross® wireless architecture

Featured Solution

Performance Series All-in-One Pressure Sensor and Wireless Node

Key Benefits

- Compact, one-piece design simplifies installation and eliminates the need for ordering multiple components
- Integrates easily in applications where infrastructure makes wired solutions impractical, ineffective, or cost-prohibitive
- Collect data from one or multiple points and monitor system performance from any networkenabled location

Presence Detection on a Buffer Machine

Challenge

- Maintain a steady stream of wafers
- Inconsistencies in color of cell magazines
- Space constrained deployment area

Key Features

- Ultra-miniature housing (22 x 8 x 12 mm)
 Superior resistance to fluorescent light
- InterferenceRugged design withstands exposure to
- extreme vibration

Featured Solution

Q12 Series Miniature Sensors

Other Solutions

VS8 Series Miniature Sensors for Precise Detection

Key Benefits

- Fits easily in very small spaces
- Resists nuisance output trips caused by light interference
- Reliable performance in challenging environment
- Long operational life with only routine maintenance

see page 43

IC Chips and Printed Circuit Boards

Printed circuit board (PCB) manufacturing lines include several types of equipment and conveyors that all can benefit from the broad product offering provided by Banner Engineering. From presence detection in high temperatures to ultra-precise measurements to machine safety, Banner Engineering has solutions to critical challenges for PCB and integrated circuit (IC) chip production lines.

Solutions for Printed Circuit Boards and Integrated Circuit (IC) Chips

see page 40

Leading Edge And Adhesive Detection

Challenge

- Detect leading edge of printed circuit board (PCB)
- · Verify that adhesive has been properly applied to PCB
- · Very high levels of precision required for both inspections
- Tight-space constrained deployment area

Key Features

- Space-saving form factor (21.1 x 14.6 x 8 mm)
- Bright, precise spot for precise detection
- High switching frequency

Featured Solution

VS8 Series miniature sensors

Other Solutions

DF-G1 Series fiber optic amplifier with plastic fiber optic sensors

Key Benefits

- Will not interfere with equipment or movement of the PCB on the line
- · Precision inspections reduce rework and wasted product
- Minimizes machine downtime for refilling the glue gun
- Reliable performance in high-speed applications

see page 36

Integrated Circuit (IC) Chip Presence

Challenge

- Detect missing, tilted, and multiple IC chips in a nest
- Small, low-profile target
- High-speed inspections

Key Features

- Precise 0.002 mm 0.004 mm resolution and ±0.02 - ±0.07 mm linearity
- Best-in-class thermal and mechanical stability
- Fast 0.5 ms response speed and 0.25 ms sampling rate
- Optional Remote Sensor Display (RSD)

Featured Solution

LM Series precision measurement sensor

Other Solutions Q4X Series laser distance sensor

Key Benefits

- Ensures parts meet tight tolerances with fewer failures
- Achieves high levels of accuracy in challenging environments
- Reliable performance in high-speed application
- · Simplifies setup and monitoring of sensors

Leading Edge Detection for Pick-and-Place Machine

Challenge

- Complex, multi-step pick-and-place process
- High level of precision required
- Space-constrained deployment area

Key Features

- Small, precise spot
- Cross talk avoidance algorithm
- · Very small, very flexible fiber optic sensors

Featured Solution DF-G2 Series High Speed Amplifier

Other Solutions DF-G1 Series General Purpose Amplifier

Key Benefits

- Precise leading edge detection ensures proper placement of SMT components
- Multiple amplifiers can operate in close proximity to each other
- · Amplifiers can be installed in a convenient location

see page 45

see page 6

Integrated Circuit (IC) Chip Orientation

Challenge

- Confirm correct orientation of IC chips on pocket tape
- Space-constrained deployment area
- Frequent product changeover

Key Features

- All-in-one solution with camera, controller, lens, and light included in one compact package
- Setup and manage inspections using Vision Manager PC software, remote touchscreen, or integrated touchscreen
- EtherNet/IP™, Modbus/TCP, PROFINET®, PCCC and Serial RS-232 communication
- Full runtime editing capability

Featured Solution

iVu Series image sensor with integrated touch screen and light

Other Solutions

VE Series Smart camera

Key Benefits

- Simplified installation without the expense of purchasing additional components
- Setup, manage, and monitor inspections on the device or from a convenient location
- Seamless integration with existing equipment and IIoT data collection
- Change inspection parameters while inspections are in progress

Data Matrix Code Reading

Challenge

- Small, complex 2D code on a printed circuit board (PCB)
- Printing errors leading to unreadable codes
- High-speed processes

Key Features

- High-resolution 1.3 MP
- (1280 x1024 pixels) imager
- Integrated red or multicolor LED lights
- Barcode manager software
- Web interface capability

Featured Solution

ABR Series Imager-Based Barcode Reader

Other Solutions

iVu BCR Series Barcode Reader

Key Benefits

- Detects very fine details on small, complex, and challenging barcodes
- Optimizes the contrast between the Data Matrix code and the PCB
- Intuitive flowchart programming simplifies inspection setup
- Setup, manage, and monitor multiple ABR Series barcode readers from any networkenabled location

see page 67

Clean Room Monitoring

Challenge

Monitor the status of each clean room

Key Features

- Signal personnel when it is safe to enter and exit the clean room
- Alert maintenance personnel of alarm conditions via text or email

Indicator provides bright, easy-to-see

indication and wireless connectivity

with up to 47 wireless nodes

· Controller supports two-way communication

Controller combines wireless gateway with a

logic controller offering advanced capabilities

Featured Solution

DXM700 Wireless Controller and K70 Series Wireless LED Indicators

Key Benefits

- Monitor clean room status from a convenient location
- Activate an indication light and lock/unlock
 doors from a convenient location
- No additional wiring or alterations to infrastructure required

see page 68

Temperature and Humidity Monitoring at a Chip Shooter

Challenge

- Monitor temperature and humidity levels in multiple locations throughout a facility
- Maintain consistent temperature and humidity levels to suppress electrostatic discharge (ESD)
- Automate the collection of temperature and humidity information
- Minimize downtime during installation

Key Features

- Humidity accuracy of \pm 2% relative humidity and temperature accuracy of \pm 0.3 $^{\circ}\text{C}$
- Wireless node is battery powered and
- preconfigured to work with M12 Series sensor • Secure, robust Sure Cross[®] wireless network

Featured Solution

Q45 Series Nodes for Predictive Maintenance and M12 Series Temperature and Humidity Sensor

Key Benefits

- Real-time monitoring ensures consistent temperature and humidity levels
- Quick, easy device setup and deployment
- Eliminates the hassle and expense of running communication cable
- Monitors environmental conditions in hard-to-access locations

Monitoring Machine Status

Challenge

- Monitoring multiple machines
- View machine status from all angles
- Bright ambient light conditions
- Machines use AC and DC power sources

Key Features

- Features white windows with high intensity LED lights
- AC and DC power options available
- Audible options
- Preassembled models

Featured Solution

TL50 Pro Series Tower Lights

Other Solutions

TL50 Basic Tower Lights TL50 Core Series Tower Lights TL70 Series Modular Tower Lights

Key Benefits

- At-a-glance visibility of machine status
- Versatile powering options enable use with a wide range of machines
- No assembly required for rapid deployment

see page 59

PCB Automated Assembly Station

Monitor Safety Devices see page 47

Challenge

- Monitor multiple safety devices on a small assembly station
- Display machine status on an HMI
- Limited space on the machine control panel

Featured Solution

SC10 Series Compact Safety Controller/Relay Hybrid

Other Solutions

SC26 Series safety

controller

- Key FeaturesSupports a wide range of safety devices
- Intuitive, icon-based programming with dragand-drop PC configuration
- Two-way industrial Ethernet communication enables 256 virtual non-safe status outputs and 80 virtual non-safe inputs (reset, on/off, cancel off-delay, mute enable)

Key Benefits

- Consolidates the functionality of multiple safety relays into one compact device
- Eliminates the need to buy and stock dedicated relay modules
- Simplifies device setup and management
- Integrates multiple non-safety input and output devices without using additional IO terminals

Safeguard Machine

Access Points see page 51

Challenge

- Safeguard point of access on a small assembly station
- Prevent attempts to bypass safety system

Featured Solution

SI-MAG Series Magnetic Safety Switches

Other Solutions

SI-RF Series RFID Safety Switches

Key Features

- Achieves category 4/PLe safety rating with a single sensor
- Two-piece, non-contact safety system
- Coded magnets for tamper resistance
- 3-5 mm tolerance to misalignment

Key Benefits

- Operates at the highest level of safety
- Provides a long operational life, even in applications with persistent use
- Resists attempts to bypass safety functions
- Minimizes machine downtime caused by nuisance trips

Initiate Manual Reset See page 62

Challenge

- Initiate manual reset on assembly station
- Provide status indication
- Unobtrusive operation

Featured Solution

S22 Pro Series Multicolor Touch Button

Other Solutions

K50 Core Series Illuminated Touch Buttons

Key Features

- Multicolor illuminated touch surface
- Ergonomic design requires no physical force to actuate
- Flush mount device with terminal connector options
- Solid state electronics

Key Benefits

- Clear, at-a-glance display of status to quickly resolve issues
- Easy actuation with no hand, wrist, and arm stresses
- Quick, easy installation in panels
- Long operational lifespan

Mobile Device Production

Mobile device production requires assembling and inspecting very small parts in tight spaces. Machines in this industry require reliable and compact equipment that does not get in the way of the process and allows machines and workers to complete tasks effectively. Banner Engineering offers a wide variety of compact machine safety equipment, lighting and indication, and sensor and vision products to ensure the safety, quality, and efficiency of production processes.

Solutions for Mobile Device Production

Operator Guidance at Robotic Assembly Station

Challenge

- Quickly identify assembly errors
- Maintain a continuous workflow
- · Operate in challenging environment

Key Features

Challenge

board in a nest

precision to verify position

reflectivity, and transparency

background

Key Features

sensing,

- Combines brilliant, bright illumination and high-visibility indication in one device
- Three- and five-color models available
- Rugged, water-resistant IP66, IP67 and IP69K construction

• Verify the presence and position of cell phone

Small, low-profile target requires high level of

• Reliable sensing range from 25 up to 610 mm · Immune to variations in target color,

• Detects height changes as small as 0.5 mm

· Low optical contrast between target and

Minimize interference with processes

• Dual teach mode (intensity + distance)

Featured Solution

WLS28 Series LED Strip Lights with EZ-STATUS®

Other Solutions

WLS15 Series Low-Profile LED Strip Lights with EZ-STATUS®

Key Benefits

- Simplifies installation, operation, and troubleshooting
- · Allows operators to focus tasks without diverting attention to monitor status
- Reliable operation in challenging environmental conditions

Q4X Series Laser Distance Sensor

Other Solutions

Q5X Series High Power. Mid-Range Laser Measurement Sensor

Key Benefits

- Enables installation in a convenient location away from the line
- Precise measurements ensures proper position
- Detects across a variety of target colors, materials and surfaces based on distance

Part Inspection at a Robotic Assembly Station

Challenge

- Confirm presence and orientation of components on a cell phone board
- · Complex inspection area with many similar looking components
- Inspection of fine details requires higher resolution camera

Key Features

- Available with a high resolution 5MP imager
- Full runtime editing capability
- Software emulator
- EtherNet/IP[™], Modbus/TCP, PROFINET[®], and Serial RS-232 communication

Featured Solution

VE Series Smart Camera

Other Solutions

Key Benefits

iVu Series Image Sensor

- · Detects very small details to verify that all components are correctly placed and positioned
- Minimize downtime by changing inspection parameters while inspections are in progress
- Build and troubleshoot inspections offline prior to implementation
- · Supports seamless integration with existing equipment and IIoT data collection

see page 63

Electronics Final Test

Safeguard Machine Access Point

see page 48

Challenge

- Safeguard access point on a small test machine
- Very fine levels of protection required
- Unobtrusive integration in small area

Featured Solution

SLC4 Series Compact, Low-Profile Type 4 Safety Light Curtains

Other Solutions

LP Series Low-Profile Safety Light Curtains

Key Features

- Defined area heights of 160 mm, 240 mm, and 320 mm
- 0.1 m to 2 m sensing range
- 14 mm or 24 mm resolution models available
- End-to-end sensing design

Key Benefits

- Fits easily in small spaces
- Will not interfere with machine access or operation
- Detects objects as small as a finger or a hand
- Eliminates detection blind zones

Emergency Stop

see page 52

Actuation Challenge

- Provide emergency stop actuation on a small test machine
- Indicate actuator status

Featured Solution

30 mm Mount Emergency Stop Buttons

ë

Key Features

- Pre-assembled one-piece, fully enclosed design with 8-pin quick-disconnect
- Illuminated base: one color solid red or two-color solid yellow with flashing red display

Key Benefits

- Quick easy installation with no assembly or wiring required
- Clear, at-a-glance display of status to quickly resolve issues
- 360° visible indication of E-Stop actuation

Process Initiation

Challenge

- Initiate test processes
- Unobtrusive actuation
- Operator strain from repeated actuation

Featured Solution

S22 Pro Series Programmable Multicolor Panel Touch Button

see page 62

Other Solutions K30 Core Series Illuminated Touch Buttons

Key Features

- Bright, colorful illuminated display
- Smart capacitative sensing technology
- Terminal connector options
- Solid state electronics

Key Benefits

- At-a-glance display of status to quickly resolve issues
- Requires no physical force to actuate, eliminating hand, wrist, and arm stresses
- Quick, easy installation in panels
- Long operational lifespan with minimal maintenance

Contract Manufacturing (EMS)

Banner Engineering's broad offering of products and solutions enable electronics equipment manufacturers and electronics manufacturing services (EMS) companies throughout the world to solve their most challenging applications. From energy efficient LED work lighting to a comprehensive offering of safety products, Banner Engineering has the electronics industry experience necessary to solve a variety of applications.

Solutions for Contract Manufacturing (EMS)

see page 60

Monitoring Machine Status

Challenge

- Provide status indication on legacy equipment
 Monitor multiple machines spread out over a
- Monitor multiple machines spread out over a wide area
- Improve overall equipment effectiveness
- Maintain a steady workflow

Key Features

- Bright, high-visibility illuminated segments
- Modular design with color, audible, and wireless segments available
- Secure, robust Sure Cross wireless network with up to two miles line of sight signal range

Featured Solution

TL70 Series Modular Tower Lights with Sure Cross[®] Wireless Communication Segment

Other Solutions

TL70 Series Modular Tower Lights with Sure Cross Wireless Base

Key Benefits

- Provides at-a-glance status indication
- Users can customize functionality adding segments as desired
- Wireless connectivity enables remote monitoring and access to machine performance data
- Quick, easy installation requiring no communication cables to connect devices to the network

see page 43

Verify Presence and Position of Disk

Challenge

- Ensure disk is present and properly properly positioned in a specific location
- Shiny, reflective surface
- Minimize interference with processes

Key Features

- Reliable sensing range up to 150 mm (Q20) and 600 mm (Q4X)
- Small spot size for precise leading edge detection (Q20 and Q4X)
- Dual teach mode sensing measures the distance to and light intensity from a background condition (Q4X)
- Detects height changes as small as 0.5 mm (Q4X)

Featured Solution

Q20 Series Sensors and Q4X Series Analog Laser Measurement Sensor

Ì

Other Solutions

Q3X Series Laser Contrast Sensor and Q4X Series Laser Measurement Sensor

Key Benefits

- Enables installation in a convenient location
- Precise measurements ensures proper position
- Detects across a variety of target colors,
- materials and surfaces based on distance
 Detects a wide range of objects regardless of target color, reflectivity, and transparency

see page 68

Vibration and Temperature Monitoring on a Motor

Challenge

- Off-line motor testing requires costly downtime and can miss changes between tests
- On-line or dynamic testing may neglect key symptoms that indicate motor decline

Key Features

- Continuously monitor a variety of vibration characteristics and temperature to identify machine problems early
- Communicates data over a secure, reliable Sure Cross® wireless network
- Combines a vibration and temperature sensor, wireless node, and battery power supply in one compact and completely wireless device

Featured Solution

Q45VA All-in-One Vibration and Temperature Sensor and Wireless Node and DXM Series Wireless Controller

Other Solutions

QM30VT Series Vibration and Temperature Sensor, MultiHop Modbus Radio or 1-Wire Serial Node, and DXM Series Wireless Controller

Key Benefits

- Monitor multiple machines in real-time from a convenient location
- Identify errors before a failure can occur by creating real-time alerts to notify operators when vibration thresholds have been exceeded
- All-in-one design eliminates the time and expense of installing separate sensors and nodes

see page 70

Vibration and Current Monitoring on a Motor

Challenge

- Expose machine performance issues
 Identify equipment requiring full spectrum analysis
- Establish more strategic scheduling of equipment maintenance

Key Features

- Combines a wireless radio, antenna, and battery power supply in one compact device
- Preconfigured to work with current transformer and a QM30VT Series vibration and temperature sensor
- Includes 20 amp and a 150 amp current transformer
- Full compatibility with Wireless Solutions Kits and Connected Data Solutions cloud software

Featured Solution

CM Series Condition Monitoring Node, Current Transformer, and QM30VT Vibration and Temperature Sensor

Key Benefits

- Quick, easy deployment: simply connect one or both devices and begin communicating
- Eliminates the hassle and expense of running communication cable to connect devices
- Provides access to real time and historical data and makes it easy to create visualization tools, warnings, and alarms to ensure maximum uptime
- Monitors general health and performance, specific components, and can be used to verify that equipment is ON or OFF, track energy use, and identify power surges

see page 55

Operator Guidance for Electronic Assembly

Challenge

- Assemble multiple parts at one station
- Simplify complicated assembly processes
- Improve assembly accuracy
- Increase product output

Key Features

- Bright, multi-color indication with animation options provide clear communication to guide staff through assembly
- Easy-to-see digital display indicates part count or instructions
- Optical sensor detects hands as they pick pieces
- Very fast response speed for indication of next step in assembly process
- Compatible with DXM700 wireless controller for use on carts and mobile picking stations

to-Light devices

Featured Solution

PTL110 Series Pick-

Key Benefits

- Simplifies the build of parts and ensures a high level of quality assurance
- System keeps pace with the speed of the assembler
- Precise picking system supports multiproduct assembly, allowing one assembler to work on different components at the same station
- Monitor for speed and accuracy, production and inventory levels, and respond quickly to quality issues

see page 37

Roll Diameter Measurement

Challenge

- Monitor roll of shrink wrap to alert when product is running out
- Splice new roll on to old roll with minimal downtime
- Ensure proper roll tension to prevent breakage

Featured Solution

Q5X Series High Power, Mid-Range Laser Measurement Sensor

Other Solutions LE Series Laser Displacement Sensor

LTF Series Long-Range Laser Sensor

Key Benefits

- Reliable detection regardless of object color, translucence, or reflectivity
- Accurate measurement reduces waste left on the core
- Simplifies setup and monitoring of sensors in difficult-to-access locations
- Reduces downtime between product changeover

Key Features

- Dual teach mode sensing measures the distance to and light intensity of the background condition
- 0.1 to 2 m sensing range
- Optional Remote Sensor Display (RSD)

Automated Tray Handling System

Reading Barcodes on

JEDEC Trays

Challenge

• Create record for IC chips being processed

see page 35

- Space-constrained deployment area
- High-speed process

Featured Solution

ABR Series Imager-Based Barcode Reader

Other Solutions iVu BCR Series Barcode

Reader

Key Features

- Available in models with a WVGA imager or a 1.2 MP imager with standard or polarized windows
- Barcode Manager software with intuitive flowchart programming and advanced capabilities
- Ultracompact housing for even the tightest of spaces
- Factory communication options include Ethernet or USB

Key Benefits

- Reliably reads small, complex, and challenging barcodes
- Quick, easy device setup, management, and monitoring of multiple barcode readers from network-enabled location
- One-piece, ultracompact device fits easily in very small spaces
- Seamless integration with existing equipment and IIoT data collection

Safeguarding Machine

Access Points see page 49

Challenge

- Safeguard access to tray processing area
- Requires redundant, self-checking outputs
- Limited space for deployment

Featured Solution

LP Basic Series compact Type 4 safety light curtain

Other Solutions

LP Series full feature compact Type 4 safety light curtain

Key Features

- Low-profile, compact design and multiple mounting options
- · Available in nickel-plated housings for ESD-safe applications
- Zone and status indicators plus digital display to indicate number of beams blocked and detailed diagnostics
- End-to-end sensing design

Key Benefits

- · Installs easily in very small spaces
- Device can be installed within the machine frame
- · Minimizes downtime by making it easy to easy troubleshoot and quickly resolve issues
- Eliminates detection blind zones

Illuminating Work Area see page 55

Challenge

- Illuminate machine and work area
- Consistent, even illumination over a wide area
- Reduce service and maintenance on light fixtures

Featured Solution

WLB72 Series LED Task Light

Other Solutions WLB92 Series LED Task Light

Key Features

- Ultra-bright white light with even light distribution
- Rugged metal housing with shatterproof cover
- Robust electronics and circuit design for long product lifetime
- Plug-and-play operation out of the box

Key Benefits

- Increased safety and productivity
- No bulb replacement or other maintenance
- Low installation costs, quick install time
- · Fewer fixtures needed to illuminate the whole area

Displays (Clear Object Detection)

A challenging but critical aspect of electronics manufacturing is the ability to reliably and cost-effectively detect clear objects like transparent film, plastic, or glass and other targets with low optical contrast. Banner Engineering offers a wide variety of solutions to clear object detection challenges, including economical photoelectric sensors, versatile fiber optic sensors, and high-power laser sensors to meet any application requirements

Solutions for Display Production

Detecting Clear Plastic Material

Challenge

- Detect clear plastic waste material in a bin
- Prevent overfill of material
- Low optical contrast

Key Features

- Polarized lens with coaxial optics
- Three user-selectable thresholds
- Universal housing design with 18 mm threaded lens and multiple mounting options
- Compensates for dust build up and ambient temperature changes

Featured Solution

QS18E Clear Object Detection Sensor

Key Benefits

- Reliably detects a wide range of clear, translucent, or opaque objects
- Detects at any distance from the face of the sensor out to the reflector with no dead zone
- Optimize performance to the type of object being detected
- Versatile, cost-effective and easy-to-use sensor
- Long operational life with only routine
 maintenance

see page 40

see page 41

Monitoring Tote Fill Levels

Challenge

- Detect high and low fill levels
- Low optical contrast between waste water and container
- Challenging environmental conditions

Key Features

- Emits a 1450 nm sensing beam that is attenuated by water-based liquids
- Long-range sensing of up to 8 m between emitter and receiver
- Rugged IP67 (NEMA 6) housing and encapsulated electronics

Featured Solution

QS30H2O Series Water Sensor

Other Solutions

DF-G3LIR Long-Range Infrared Water Sensor with Glass Fiber Optic Bundle

Key Benefits

- Reliably detects the presence of any water-based liquid
- Detects liquids in a wide range of different sized containers
- Resists harsh environments

Detecting Clear Plastic Film

Challenge

- Detect clear, thin glass sheet
- Low optical contrast
- Machine vibration

Key Features

- Dual teach mode measures distance and light intensity changes compared to a background reference condition
- Robust IP69K-rated stainless steel housing
- Clear intensity readout from angled three-digit display

Featured Solution

Q4X Series Laser Distance Sensor

Ŷ

Key Benefits

- Detects a wide range of objects regardless of color, reflectivity, and transparency
- Easy-to-see feedback simplifies operation and troubleshooting
- Resists aggressive cleaning, mechanical impact, and extreme vibration
- No reflector required

LM Series

Compact Precision Laser Measurement Sensor

- Precise measurements with 0.002-0.004 mm analog resolution
- Fast 0.5 ms response speed and 0.25 ms sampling rate
- Compact housing designed to fit into small spaces
- Thermally stable housing and secure mounting for real-world stability
- IP67 and Grade 316 stainless steel for chemical compatibility
- Optional Remote Sensor Display (RSD) for remote monitoring and setup

Q5X Series

High Power, Mid-Range Laser Measurement Sensor

- Reliable detection of black targets against a black background, black targets against a shiny metal background, clear and reflective objects, multicolor packaging, and targets of all colors
- Dual teach mode measures both distance plus light intensity to solve the most challenging applications
- 270-degree rotatable M12 QD to meet a variety of mounting constraints
- Rated IP67 for reliable performance in wet environments
- Optional Remote Sensor Display (RSD) for remote monitoring and setup

Laser Contrast Sensor

- High-speed part detection as fast as 250 us, capturing up to 2,000 events per second
- Reliable sensing range up to 300 mm
- Used for challenging presence/absence or orientation detection for applications with small contrast differences
- Rugged, nickel-plated zinc housing suitable even for environments with cutting fluids and oils
- Clear intensity readout from angled three-digit display
- Fixed background suppression models allow for contrast detection in a fixed range while ignoring a background

QS18 Series

All-Purpose Photoelectric Sensor

- Features a universal housing with an 18 mm threaded lens or side mounts
- Meets IP67 and NEMA 6 standards for harsh environments
- Available in opposed, polarized and non-polarized retroreflective, convergent, regular and wide-angle diffuse, small spot diffuse, laser, ultrasonic, plastic or glass fiber optic, fixed-field and adjustable-field sensing modes
- Offers easy push-button TEACH-mode setup in Expert QS18E and ultrasonic models
- Available in models with IO-Link communication for simplified wiring, installation, preventative maintenance, and sensor backup

VS8 Series

Miniature Sensor for Precise Detection

- Miniature sensor for installation in the smallest of spaces
- Red laser models provide bright, precise laser light spot for optimum small part detection
- Models with a blue LED reliably detect challenging targets, including dark, reflective, and transparent objects without requiring a reflector
- High switching frequency for detection in even the fastest processes
- Robust, glass-fiber-reinforced plastic housing

Q12 Series

Miniature Self-Contained Sensor

- Delivers powerful sensing performance in extremely confined areas
- Rated IP67 for use in the widest range of locations and applications
- Available in models with rugged, sealed housing or PFA chemical-resistant jacket
- Uses unique overmolded design for enhanced durability and shieldingvv

Q20 Series

Industry Standard Global Housing

- Versatile sensor with a universal rectangular housing and multiple mounting options, making it ideal for global manufacturing
- Rated to 1200 psi for use in washdown environments
- Enhanced design for noise immunity and crosstalk avoidance •
- · Visible red beam for easy alignment on most models

DF-G3 Series

Long-Range Fiber Optic Amplifiers

- World-class long-range sensing capability, more than 3 m (10 ft) with opposed mode fibers
- Easy to read dual digital displays show both signal level and threshold simultaneously
- Cross-talk avoidance function allows seven inspections in dense sensing point applications
- Models with IO-Link enable a point-to-point communication link between a master device and a sensor, facilitating remote monitoring, teaching, and configuration
- Operator control of the sensitivity (hysteresis) provides additional detection sensitivity, or a stabilized output depending on the application details

IO-Link

* Only 2 m (6.5 ft) PVC cable models are listed. To order M8 Pico pigtail, change suffix "2M" to "Q3" (for example, DF-G3-NU-Q3). To order M12 Euro pigtail, change suffix "2M" to "Q5" (for example, DF-G3-NU-Q5).

DF-G2 Series

High-Speed Fiber Optic Amplifier

- Best in class response speeds of 10 $\mu s,$ 15 $\mu s,$ 50 $\mu s,$ 250 $\mu s,$ 500 $\mu s,$ and 1000 μs
- Easy-to-read dual digital displays show signal level and threshold values
- Simple user interface ensures easy sensor set-up and programming via displays and switches/buttons or remote input teach wire
- Expert TEACH and SET methods ensure optimal gain and threshold for all applications, especially for high speed or low contrast applications
- Thermally stable electronics shortens start-up time and maintains signal stability during operation
- Economy display mode reduces amplifier power consumption by 25%
- Cross talk avoidance algorithm allows two sensors to operate in close proximity

IO-Link

Sensing Beam Color	Range**	Connection*	Channel 1 Output	Channel 2 Output	Model*

RFID Switches

Non-Contact

- Single and cascade models available to protect one or multiple entry points
- Status and performance data from each sensor in a cascade chain is available using In-Series Diagnostics (ISD) and can be accessed with an HMI or similar device
- On-sensor LED indicator provides at-a-glance status information
- Cascade up to 32 sensors in a series using a standard 4-wire cable with M12 connectors, T-adapters, and an end plug
- Tamper resistance to meet the needs of any application with unique, high, and low code models
- Achieves Cat 4, PL e, or SIL CL 3 safety ratings alone or in a cascade chain
- Rugged, IP69 construction withstands exposure to high-pressure, high-temperature washdown
- High tolerance (10 mm) to misalignment enables reliable performance in challenging industrial environments where machine vibration and impact are possible

NOTE: SI-RF-A Actuator is required to complete a sensor solution. Ordered separately.

- * Tamper Resistant Coding
- Low (L)—The SI-RF Safety Switch accepts any SI-RF-A actuator High (H)—The SI-RF Safety Switch only accepts the last taughtin actuator, a maximum of 12 teach-in processes are possible
- Unique (U)—The SI-RF Safety Switch only accepts the taught-in actuator, and only one teach-in process is possible
- ** Available on single models only

In-Series Diagnostics (ISD) provides users with status and performance data from each sensor in a cascade chain. The ISD data collected is converted to IO-Link so it can be accessed with an HMI or similar device. Users receive notification when an event has occurred as well as where in the series the event occurred. Events include the opening or closing of a door, door misalignment, wrong actuator, and a number of sensor health attributes.

ISD to IO-Link Module

Access comprehensive diagnostic information for each sensor and for the entire system (string of switches) directly via IO-Link or an IO-Link Master with gateway or via a laptop with USB interface.

- Time and cost savings during commissioning, maintenance and fault investigation
- Protection against unexpected machine stops through pre-fault detection
- Basic information, such as switch safety input and safety output status, can be quickly obtained
- Extended diagnostic information and fault information can also be obtained as needed

Model	Output	Interface
SI-RFA-DM1	8 digital outputs; 1 diagnostic circuit	IO-LINK and USB 2.0

SI-RFA-TS T-Adapter for series connecting switches 4-pin to 8-pin to 4-pin

USB-USBM-1 1M USB configuration cable for the SI-RFA-DM1

Magnetic Switches

Non-Contact

- · Cost-effective non contact solution minimizes device wear and tear, even in applications with persistent use
- 3 to 5 mm misalignment tolerence
- A single magnetic pair can achieve up to Category 4/PLe safety rating
- · Coded magnets minimize the potential for intentional defeat
- Available in cable or QD models

NOTE: When ordering housing 1 or 2 with a QD connection, you will receive an M8 Pico connector. When ordering housing 3 with a QD connection you will receive an M12 Euro connector.

QD models require mating cordset

Hinge Switches

One-Piece Sensor and Actuator with Hinge Function

- Mounts at the axis of a swinging guard where the possibility of misalignment is at its lowest, minimizing the opportunity for nuisance trips
- Achieves Category 4/PLe safey rating with two switches deployed
- Once set, the switch point setting mechanism is fully concealed within the switch. preventing access and complicating any attempts to bypass safety functions
- Available in stainless steel, IP69-rated models that resist high-pressure, high-temperature washdown and similar challenges
- Hinge switches are similar in appearance to standard door hinges, making them completely inconspicuous once installed
- One piece device installs quickly with no need to align the switch and actuator

SI-HGZ63A Zinc Blank Hinge

SI-LS31HG Lever Hinge Switch

SI-LS3R Rotary Hinge Switch

E-Stop Button

- Illumination allows for easy identification of which E-stop has been activated
- Easy installation and no assembly or individual wiring required
- Push-to-stop, twist-to-release or pull-to-release operation per IEC 60947-5-5
- Compliant with ANSI B11.19, ANSI NFPA79 and IEC/EN 60204-1 Emergency Stop requirements
- Incorporate with OTB/STB optical touch button for a simplified operator station that does not require an additional enclosure.
- "Safe Break Action" ensures NC contacts will open if the contact block is damaged or separated from the actuator
- Internal electronics automatically change the color from the on state to the off state when the button is pressed

S22 Touch Series

Flush Touch Button

- Large, bright illuminated area for clear visibility of input and touch status
- Flush mount design sits tight against panel, machine and bracket surfaces
- Independent color control or preconfigured models to suit your indication needs
- Momentary versions remain activated as long as touch is present, while latching versions toggle between activated and not activated states on successive touches
- Excellent immunity to false triggering by water spray, detergents, oils, and other foreign materials
- Rugged, water-resistant IP69K design for washdown environments
- Ergonomically designed to eliminate hand, wrist and arm stresses, requiring no physical pressure to operate and can be actuated with bare hands or work gloves

Multipurpose Independent Control

Illuminated Button Control

VE Series Versatile, Easy-To-Use Smart Cameras

- Available in 5 MP (2592 x 2048 pixels), 2MP (1600 x 1200 pixels), 1.3MP (1280 x 1024 pixels), and WVGA (752 x 480 pixels) models, all with the same powerful inspection capabilities
- Runtime editing capability reduces costly downtime and the software emulator allows for offline building and troubleshooting of applications
- Factory communications (EtherNet/IP[™], Modbus/TCP, PROFINET[®] and RS-232 Serial) for integration on the manufacturing floor
- Two-line, eight-character onboard display provides inspection information and focus number and makes it easy to update sensor settings, facilitating fast product changeover
- Robust metal housing with optional lens covers with or without LED lighting to achieve IP67 rating for use in harsh environments with heat, vibration, or moisture

Imager-Based Barcode Readers

- Program through an integrated touch screen, remote touch screen or PC interface
- Reads a variety of 1D and 2D barcodes including DataMatrix (ECC 200), Linear Bar Codes, Code 128, Code 39, Codabar, Interleaved 2 of 5, EAN 13, EAN 8, UPC-E, POSTNET, IMB, and Pharmacode
- Ethernet (EtherNet/IP $^{\rm \tiny M}$, Modbus/TCP, and PROFINET $^{\rm \tiny (S)}$ and Serial RS-232 communications
- Read multiple barcodes in any orientation with one device
- Rugged IP67 housing for factory environments
- Available with a variety of lens and integrated light options red, blue, green, white, UV or infrared

* Remote display or PC is required for set up and viewing of Remote Touch Screen sensors

Accessories shown on page 66

ANNER 65

iVu Vision Sensors

Color and Grayscale Vision Sensors

- The iVu and iVu Color Vision Sensors are used to monitor parts for type, size, orientation, shape, location, and color or color variations.
- Configure in minutes using Vision Manager PC software, onboard touchscreen display or using remote touchscreen to access to hard to reach places
- All-in-one solution with camera, controller, lens, and light included in one package
- Inspect multiple features with a wide variety of grayscale or color tools
- Compact, rugged, IP67 housing available with a variety of integrated ring lights including red, blue, green, white, infrared or UV
- Interchangeable lenses, including C-mount, for maximum application flexibility
- Factory communications (EtherNet/IP[™], Modbus/TCP, PROFINET[®], PCCC and Serial RS-232) for integration on the manufacturing floor
- Ability to change parameters on the fly with full runtime editing to reduce costly downtime

DXM Wireless Controller

Industrial Wireless Controller

- Enables end-to-end IIoT solutions, connecting Banner sensors to Banner's Connected Data Solutions (CDS) cloud platform
- Integrates Banner's ISM radio, cellular connectivity, and local I/O
- Program the DXM using action rules and ScriptBasic language, which can execute concurrently
- Log data on the Micro SD card
- Automation protocols include Modbus RTU, Modbus/TCP, and EtherNet/IP for communications with PLC's, HMI's, or other local hosts
- Interactive programmable user interface with LCD and LED indicators
- Industry standard RS-485, Ethernet, and USB communication ports
- Easily interfaces with Banner CDS and other cloud service providers

Controller Models*

Models	Description	Frequency
DXM700-B1R1	DXM700 Controller with Performance Series Gateway	900 MHz

PSD-24-4 DC power supply – desktop style, 24 V dc 4A, Euro 4-pin connector

PSDINP-24-13 DC power supply DIN rail mount, 24 - 28 V dc, 1.3A

MQDMC-401 Euro-style male quick disconnect cable, 4-Pin straight connector

BWA-AH12106 enclosure

SX1-LTE-001 Cellular Data Modem Verizon 4G LTE Cat. 1

SX1-GSM-001 Cellular Data Modem Worldwide HSPA 3G with 2G GSM fallback

045 Nodes

for Predictive Maintenance

- To save on installation time, Q45 1-wire serial nodes are pre-configured to work with Banner 1-wire serial sensors. The compact size, integrated lithium batteries, and a variety of compatible sensors make remote monitoring easy.
- The Q45VTP is designed to pair with the QM30VT1 Vibration and Temperature sensor. Vibration characteristics and sample intervals can be set using DIP switches.
- The Q45TH connects directly to the M12FTH4Q temperature and humidity sensor. Sample rates can be set using DIP switches.
- The Q45U is a universal 1-wire serial node that reads any Banner 1-wire serial sensor and determines an efficient power setting.

Select Your Node

* Sensor units must be ordered separately

Sensor

M12FTH4Q Temperature and Temperature Humidity Sensor

K50UX1RA Ultrasonic Sensor

45

All-in-One Sensors

- Vibration and Temperature or Tank Level sensor and node in one compact package
- Uses a 1-wire serial interface
- Easy-to-order
- Easy-to-deploy
- DIP switch configurable for vibration characteristics and sample intervals
- Dual-axis vibration sensing

Ultrasonic

Vibration: Sensor and Node

Models	Frequency	Description
DX80N9Q45VA	900 MHz	All-in-one Vibration and Temperature sensor
DX80N2Q45VA	2.4 GHz	All-in-one Vibration and Temperature sensor sensor

Ultrasonic: Sensor and Node

Models	Range	Description
DX80N9Q45UAC	900 MHz	Q45 Node with Integrated Ultrasonic Sensor
DX80N2Q45UAC	2.4 GHz	Q45 Node with Integrated Ultrasonic Sensor

QM30VT Series

Vibration and Temperature Sensor

- Avoid machine failures and delays by detecting problems early
- Provides high accuracy vibration and temperature measurements
- Dual-axis vibration detection up to 4 KHz bandwidth
- Manufactured with a sealed aluminum housing
- Reduces labor costs by obviating manual checks and eliminating error

Models	Description
QM30VT1	Vibration and temperature sensor with 1-wire serial interface; 3 m QD cable
QM30VT2	Vibration and temperature sensor that functions as a modbus slave device via RS-485; 3 m QD cable
QM30VT2-SS-9M	Vibration and temperature sensor with stainless steel housing that functions as a modbus slave device via RS-485; 9 m cable with flying leads

BWA-BK-013

BWA-BK-012

DEE2R-53D 1 m (3')

K50U Ultrasonic Sensor Wireless Level and Tank Monitoring

- _____
- Provides a distance measurement from the target to the sensor
- Monitor wirelessly to avoid long cable runs
- Built-in temperature compensation for reliable measurement
- Threaded housing for easy installation

Models	Description
K50UX1ARA	Ultrasonic sensor with 1-wire serial interface; 1 m sensing range
K50UX1CRA	Ultrasonic sensor with 1-wire serial interface; 3 m sensing range
K50UX2ARA	Ultrasonic sensor that functions as a modbus slave device via RS-485; 1 m sensing range
K50UX2CRA	Ultrasonic sensor that functions as a modbus slave device via RS-485; 3 m sensing range

BWA-BK-006 Mounts both the K50U Ultrasonic sensor and a Wireless Q45 Node

DEE2R-53D 1 m (3')

Pressure Sensor Node

All-in-One Performance Series Node

- Combines a media isolated pressure sensor, a Performance Series wireless node, and a battery power supply
- Compact, one-piece design simplifies installation and eliminates the need for ordering multiple components
- Integrates easily in applications where infrastructure, movement, or mobility make wired solutions impractical, ineffective, or cost-prohibitive
- Field-proven, Sure Cross wireless architecture ensures secure, reliable communication between devices

Models	Description
DX80N9X1W-PS50G	0-50 PSI GAUGE Pressure Sensor in the housing port pre-wired to the Node
DX80N9X1W-PS50G1	0-50 PSI GAUGE Pressure Sensor in the housing port 1 meter cable pre-wired to the Node
DX80N9X1W-PS150G	0-150 PSI GAUGE Pressure Sensor in the housing port pre-wired to the Node
DX80N9X1W-PS150G1	0-150 PSI GAUGE Pressure Sensor in the housing port 1 meter cable pre-wired to the Node
DX80N9X1W-PS500S	0-500 PSI SEALED GAUGE Pressure Sensor in the housing port pre-wired to the Node
DX80N9X1W-PS500S1	0-500 PSI GAUGE SEALED Pressure Sensor in the housing port 1 meter cable pre-wired to the Node

Condition Monitoring Node

- Vibration, Temperature, and Current
- Performance Node with a Euro-style connector for use with a Banner VT1 Vibration and Temperature sensor (sold separately) and one-meter twisted pair cable for use with a current transformer
- 20 A and 150 A split core current transformers included
- DIP switch configurable
- Compatible with the Vibrations Solutions Kit
- Improved internal antenna for extended wireless range
- 6+ year battery life

Models	Frequency	Description
DX80N9X1W-CM1L	900 MHz	Pre-wired Euro-style connector for use with any Banner 1-Wire Serial Vibration Sensor
DX80N2X1W-CM1L	2.4 GHz	(20 A and 150 A current transformers included with Node).

Fiber Optic Sensing Solutions

What is a Fiber Optic System?

Considerations for Choosing Fiber Optic Technology

Fiber Optic systems are comprised of a fiber amplifier and optical fibers. The amplifier, or sensor, emits, receives, and converts the light energy into an electrical signal. Individual fiber optic assemblies simply guide light from the amplifier to a sensing location, or from the sensing location back to the amplifier.

Think of an optical fiber as being similar to a garden hose: like a hose transports water, the fiber transports light from one end to the other.

The main advantage of fiber optic sensors is the versatility. Fibers are typically used because of space constraints, hostile environments, or lack of power at the sensing location. Since the fiber amplifier is a separate piece, it can be mounted and powered remotely.

Banner Engineering has the largest portfolio of fiber optic assemblies in the Industry. We have over 1,000 different fibers to meet every space, environment and sensing requirement.

Typical Applications for Fiber Optics

- Punch presses
- Vibratory feeders
- Conveyors
- Pill counting
- Small object detection
- Leading edge detection

- Ovens
- Semiconductor processing equipment
- Robotic arms and moving machines
- Edge guiding
- Hazardous locations
- Final inspection stations

Why Fiber Optics?

Compact Size for Tight Sensing Locations

- \bullet The small size and flexibility allow positioning and mounting in tight spaces
- Plastic fiber optic assemblies are usually single strands of optical fiber and can be routed into extremely tight areas
- Plastic fibers also survive well under repeated flexing
- Pre-coiled plastic fiber optics are available for sensing applications on reciprocating mechanisms

Reliable Performance in Harsh or Explosive Environments

- Fibers can be constructed to survive in areas with corrosive material or extreme moisture and are immune to electrical noise
- Fiber optics contain no electrical circuitry and have no moving parts, so they can safely "pipe" light into and out of hazardous sensing locations
- Most glass fiber optic assemblies are very rugged and perform reliably in extreme temperatures
- Sheathing materials such as polypropylene, Teflon®, and stainless steel are used to shield both plastic and glass fiber optic assemblies in harsh environments
- Optical fibers are low in mass, enabling fiber optic assemblies to withstand high levels of vibration and mechanical shock

Flexibility to Meet a Wide Variety of Application Requirements

- Some fiber optics have bendable probes that can be optimally shaped to the physical and optical requirements of a specific application
- Specialty fibers are available for water detection, clear object detection, or for vacuum feed-through areas

3

Overview of DF-G Series Amplifiers

• The DF-G Series is an easy-to-use DIN-rail-mountable fiber optic sensor.

CONTRACTOR OF

- It provides high-performance sensing in low-contrast applications.
- The sensor's compact housing has dual digital displays (Red/Green) and a bright output LED for easy programming and status monitoring during operation.

Simple user interface. Highly visible dual display. Easy sensor set up.

General Purpose Amplifiers

DF-G1: Single Discrete Output

Sensing Beam Color	Connection	Range	NPN Model	PNP Model
Visible red	2 m	Range varies by response speed used, gain setting, target light source intensity, ambient light level and with fiber optics used.	DF-G1-NS-2M	DF-G1-PS-2M
	9 m		DF-G1-NS-9M	DF-G1-PS-9M
	150 mm (6 in) PVC pigtail, M8 Pico connector, 4-pin		DF-G1-NS-Q3	DF-G1-PS-Q3
	150 mm (6 in) PVC pigtail, M12 Euro QD connector, 4-pin		DF-G1-NS-Q5	DF-G1-PS-Q5
	Integral M8 Pico, 4-pin		DF-G1-NS-Q7	DF-G1-PS-Q7

DF-G2: High-Speed Single Discrete Output

Sensing Beam Color	Connection	Range	NPN Model	PNP Model
Visible red	2 m	Range varies by response speed used, gain setting, target light source intensity, ambient light level and with fiber optics used.	DF-G2-NS-2M	DF-G2-PS-2M
	9 m		DF-G2-NS-9M	DF-G2-PS-9M
	150 mm (6 in) PVC pigtail, M8 Pico connector, 4-pin		DF-G2-NS-Q3	DF-G2-PS-Q3
	150 mm (6 in) PVC pigtail, M12 Euro QD connector, 4-pin		DF-G2-NS-Q5	DF-G2-PS-Q5
	Integral M8 Pico, 4-pin		DF-G2-NS-Q7	DF-G2-PS-Q7

DF-G3: High-Power Single Discrete Output

Sensing Beam Color	Connection	Range	NPN Model	PNP Model
Visible red	2 m	Range varies by response speed used, gain setting, target light source intensity, ambient light level and with fiber optics used.	DF-G3-NS-2M	DF-G3-PS-2M
	9 m		DF-G3-NS-9M	DF-G3-PS-9M
	150 mm (6 in) PVC pigtail, M8 Pico connector, 4-pin		DF-G3-NS-Q3	DF-G3-PS-Q3
	150 mm (6 in) PVC pigtail, M12 Euro QD connector, 4-pin		DF-G3-NS-Q5	DF-G3-PS-Q5
	Integral M8 Pico, 4-pin		DF-G3-NS-Q7	DF-G3-PS-Q7

A model with a QD connector requires a mating cordset

DF-G3: High-Power Dual Independent Discrete Outputs

Sensing Beam Color	Connection	Range	NPN Model	PNP Model
Visible red	2 m	Range varies by response speed used, gain setting, target light source intensity, ambient light level and with fiber optics used.	DF-G3-ND-2M	DF-G3-PD-2M
	9 m		DF-G3-ND-9M	DF-G3-PD-9M
	150 mm (6 in) PVC pigtail, M8 Pico connector, 5-pin		DF-G3-ND-Q3	DF-G3-PD-Q3
	150 mm (6 in) PVC pigtail, M12 Euro QD connector, 5-pin		DF-G3-ND-Q5	DF-G3-PD-Q5
	Integral M8 Pico, 5-pin		DF-G3-ND-Q7	DF-G3-PD-Q7

DF-G3: High-Power One Analog and One Discrete Output

Sensing Beam Color	Connection	Analog Output	Range	NPN Model	PNP Model
	2 m	Voltage: 0-10 V DC		DF-G3-NU-2M	DF-G3-PU-2M
	9 m	Voltage: 0-10 V DC		DF-G3-NU-9M	DF-G3-PU-9M
Visible red	150 mm (6 in) PVC pigtail, M8 Pico, 5-pin	Voltage: 0-10 V DC	used, gain setting, target light source intensity, ambient light level and with fiber optics used	DF-G3-NU-Q3	DF-G3-PU-Q3
	150 mm (6 in) PVC pigtail, M12 Euro, 5-pin	Voltage: 0-10 V DC		DF-G3-NU-Q5	DF-G3-PU-Q5
	Integral M8 Pico, 6-pin	Voltage: 0-10 V DC		DF-G3-NU-Q7	DF-G3-PU-Q7
Visible red	2 m	Current: 4-20 mA		DF-G3-NI-2M	DF-G3-PI-2M
	9 m	Current: 4-20 mA	Denne unite human and	DF-G3-NI-9M	DF-G3-PI-9M
	150 mm (6 in) PVC pigtail, M8 Pico, 5-pin	Current: 4-20 mA	Hange varies by response speed used, gain setting, target light source intensity, ambient light level and with fiber optics used	DF-G3-NI-Q3	DF-G3-PI-Q3
	150 mm (6 in) PVC pigtail, M12 Euro QD, 5-pin	Current: 4-20 mA		DF-G3-NI-Q5	DF-G3-PI-Q5
	Integral M8 Pico, 6-pin	Current: 4-20 mA		DF-G3-NI-Q7	DF-G3-PI-Q7

plication Specific Amplifiers

DF-G1 Light Intensity Receiver

Connection*	Range	NPN Models	PNP Models
2 m	Range varies by response speed used, gain setting, target light source intensity, ambient light level and with fiber optics used.	DF-G1-NR-2M	DF-G1-PR-2M

DF-G2 Small Object Counter

Connection*	Sensing Beam Color	Window Size	NPN Models	PNP Models**
2 m	Visible red	Determined by the fiber optic assembly	DF-G2-NC-2M	DF-G2-PC-2M

See page 20 for a sample of array fibers

DF-G2 Color LED

Connection*	Sensing Beam Color	Range	NPN Models	PNP Models
2 m	Infrared [†]	190% of Visible Red Range	DF-G2IR-NS-2M	DF-G2IR-PS-2M
2 m	Broad spectrum white	50% of Visible Red Range	DF-G2W-NS-2M	DF-G2W-PS-2M
2 m	Visible green	60% of Visible Red Range	DF-G2G-NS-2M	DF-G2G-PS-2M
2 m	Visible blue	70% of Visible Red Range	DF-G2B-NS-2M	DF-G2B-PS-2M

DF-G3 Water Detection

Connection*	Sensing Beam Color	Range ^{††}	Output	NPN Models	PNP Models
2 m	Long infrared (1450 nm) [†]	900 mm	Voltage: 0-10 V DC, Discrete	DF-G3LIR-NU-2M	DF-G3LIR-PU-2M
2 m	Long infrared (1450 nm) [†]	900 mm	Current: 4-20 mA, Discrete	DF-G3LIR-NI-2M	DF-G3LIR-PI-2M
2 m	Long infrared (1450 nm) [†]	900 mm	Single Discrete	DF-G3LIR-NS-2M	DF-G3LIR-PS-2M
2 m	Long infrared (1450 nm) ⁺	900 mm	Dual Discrete	DF-G3LIR-ND-2M	DF-G3LIR-PD-2M

A model with a QD connector requires a mating cordset

* Connector options:

• For 9 m cable, change the suffix 2M to 9M in the 2 m model number (example, DF-G3LIR-NU-9M)

For 150 mm (6 in) PVC, M8 Pico QD connector, 4-pin change the suffix 2M to Q3 in the 2 m model number (example, DF-G3LIR-NU-Q3)
 For 150 mm (6 in) PVC, M12 Euro QD connector, 4-pin change the suffix 2M to Q5 in the 2 m model number (example, DF-G3LIR-NU-Q5)

• For integral M8 Pico QD connector, 4-pin change the suffix 2M to Q7 in the 2 m model number (example, DF-G3LIR-NU-Q7)

** Includes Health Mode Output

⁺ Excess gain = 1, Long Range response speed, opposed mode sensing. PIT46U plastic fiber used for visible LED models, IT.83.3ST5M6 glass fiber used for IR model

⁺⁺ IR models require T5 terminated glass fiber optic cables

DF-G Fiber Amplifiers with IO-Link

The DF-G Series has a simple user interface to ensure easy sensor set-up and programming via displays and switches/buttons, remote input teach wire or IO-Link.

DF-G1

Connection*	Sensing Beam Color	Range	Output	Model*
150 mm (6 in) PVC pigtail, M12 Euro, 5-pin	Visible red	Range varies by Speed Selection used and with fiber optics used	Dual complementary outputs: - 1 push-pull (IO-Link) - 1 PNP	DF-G1-KS-Q5

DF-G2

Connection*	Sensing Beam Color	Range**	Channel 1 Output	Channel 2 Output	Model*
150 mm (6 in) PVC pigtail, M12 Euro, 5-pin	Visible red	1100 mm	IO-Link, push/pull	PNP only, or input	DF-G2-KD-Q5
150 mm (6 in) PVC pigtail, M12 Euro, 5-pin	Infrared [†]	2100 mm	IO-Link, push/pull	PNP only, or input	DF-G2IR-KD-Q5

DF-G3

Connection*	Sensing Beam Color	Range**	Channel 1 Output	Channel 2 Output	Model*
150 mm (6 in) PVC pigtail, M12 Euro, 5-pin	Visible red	3000 mm	IO-Link, push/pull	PNP only, or input	DF-G3-KD-Q5
150 mm (6 in) PVC pigtail, M12 Euro, 5-pin	Infrared [†]	6000 mm	IO-Link, push/pull	PNP only, or input	DF-G3IR-KD-Q5

A model with a QD connector requires a mating cordset

* Connector options:

Connector options:
For 2 m cable, change the suffix Q5 to 2M in the Q5 model number (example, DF-G3-KD-9M)
For 9 m cable, change the suffix Q5 to 9M in the Q5 model number (example, DF-G3-KD-9M)
For 150 mm (6 in) PVC, M8 Pico QD connector, 4-pin change the suffix Q5 to Q3 in the Q5 model number (example, DF-G3-KD-Q3)
For integral M8 Pico QD connector, 4-pin change the suffix Q5 to Q7 in the Q5 model number (example, DF-G3-KD-Q7)

** Excess gain = 1, Long Range response speed, opposed mode sensing. PIT46U plastic fiber used for visible LED models, IT.83.3ST5M6 glass fiber used for IR model ⁺ IR models require T5 terminated glass fiber optic cables

9

Fiber Optic Applications

Web Monitoring/Splice Detection

Challenge

- Material texture, color, or finish vary
- Dusty environment
- Easy setup

Key Features

- Variety of opposed mode fiber arrays for edge guiding
- High excess gain with auto thresholding
- Option for mid-point teach mode

Featured Solution

Amplifier: DF-G2-PS-2M Fiber: PIT43TSL5-VL

Key Benefits

- Opposed mode fiber arrays minimize effects of changing textures, colors, or transparencies
- Able to burn through dust and compensate for dust that settles on fibers
- Mid-point teach learns the optimal web position with an easy single-point teach

Liquid Level Detection

Challenge

- Detect liquid level in transparent or different color vials and bottles
- Limited space to mount a sensor

Key Features

- Detect water-based liquids inside translucent or opaque plastic and glass containers
- Compatible with standard glass fibers with T5 termination

Featured Solution

Amplifier: DF-G3LIR-PS-2M (Water Detection Sensor) Fiber: IT43ST5-VL (pair)

Key Benefits

- Reduce product waste by detecting underfilled vials early in the packaging process
- Quick and simple installation with many small fiber optic bundles styles to choose from

Light Intensity Detection

Challenge

 Verify correct assembly and function of automotive indicator lights

Key Features

 Designed to detect light emission from a wide variety of sources -410 nm to near infrared

Featured Solution

Amplifier: DF-G1-PR-Q5 Fiber: PIT46U-VL

Key Benefits

- Quality improvement and return reduction
- Quick and simple installation with many small fiber optic bundle styles to choose from

Related Applications

- Appliance lighting
- LED indicators on equipment
- Window tint verification
- Dashboard lighting verification

High-Speed Small Object Detection

Challenge

- Tablets move at high speed
- Small tablets are hard to detect

Key Features

- Automatic Gain Compensation (AGC) algorithm compensates for dust build-up on fiber optics
- Fiber optic array can detect objects as small as 2 mm in diameter

Featured Solution

Amplifier: DF-G2-PC-2M (small object counter) Fiber: PFCVA-10X25-E

Key Benefits

- Increase the time between scheduled maintenance by extending the counting cycle and maintain count accuracy as dust increases during production
- Improve process flexibility by detecting even the smallest tablet in a large 40 mm area

Blue LEDs for Low Contrast Detection

Challenge

• Detecting presence and correct clips used in a door panel assembly

Featured Solution

Amplifier: DF-G2B-PS-Q5 (Blue LED) Fiber: PBL46U

Key Features

- Blue LED optimal for detecting silver and gold clips in place
- Can easily differentiate and verify correct color clip used since gold clips reflect less blue light than silver

Key Benefits

- Highly reliable and cost-effective solution to reduce errors and rejects
- Diffuse lensed fibers provide small, bright spot

Green LEDs for Registration Mark Detection

Challenge

- Accurately detect red registration mark on roll of packaging
- Product passes at high speed

Key Features

• 10 µs response time

Featured Solution

Amplifier: DF-G2G-PS-2M Fiber: PBT23U-VL

Key Benefits

• Green LED creates optimal contrast with red registration mark

High Temperature - Leading Edge Detection

Challenge

• Temperature is above the limit for most plastic fibers

Key Features

- Glass fiber assemblies are suitable for high temp applications up to 249° C
- Stainless steel sheathing protects cable jacket from abrasion and high temperature

Featured Solution

Amplifier: DF-G1-PS-Q3 Fiber: One pair of IT46ST5-VL

Key Benefits

- Thermal process applications
- For sensing near manufacturing ovens
- Manufacturing of solar panels, colored glass and ceramics
- Widest selection of plastic and glass fibers for high temp applications

Long-Range Detection in a Hazardous/Dirty Area

Challenge

- Detecting correct product placement in harsh environment, fibers get coated in oil and dirt
- Cables can be abraded or cut

Key Features

 With extended range of DF-G3 amplifier, fibers can be placed much farther away and still reliably detect correct positioning

Featured Solution

Amplifier: DF-G3-PS-Q5 Fiber: PIT46TMB5

Key Benefits

- No build-up of dirt and oil on fiber amplifier because it is out of the area
- STEEL SKIN fibers offer protection to the cabling

Fill Level Detection - Water Bottles

Challenge

• Difficult to consistently detect the top edge of clear water in a variety of bottles

Key Features

 Banner's DF-G3LIR water sensor employs a unique LED that can clear detect waterbased liquids

Featured Solution

Amplifier: Two DF-G3LIR-PS-2M Fiber: Two pairs of IT43ST5-VL with L2 Lens

Key Benefits

• Regardless of the bottle color or texture, the DF-G3LIR water sensors will see the clear water-based liquids inside

Precise Positioning

Challenge

- Detect leading edge of board to trigger adhesive application
- Then verify that adhesive was applied properly to trays of IC chips

Key Features

- Fast response speed
- Small spot size

Featured Solution

Amplifier: Two DF-G3-PD-2M Fiber: Two PBT23UM4-VL Diffuse Reflective

Key Benefits

- Accurate leading edge detection
- Prevents product waste by assuring glue was applied

Edge Guiding

Challenge

 Incorrect winding causes major issues with assembly and increased downtime to fix the film

Key Features

• Compact fibers can sense very slight changes in position

Featured Solution

Amplifier: DF-G3-PU-Q5 Fiber: PGIRS66U-100

Key Benefits

 The DF-G3 fiber optic amplifier used with plastic array fibers detects the edges of the film and guides it into proper position

Detecting Presence of Clear Photomask – Semiconductor Manufacturing

Challenge

• Clear object in a confined space

Key Features

- Convergent Beam Fiber can detect glass regardless of color or transparency
- Form factor (right angle) of fiber fits in a confined space
- 6 mm focus point with tight depth of field

Featured Solution Amplifier: DF-G1-PS-Q7 Fiber: P32-C6

Key Benefits

• Solution is extremely robust based on optical contrast

Fiber Optics

What Are Fiber Optics?

Fiber optics are used to transmit light energy over long distances. Optical fibers are thin, transparent strands of optical quality glass or plastic that can be as thin as a strand of hair. In photoelectric sensing, these fibers are used to transmit and/or receive light from the LED of a sensor.

Plastic Fiber Optic Assemblies

Plastic fiber optics usually have a large, monofilament core which comes in a single strand of fiber optic.

Advances in LED technology have improved the performance and range of plastic fiber optic sensing systems to the point that they are nearly equivalent to glass fibers. Plastic fibers are a versatile, cost-effective choice for many fiber optic sensing applications.

Advantages:

- Less expensive
- Allow less signal attenuation
- More flexible
- Survive well under repeated flexing
- Can be cut to length in the field
- Can be routed into extremely tight areas

Glass Fiber Optic Assemblies

Most glass fiber optic assemblies are very rugged and perform reliably in extreme temperatures, corrosive or vacuum chamber environments. Glass fiber optic assemblies can transmit both visible and infrared light, where plastic fiber optics can only transmit visible light. A common problem experienced with glass fibers is breakage of the individual strands resulting from sharp bending or continued flexing, as occurs on reciprocating mechanisms. Banner glass fibers with a T5 connection are compatable with DF-G plastic amplifiers.

Advantages

- Powerful and very rugged
- Can carry infrared light to provide longer range
- Reliable in extreme temperatures and harsh environments

Vantage Line See page 18

Problem solving fibers that solve a majority of common applications. Most models feature a PVC overmolded flex relief.

Array & Slot See page 20

Array fibers are ideal for small part counting and detecting objects at any point in the sensing area. Slot fibers are ideal for web guiding and edge detection.

Heavy Duty See page 22

Heavy duty fiber models resist kinking, cutting and abrasion and are ideal for places where the fibers are exposed to repeated stress.

Tight Bend See page 24

Able to be bent to a tight radius for limited space set-ups and difficult-to-access locations.

Retractile

See page 25

Designed for linear motion applications where the fiber is repeatedly moved back and forth. The cable is coiled and can offer a full range of movement without a tangle of loose cable.

Liquid Level See page 26

Easily detect liquids with tube mounted fiber assemblies, special wavelength infrared light, or liquid probes.

High Temperature See page 27

Glass fibers specially terminated for use in the DF-G Fiber Amplifiers. Can withstand temperatures up to 315 °C – much higher than plastic fibers. For thermal process applications, areas near ovens or high heat.

Accessories

See page 28

Screw on lenses to focus the light beam are available for a variety of fibers. Also available are special brackets for mounting and fiber cutters to custom fit fiber cables to the application.

Vantage Line Fibers

- OEM friendly packaging
- Opposed models come as a pair
- No fiber cutter included

Packaging Solutions

Industry 4.0

What IIoT Means for Manufacturing

IIoT is perhaps the biggest buzzword in factory automation today, and it is a key aspect of Industry 4.0. IIoT already impacts the way factories operate today, and it will increasingly impact businesses in the future.

Industry 4.0, IoT, and IIoT

Industry 4.0 describes the current wave of technological innovation as an era in history characterized by interconnectivity enabled by the internet and wirelessly-connected devices. While digital technologies enable the collection of large amounts of valuable data, this data primarily exists in silos that are not easily accessible for analysis and actionable insights.

The technologies of Industry 4.0 make data readily available and automate the communication between industrial automation equipment and systems. This enables predictive analysis for machines as well as process optimization across the factory floor.

The Internet of Things (IoT) describes the technologies that connect objects from consumer electronics to industrial components—to the internet. The Industrial Internet of Things (or IIoT) refers specifically to the impact of this innovation on industrial applications.

The key benefits of IIoT technologies for factory automation include:

- Visibility and Remote Access to the operational status of machine components (both historically and in real-time)
- Predictive Analytics for more accurate planning of machine maintenance
- Interconnectivity for seamless communication among machines, components, and people

What Does IIoT Mean For Factories?

Following are three practical examples of how visibility, predictive analytics, and interconnectivity are impacting factories today.

Visibility and Remote Access Increase Efficiency

In order to ensure efficient processes throughout the factory, machine operators must quickly and easily determine the status of machines. The greater the visibility, the easier it is to identify and resolve problems and keep operations running smoothly.

Traditional tower lights provide visibility wherever they can be physically seen. However, tower lights equipped with wireless communication capabilities both display a visual indication of an event and transmit wireless alerts. This helps ensure that operational problems are identified and addressed immediately, regardless of whether a machine operator is physically present to see the visual indicator.

An additional benefit of wireless indicators is data logging for use in OEE (Overall Equipment Effectiveness) calculations. Not only can operators respond to alerts quickly as they occur, but a history of alerts can also be stored and analyzed offline. This historical data can be used to track machine uptime, production volume, rejected parts, and other key metrics to make more informed decisions over time.

Predictive Maintenance Increases Machine Uptime and Availability

In addition to real-time status monitoring, IIoT technologies can also be used to help avoid machine failures thanks to predictive maintenance.

By monitoring machine components in realtime for increases in vibration and temperature, problems can be detected and resolved before they become too severe and cause additional damage or result in unplanned downtime. Over time, the historical data creates a valuable machine performance log that can be used to make more informed maintenance decisions down the line.

Interconnectivity Streamlines Factory Communications

Wireless technologies also enable seamless interaction among human workers, and can have a significant impact on the efficiency of manual

production lines. For example, instead of requiring machine operators to walk over to the manager area for assistance with a technical issue, a wireless system utilizing connected pushbuttons or switches and tower lights can be used to alert managers when assistance is needed on the line.

Is Your Business IIoT-Ready?

From keeping machines running smoothly to enabling seamless communication among machines, components, and people, the benefits of IIoT technologies are tangible. However, it can be challenging knowing where to start and how to use these technologies to their fullest advantage.

Below are three questions to help manufacturers prepare for a move from digital to IIoT:

- What are the inefficiencies in your operations?
- What kind of data would help you overcome these inefficiencies?
- What communication processes need to be in place in order to utilize data in a meaningful way?

Answering these questions can help manufacturing facilities identify the best technologies to meet their immediate business needs and start taking advantage of the long-term benefits of IIoT.

What is IO-Link?

IO-Link (IEC61131-9) is an open standard serial communication protocol that allows for the bi-directional exchange of data from sensors and devices that support IO-Link and are connected to a master. The IO-Link master can transmit this data over various networks, fieldbuses, or backplane buses, making the data accessible for immediate action or long-term analysis via an industrial information system (PLC, HMI, etc.). Each IO-Link sensor has an IODD (IO Device Description) file that describes the device and its IO-Link capabilities.

5 Advantages of IO-Link

1. Standardized and Reduced Wiring

IO-Link devices do not require any special or complicated wiring, but can be connected using the same cost-effective standard unshielded 3-wire cables as conventional discrete I/O. In addition, IO-Link also eliminates the need for analog sensors and reduces the variety of cord sets required for sensors, which saves inventory costs. IO-Link also supports a masterslave configuration with passive connection points, which further reduces wiring requirements.

2. Increased Data Availability

Access to sensor-level data helps ensure the smooth operation of system components, streamlines device replacement, and enables optimized machine maintenance schedules—all of which save costs and reduce the risk of machine downtime.

This wealth of valuable data made available through IO-Link is integral for the Industrial Internet of Things (IIoT) and Industry 4.0 initiatives.

3. Remote Configuration and Monitoring

With IO-Link, users can read and change device parameters through the control system software, enabling fast configuration and commissioning that saves time and resources. In addition, IO-Link allows operators to dynamically change the sensor parameters from the control system as needed—such as in the case of product changeover—which reduces downtime and allows machines to accommodate greater product diversity.

In addition, the ability to monitor sensor outputs, receive real-time status alerts, and adjust settings from virtually anywhere allows users to identify and resolve problems that arise on the sensor level in a timely manner. This capability reduces costly downtime and improves overall efficiencies.

4. Simple Device Replacement

In addition to the ability to remotely adjust sensor settings, IO-Link's data storage capability also allows for automated parameter reassignment in case of device replacement (also known as Auto-Device Replacement or ADR). Users can import existing sensor parameter values into a replacement sensor for seamless replacement, getting the new device up and running as quickly as possible.

5. Extended Diagnostics

IO-Link provides users with visibility into errors and health status from each device. This means that users can see not only what the sensor is doing but also how well it is performing—a valuable insight into a machine's efficiency. In addition, extended diagnostics allow users to easily identify when a sensor is malfunctioning and diagnose the problem without shutting down the line or machine.

The combination of real-time and historic data not only reduces troubleshooting efforts as issues arise but also allows for optimization of machine maintenance schedules, saving costs and increasing efficiency in the long term

BANNER 5

Industry Challenges

- Unplanned Downtime
- Wash Down Enviornment
- Frequent Product Changeover
- Machine Troubleshooting
- Detecting Challenging Packaging material
- Safeguarding Complex machines
- Predictive Maintenance
- Data and Analytics
- Food Safety Regulations
- Track and Trace

Banner Engineering is Developing Products to meet these Challenges:

IO-Link Communication

IO-Link is an open standard serial communication protocol that allows for the bi-directional exchange of data from sensors and devices that support IO-Link and are connected to a master. The IO-Link master can transmit this data over various networks, fieldbuses, or backplane buses, making the data accessible for immediate action or long-term analysis via an industrial information system (PLC, HMI, etc). Banner IO-Link products reduce wiring, increase data availability, enable remote configuration and monitoring, simplify device replacement, and provide extended diagnostics.

Safety Products that meet Cat 4 PLe

Protecting employees at your work place is a high priority and that is why Banner designs our safety components to the highest safety ratings in the market.

Ecolab Certified

Many manufactures use a mixture of cleaning chemicals to prevent the growth of bacteria on their equipment. Banner takes this into consideration when selecting housing and window materials for our products for food and beverage industries. Ecolab Certification means the Banner product is robust when exposed to cleaning chemicals and will hold up well to regular cleaning.

FDA Compliant Materials

In the manufacturing process it is possible for food or beverages to come in contact with components on the line during the processing, packaging, or storage process. Banner understands this concern and is developing products with housings made of FDA compliant materials.

IP69K Products

There is an increasing need in the market to develop sensors that can hold up to washdown areas and therefore Banner is developing more sensors that meet and exceed the IP69K test requirements. The IP69K rating refers to the product's ability to resist ingress of dust as well as high temperature high pressure water.

Hygienic Design

Food safety is a high priority for manufacturers today. When developing new products for the food and beverage industry, Banner takes into consideration the shape of the sensor housing. It is important for the housing shape to be self-draining to remove residues of products and chemicals during the cleaning process. The housing should also be smooth and free from crevices, sharp corners, protrusions, and shadow zones.

Packaging in the Food Industry

The food industry is the largest industry on the planet. As economies around the world continue to evolve and develop, so do the lifestyles and demands of consumers. In this highly competitive market, a company's ability to respond and adapt to these changes is critical. Changing consumer demands quickly translates to changes in products, production processes and packaging.

Banner has developed products specifically designed for the food industry. Our industry knowledge and expertise in sensors and vision sensors, LED lights and indicators, wireless networks and safety control allow us to offer solutions that address these challenges. Products and solutions from Banner help food manufacturers around the world reduce expenses, improve quality and efficiency, and increase product output and profits without compromising worker safety.

QM26 Clear Object Detection QS18 Clear Object Detection

Key Benefits

- Reliably detects transparent containers no matter what shape or surface
- Holds up to chemicals used to clean equipment which reduces downtime
- Holds up to temperature cycling which occurs in high temperature and high pressure washdown
- concern for maintenance

• Stable measurement minimizes waste

• Easily deployable without need to teach

• Visual feedback for easy adjustment and

specific range or empty core

see page 40

Hopper Fill Level Monitoring

• Sub-millimeter repeatability regardless

Challenge

- Variable target size, texture, color and reflectivity
- Measuring hopper fill level while avoiding false readings from side walls

Key Features

- Best in class linearity, repeatability and resolution
- Visible red laser spot
- Two-line, eight-character display
- 12 m and 24 m range

Featured Solution

troubleshooting

Other Sslutions LE550 QT50U

ITE

Key Benefits

- Accurate readings regardless of color, texture, or angle of target
- Laser spot allows for easy alignment
- Visual feedback for quick adjustment and troubleshooting
- Long range allows sensor to be out of the way of operators or for washdown

• Quick installation and the reflector is not a

see page 45

Clear Object Detection

Challenge

- Sense leading edge of clear PET trays and clamshell packaging
- Food powder on reflector creates false outputs
- Complicated sensor set up

Key Features

- Polarized coaxial optical design
- 400 µs ON/OFF response time
- ClearTracking Algorithm
- Single push teach method

Carton Verification

in the appropriate carton

can increase downtime • Need easy-to-use solution

• Ethernet communications

• Up to 30 stored inspections

• Configured via touchscreen

• Ensuring the product is correctly placed

• Changeover between different products

• Reads a variety of linear and 2D barcodes

Challenge

Key Features

Featured Solution

QS18 Clear Object Detection

Other Solutions Q4X

Key Benefits

- Reliably detects clear and mirror-like surfaces
- Precise leading-edge detection
- Ability to compensate for dust build-up and ensure consistent detection
- Single push teach method makes for quick and easy installation

see page 64

Cabinet Lighting

Challenge

- Limited space inside panel
- Dark control panel makes it difficult to troubleshoot problems

Key Features

- 15 mm profile
- Completely sealed with an IP67 rating for use in wet or dusty environments

iVu GEN II BCR Other Solutions

Featured Solution

PresencePlus BCR

Key Benefits

- Robust barcode decoding
- Barcode data can be stored in PLC or set for simple pass fail
- Reduce downtime with saved inspections for different products
- No complex software minimizes necessary training for setup

Other Solutions WLB32

Key Benefits

- Low profile fits in tight spaces
- Will hold up and last a long time in tough environments

see page 47

Sensors for Wash Down Areas

Challenge

- High pressure high temperature washdown
- Harsh cleaning agents degrade housing
- Thermal cycling causes condensation

Key Features

- IP69K-rated
- Ecolab certified
- Ultrasonically welded joints
- Epoxy encapsulated

Featured Solution

Other Solutions

T18-2

Key Benefits

- Tested to withstand 1200 PSI and 180 °F washdown
- Chemically compatible with washdown chemicals
- Ultrasonically welded joints create one piece housing
- Epoxy-filled housing reduces potential for condensation

see page 66

Machine Illumination—Washdown

Challenge

- Machine illumination in close contact with food
- Wash down area
- Food contamination hazards

Key Features

- Brilliant LED illumination in hygienic cylindrical design
- Rugged ultrasonically welded, IP69K construction and Ecolab certified
- Shatterproof copolyester housing

Featured Solution

WLS27 Other Solutions WLS15

Key Benefits

- 50,000 hours lifetime, easy-to-clean light
- Specifically designed to withstand food and beverage industry applications
- No secondary enclosure needed to protect against broken lights

Wash Down Touch Buttons

Challenge

- Control panel located in washdown area
- Workers use thick rubber gloves
- Food area

Key Features

- Rugged IP69K construction
- Smart electric field sensing technology
- FDA-grade models available

Featured Solution

S22 Touch

Key Benefits

- Built for high-pressure washdown environments
- Easily actuated with bare hands or work gloves
- FDA-grade models for use in food environments

see page 77

Safety Light Curtain— Wash Down Area

VasiTDOWITAIea

Challenge

- Safeguard food processing machine
- Wash down area with harsh chemicals
- Temperature cycling

Key Features

- End-to-end zone protection with no dip switches
- IP69K enclosure with 316L stainless steel end caps
- Hydrophobically vented

Featured Solution

EZ-SCREEN LS (IP69K)

Key Benefits

- Intuitive, easy-to-use
- Build to withstand high pressure, high temperature washdown
- Air vents with vapor barriers prevent condensation during thermal cycling

E-Stop Safety—

Wash Down Area

Challenge

see page 56

- Holding up to a harsh environment
- Ability to identify which E-Stop was pressed
- Assembling components is time consuming

Key Features

- IP69K rated FDA Grade Silicon cover
- Ecolab certified
- Preassembled for fast installation
- Green/Red lighted base
- 8-pin Quick-Disconnect

Featured Solution

30 mm Mount E-Stop (IP69K)

see page 58

Key Benefits

- Withstands high pressure and high temperature washdown
- Certified to withstand cleaning chemicals used in the food processing industry
- 360° visible indication of E-Stop actuation
- Easy installation with no assembly or wiring required

Safety Monitoring

Challenge

- Safeguard machine with varying safety add-ons depending on customer needs
- Complex logic or multiple safety scenarios
- Communicate with HMI to display machine status

Key Features

- Free, easy-to-use software using drag and drop function blocks
- Simulation mode
- Expandable I/O modules
- Industrial Ethernet communications and Profinet communications

Featured Solution XS26-2

Other Solutions

see page 60

Key Benefits

SC26-2

- Configure safety program in minutes
- Test configuration without need to wire or even own safety controller
- Base controller with 26 inputs and two dual-channel safety outputs can be expanded to fit machine requirements
- Ethernet-enabled models allows for easy communications with PLC or HMI

Packaging in the Beverage Industry

Beverage production offers some of the biggest challenges in factory automation.

From severe conditions and harsh cleaning processes that can quickly degrade system components to safeguarding palletizers, conveyors, and other equipment that pose a safety hazard to personnel, each challenge works against total Overall Equipment Effectiveness (OEE) and the overall profitability of an organization.

Banner understands these challenges. Our industry knowledge, expertise in sensors, safety control, LED lights and indicators is combined the most comprehensive product catalogs in the industry. We are able to provide products and solutions that solve the unique challenges faced by beverage producers, helping them ensure and improve product quality, productivity, and safety, and achieve maximum Overall Equipment Effectiveness.

BANNER 15

Solutions for Packaging in the Beverage Industry

Line Pressure Control

Challenge

- Sensing bottle stoppage and shortage often requires two sensors
- On and Off-delay logic to ignore passing bottles requires additional PLC programming
- Bottles can be clear to opaque and filled or empty

Key Features

- Dual discrete output
- Programmable output logic
- Dual mode/Clear Object Detection mode

Featured Solution Q4X Dual Discrete

Key Benefits

- One sensor solution instead of two
- On and off-delays within sensor reduce PLC programming
- Robust clear object sensing using distance and intensity changes

Roll Diameter

Challenge

- Flexible packaging often contains vibrant, multi-colored graphics of varying reflectivity that can be difficult to reliably sense
- Variable roll stock diameter increases changeover time when sensors need to be adjusted

Key Features

- Laser triangulation with linear array technology
- Ready to measure full scale out of box or can be programmed with integrated LCD display

Featured Solution LE250/550

Other Solutions Q4X LTF

Key Benefits

- Ensures repeatability and accuracy for challenging targets regardless of color, reflectivity, or angle
- Reduces downtime between product changeover

Shrink Sleeve Labelling At High Speeds

Challenge

- High speed shrink sleeve applicator can run 800 bottles per minute
- Precise leading-edge sensing to center sleeve on bottle

Key Features

- 700 µs response time
- Laser-based retroreflective sensor

Featured Solution

QS18LLP Other Solutions DF-G2

QS18 Clear Object Detection

- Fast response time to easily keep up with bottling line
- Narrow laser beam ensures repeatable leading-edge sensing

Clear Bottle Tipped

Challenge

- Detect downed bottles to prevent jams on filling line
- Bottles can be plastic, glass, clear or opaque

Key Features

- Single-point teach mode
- Coaxial polarized optics

Featured Solution

QS18 Clear Object Detection

Other Solutions

Key Benefits

- Easy teach process minimizes install time
- Coaxial optics ensure reliable sensing regardless of material or opacity

see page 46

Level Fill

Challenge

- Sense liquid in bottles of various colors from clear to opaque
- Sense under-filled clear or opaque bottles

Key Features

- 1450 nm wavelength detects water-based liquids inside translucent or opaque plastic and glass bottles
- Use of apertures to decrease the minimum detectable change in liquid level

Featured Solution QS30H2O

Other Solutions DF-G3LIR

- See through bottles and detect water-based liquids
- Under-filled bottles can be removed from bottling line

see page 64

Data Code Presence

Challenge

- Laser etched date code changes regularly
- Product changeover requires parameter changes without connecting to a PC

Key Features

- Easy-to-use toolset
- Integral and remote screen for configuration and troubleshooting
- Save and store 30 inspections

Featured Solution iVu Plus BCR Gen2

Other Solutions

VE

P4 Omni

Key Benefits

- Quickly create barcode inspection
- No computer software needed for setup
- Save inspections for quick product changeover

Registration Mark on Shrink Sleeve Label

Challenge

- Repeatable sensing of registration mark
- Registration mark colors vary depending on product
- Shiny, high-gloss labels

Key Features

- 50 µs response time
- RGB LED
- Smart gain-control algorithm

Featured Solution R58E

Other Solutions R55F

- Quick response time ensures repeatable sleeve length
- RGB LED optimizes contrast
- Smart gain-control maximizes performance on low-contrast or high-gloss applications

Sensors for Wash Down Areas

Challenge

- Case packers are subject to washdown procedures
- Cases are often multicolored and have a glossy finish

Key Features

- IP69K, FDA-grade materials
- Ultrasonically welded housing and epoxy encapsulated cavities
- High excess gain

Featured Solution

T18-2 Other Solutions M18-4

Key Benefits

- Built to withstand high-pressure, hightemperature washdown
- One-piece construction eliminates adhesives and effectively seals out moisture
- Minimal color sensitivity prevents chattering output on difficult targets

see page 66

Machine Illumination—Washdown

Challenge

- Enclosed area is dark, making it hard for operators to see potential problems
- Filler machine is subject to washdown procedures
- Secondary lighting enclosure to protect against broken pieces

Key Features

- Bright LED illumination rated for 50k hours
- Hygienic, IP69K, Ecolab certified housing
- Shatterproof copolyester shell

Featured Solution WLS27

Other Solutions WLS28-2

Key Benefits

- Long lasting LED lights require minimal maintenaince
- Rugged design stands up to demanding washdown procedures
- Shatterproof housing can be installed directly inside the machine without worry

Wash Down Touch Buttons

Challenge

- Control panel located in washdown area
- Workers use thick rubber gloves
- Food area

Key Features

- Rugged, fully encapsulated IP69K construction
- Smart electric field sensing
- FDA-grade models available

Featured Solution

S22 Touch

Key Benefits

- Built for high-pressure washdown environments
- Easily actuated with bare hands or work gloves
- FDA-grade models for use in food environments

see page 77

Cabinet Lighting

Challenge

- Limited space inside panel
- Dark control panel makes it difficult to troubleshoot problems

Key Features

- 15 mm profile
- Completely sealed with an IP67 rating for use in wet or dusty environments

Featured Solution WLS15

Other Solutions WLB32

Key Benefits

- Low profile fits in tight spaces
- Will hold up and last a long time in tough environments

Machine Indication

Challenge

- Ability to easily see indicator status from all angles in high ambient light conditions
- Machines use combination of AC and DC power sources
- Installation/Assembly time

Key Features

- Constructed with white windows with high intensity LED's
- AC and DC power options available
- Audible options
- Preassembled models

Featured Solution

Other Solutions

TL50

TL70

Key Benefits

- High visibility of on and off states
- Flexibility to work with machines regardless of power supply
- Fast installation as no assembly is required

see page 72

Safety Monitoring

Challenge

- Safeguard machine with variable safety add-ons depending on customer needs
- Complex logic or multiple safety scenarios
- Communicate with HMI to display machine status

Key Features

- Free, easy-to-use software using drag and drop function blocks
- Simulation mode
- Expandable I/O modules
- Ethernet and Profinet communications

Featured Solution XS26-2

Other Solutions SC26-2

Key Benefits

- Configure safety program in minutes
- Test configuration without need to wire or even own safety controller
- Base controller with 26 inputs and two dual-channel safety outputs can be expanded to fit machine requirements
- Ethernet-enabled models allow for easy communications with PLC or HMI

Safety Light Curtain—

Wash Down Area see page 56

Challenge

see page 60

- Safeguard beverage palletizer
- Wash down area with harsh chemicals
- Temperature cycling

Key Features

- End-to-end zone protection with no dip switches
- IP69K enclosure with 316L stainless steel end caps
- Air vent with vapor barrier

Featured Solution

EZ SCREEN LS (IP69K)

Key Benefits

- Intuitive, easy-to-use safety light curtains
- Built to withstand high pressure high
- temperature washdownAir vents with vapor barriers prevent condensation during thermal cycling

E-Stop Safety—

Wash Down Area

see page 58

Challenge

- Harsh environment with high pressure washdown
- Difficult to tell what E-Stop is pressed when wired in series
- Modular systems are time consuming to install

Key Features

- IP69K rated FDA Grade Silicon cover
- Ecolab certified
- Green/Red lighted base
- 8-pin Quick-Disconnect

Featured Solution 30 mm Mount E-Stop (IP69K)

- Withstands high pressure and high temperature washdown
- Certified to withstand cleaning chemicals used in the food processing industry
- \bullet 360° visible indication of E-Stop actuation
- Easy installation with no assembly or wiring required

Packaging in Consumer Goods

From stand-up pouches packed in bliss boxes to plastic clam shells shrink-wrapped together, the size, shape and materials used to package a product are becoming increasingly diverse. To accommodate this diversity, packaging automation is becoming more intelligent to support a greater number of SKUs on production lines. With the accelerating pace of packaging automation comes greater need to safeguard packaging equipment.

Solutions for Packaging in Consumer Goods Industry

see page 43

Shiny Product Detection

Challenge

- Reflective, irregular shaped objects can cause erratic and inconsistent readings
- No gap between products as they come down the conveyor
- PLCs with slow scan times may not keep up with high speed lines

Key Features

- High excess gain and dynamically adjusted laser power
- Built-in Foreground Suppression Mode
- On-delay and off-delay logic built into sensor

Featured Solution Q4X Other Solutions LTF

Key Benefits

- Excess gain and dynamic laser power allows the sensor to reliably measure shiny objects at steep angles
- Foreground Suppression Mode allows a sensing window to be set on the apex of the container as it passes by
- Built-in on and off-delays can extend output time

Roll Diameter

Challenge

- Accurately measure roll diameter of various materials
- Large parent rolls of material
- Easy to setup without need to present full/empty roll

Key Features

- Repeatable sensing regardless of texture, color, or angle of target
- 12 m and 24 m ranges available
- Two-line, eight-character display with push button input

Key Benefits

- Repeatable and accurate measurements regardless of target's color or texture
- Perform average, max/min, measurement range readings instead of a single point measurement
- Easy setup, troubleshooting, and real-time feedback

Featured Solution I TF **Other Solutions** LE550

Key Benefits

- Accurate measurement reduces waste left on the core
- Long ranges for large rolls and easy alignment with visible laser spot
- Pushbutton interface allows for easy setup, adjustment, and troubleshooting

see page 41

Material Thickness—Diaper

Challenge

- Control thickness of absorbent material
- Porous or uneven material causes erratic reading
- · Quickly change measurement range for product changeover

Key Features

- Laser triangulation distance measurement
- Advanced measurement algorithms
- Two-line, eight-character display with pushbutton programming

Featured Solution LE 550/250

Other Solutions Q4X

Clear Object Detection

Challenge

- Two sensors used to sense down bottle and prevent jams on filling line
- Containers can be plastic, glass, clear or opaque

Key Features

Fill Level Challenge

container

Key Features

clear liquid inside • Repeatable level control

• Apertures available

- Single-point teach mode
- Coaxial polarized optics

Featured Solution

QS18 Clear Object Detection

Other Solutions

Key Benefits

- Easy teach process minimizes install time
- Coaxial optics ensure reliable sensing regardless of material or opacity

see page 46

Web Monitoring/ Splice Detection

• Sense underfilled bottles through an opaque

• Need to see through plastic bottle, but not

• 1450 nm wavelength LED emitter

• 8 m model QS30H2O sensor

Challenge

- Material texture and transparency vary
- Dusty environment
- Easy setup

Key Features

- Variety of opposed mode fiber arrays for edge guiding
- High excess gain with auto thresholding
- Option for mid-point teach mode

Featured Solution QS30H2O

Other Solutions DF-G3LIR

Key Benefits

- Special wavelength that cannot see through water-based liquids
- Long range sensor can see through bottles, but not water-based liquid inside
- Use of apertures narrow the effective beam for precise fill level

DF-G3

Featured Solution

Key Benefits

- Opposed mode fiber arrays minimize effects of changing textures and transparencies
- Able to burn through dust and compensate for dust that settles on fibers
- Mid-point teach learns the optimal web position with an easy single-point teach

see page 48

see page 62

Label and Cap Verification

Challenge

- Ensure cap integrity, label verification and bottle orientation before case packer
- High product changeover
- Vision systems can be complex and require computer software

Key Features

- Multiple vision tools in one inspection
- Save up to 30 inspections
- Configuration via integrated or remote display

Featured Solution

iVu Plus TG Gen2 Other Solutions VE

Key Benefits

- One iVu vision sensor can inspect both cap and label using easy-to-use Match tool
- Preconfigured inspections reduce downtime between product changeovers
- No complex software to learn, easily troubleshoot problems through integral or remote screen

see page 70

Visual Web Inspection

Challenge

- Operator visually inspects web of non-woven material for holes or thin spots
- Product changeover and operator changes require easy adjustability to get proper contrast
- Fluorescent lights require maintenance and risk of broken glass

Key Features

- Bright, uniform light
- Dimming capable via potentiometer or remote input
- Rugged metal housing, shatterproof light cover, long-lasting energy-efficient LEDs

Featured Solution WLB92

Other Solutions WLB32

Key Benefits

- Uniform light acts as backlight to see thin spots on web
- Easily dimmable to accommodate operator preferences and product changes
- Industrial-grade design provides maintenancefree illumination

Cabinet Lighting

Challenge

• Limited space inside panel

• Dark control panel makes it difficult to troubleshoot problems

Key Features

- 15 mm profile
- Completely sealed with an IP67 rating for use in wet or dusty environments

Featured Solution WLS15

Other Solutions WLB32

Key Benefits

- Low profile fits in tight spaces
- Will hold up and last a long time in tough environments

see page 65

E-Stop Safety

Challenge

- Many E-stops in series make it difficult to tell which one is pressed
- Modular systems are time consuming to install

Key Features

- Green/Red lighted base
- 8-pin Quick-Disconnect

Featured Solution 30 mm Mount E-Stop

Other Solutions

Key Benefits

- 360 visible indication of E-Stop actuation reduces downtime
- Easy installation with no assembly or wiring required

Safety Light Curtain

Challenge

see page 58

- Safeguard palletizing machine
- Alignment of light curtains over large spanIn an area where accidental impact can occur and cause damage

Key Features

- End-to-end zone protection with no dip switches
- Bi-color alignment indicators
- Metal end caps, this aluminum housing with 5 mm recessed window

Featured Solution

EZ-SCREEN LS Other Solutions EZ-SCREEN LP

Key Benefits

- Intuitive, easy-to-use safety light curtains
- Highly visible indicators streamline alignment process and facilitate easy troubleshooting
- Heavy duty housing to avoid damage from impact

Safety Monitoring

Challenge

see page 56

- Safeguard machine with variable safety add-ons depending on customer needs
- Complex logic or multiple safety scenarios
- Communicate with HMI to display machine status

Key Features

- Free, easy-to-use software using drag and drop function blocks
- Simulation mode
- Expandable I/O modules
- Ethernet and Profinet communications

Featured Solution

XS26-2 Safety Controller

see page 60

Other Solutions SC26-2

- Configure safety program in minutes
- Test configuration without need to wire or purchase safety controller
- Base controller with 26 inputs and two dual-channel safety outputs can be expanded to fit machine requirements
- Ethernet-enabled models allows for easy communications with PLC or HMI

Packaging in the Pharmaceutical Industry

Around the world, companies operating in the pharmaceutical manufacturing industries rely on Banner Engineering for our industry knowledge, experience and expertise to provide products and solutions that improve automation efficiency, maintain product quality, and protect operator safety.

Banner is an expert in advanced optics, LED, laser, and photoelectric circuits, offering sensors for tablet fill level monitoring and count verification, cap and closure inspection, print and label verification, and product identification and serialization. We have the industry's most complete family of safeguarding devices, allowing customers to design the highest level of safety into a machine, without compromising productivity. LED products from Banner provide clear status indication and bright, uniform illumination for machines, processes and workstations. We have a complete line-up of actuators, ideal for medical assembly, medical kitting and storage retrieval systems.

BANNER 29

Solutions for Packaging in the Pharmaceutical Industry

see page 43

Clear Vial Detection

Challenge

- Reliably sense different vials of varying sizes, transparencies, and materials without a retroreflector
- Exposure to sterilizing chemicals

Key Features

Challenge

• Prevent frequent start/stops

sizes, and shapes

Key Features

off delays

- Algorithm uses distance and intensity for clear object detection
- FDA grade 316 Stainless Steel housing that is IP69K washdown rated and Ecolab certified

Vibratory Feeder - Stopper Fill Level

• Reliably detect stoppers of different colors,

• Independent and adjustable on delays and

• Reliably measure distance regardless of the

Featured Solution Q4X (flush front)

Other Solutions

QM26 Clear Object Detection QS18 Clear Object Detection

Key Benefits

- Reliably detect transparent objects without a reflector
- Reduced downtime from reflectors fogging up
- Reduced unscheduled down time from mechanical failure due to the SIP environment

Liquid Level Detection

surface reflectivity or color

Challenge

- Detect liquid level in different color vials and bottles
- Limited space to mount a sensor

Key Features

- Detect water-based liquids inside translucent or opaque plastic and glass containers
- Compatible with standard glass fibers

Featured Solution

Other Solutions Q60 (Adj. Field) QS30 (Adj. Field)

Key Benefits

- Increase the vibratory bowl's product life by reducing the start/stop frequency by ignoring signal noise
- A single sensor and setup will work detect all stopper variations, reducing change over time

Featured Solution

DF-G3LIR Water sensor with a pair of IT43ST5-VL fiber optic bundle and L2 Lens

Other Solutions QS30H2O

Key Benefits

- Reduce product waste by detecting underfilled vials early in the packaging process
- Quick and simple installation with many small fiber optic bundles styles to choose from

see page 49

see page 62

Raised/Missing Stopper inspection

Challenge

- The height of the vials can vary
- Do not want to support a complex "vision system"

Key Features

- Find and inspect key features
- Integral and Remote Touch Screen for programming

Featured Solution iVu Plus TG Gen2

Other Solutions

VE Q4X

Key Benefits

- No need to mechanically move the iVu Plus when the height of the vial changes, which reduces downtime
- Easy configuration without a PC reduces setup time

see page 64

Label Verification

Challenge

- Position and type of the barcode on the label varies between product SKUs
- Ability to view inspection status without connecting to a PC

Key Features

- Imager-based barcode reader can read all the standard 1D and 2D barcodes within the sensing window
- Integral and Remote Touch Screen for configuring and viewing captured images

Featured Solution

iVu Plus BCR Gen2

Other Solutions

PresencePLUS OMNI TCNM Barcode Reader

Key Benefits

- No required mechanical adjustments reduces changeover times
- Reduce unplanned down time by making all the necessary adjustment right on the integrated touch screen

Machine Illumination and Status Indication

Challenge

- Easily identify when the machine requires an operator intervention
- Hygienic requirements and shatterproof design inside a packaging area

Key Features

- Ability to switch between colors from a 24 V dc input
- Encased in a shatterproof, chemically resistant, IP69K copolyester shell

Featured Solution

WLS27 (Dual Color)

Other Solutions

WLS28-2 (Dual Color)

Key Benefits

- Quickly identify the machine requiring operator intervention by illuminating the entire machine
- Reduce installation costs by installing the worklight without an additional protective housing

see page 43

Roll Diameter Measurement to Reduce Waste

Challenge

- Flexible packaging often contains vibrant, multi-colored, graphics of varying reflectivity that can be difficult to reliably sense
- Varying size of roll stock increases changeover time when sensors need to be adjusted

Key Features

- Uses laser triangulation with linear array technology
- Ready to measure right out of the box or can be programmed with the integrated LCD display

Featured Solution Q4X Other Solutions LE250 S18U

Key Benefits

- Ensures repeatability and accuracy for challenging targets regardless of color, reflectivity, or angle
- Reduces downtime with rapid product changeovers

see page 48

Tablet Counting During Bottle Filling

Challenge

Key Features

fiber optics

as small as 2 mm

- Tablet dust can accumulate in the environment
- Tablet can be as small as 2 mm in diameter

• Automatic Gain Compensation (AGC)

algorithm compensates for dust build-up on

• 40 mm fiberoptic array can detect objects

Featured Solution

DF-G3 Small Object with PGIRS66U-40 fiber

Other Solutions

D10 Amp with PFCVA-25X25-E fiber

Key Benefits

- Increase the time between scheduled maintenance by extending the counting cycle and maintain count accuracy as dust increases during production
- Improve process flexibly by detecting even the smallest tablet in a large 40 mm area

Blister Filling Inspection

Challenge

- Partial tables can fall into a blister cavity
- The size of the blister pack and number of blisters per pack change frequently

Key Features

- 2 megapixel imager
- Store hundreds of configurations on the VE smart camera
- Standard Ethernet communication protocols like Etherent/IP, and FTP

Featured Solution

Other Solutions iVu Plus

Key Benefits

- Detect small defects and partial tablets
- Rapid product changeovers
- Easily export results and images to central database

see page 61

E-Stop Safety-

Pharmaceutical Isolator see page 58

Challenge

- Harsh environment with exposure to cleaning chemicals
- Difficult to tell what E-Stop is pressed when wired in series
- Modular systems are time consuming to install

Key Features

- IP69K FDA Grade Silicon cover
- Ecolab certified
- Green/Red lighted base
- 8-pin Quick-Disconnect

Featured Solution

30 mm Mount E-Stop (IP69K)

Key Benefits

- Certified to withstand cleaning chemicals used in the pharmaceutic industry
- 360° visible indication of E-Stop actuation
- Easy installation with no assembly or wiring required

Safety Light Curtain—

Pharmaceutical Isolator see page 56

Challenge

- Safety light curtains that scan across the isolator internally must be easily cleaned and hold-up to the sterilization process
- Safeguarding large filling and packaging systems have multiple safeguarding points and zones

Key Features

- IP67/IP69K, hygienically designed and chemically-resistant tubular enclosed EZ-SCREEN LS
- Scalable safety solution

Featured Solution

EZ-SCREEN LS (IP69K)

Other Solutions

EZ-SCREEN LP

Key Benefits

• Designed to work in the harsh environment of a sterile filling and packaging systems

Safety Monitoring

0

- Safeguard machine with variable safety add-ons depending on customer needs
- Complex logic or multiple safety scenarios
- Communicate with HMI to display machine status

Key Features

Challenge

- Free, easy-to-use software using drag and drop function blocks
- Simulation mode
- Expandable I/O modules
- Ethernet and Profinet communications

Featured Solution

XS26-2 Other Solutions SC26-2

see page 60

Key Benefits

- Configure safety program in minutes
- Control and monitor all the safety devices on the filling equipment
- Test configuration without need to wire or even own safety controller
- Base controller with 26 inputs and two dual-channel safety outputs can be expanded to fit machine requirements
- Ethernet-enabled models allow for easy communications with PLC or HMI

Solutions for Remote Monitoring

Solutions for Remote Monitoring

see page 54

Temperature and Vibration Monitoring

Challenge

- Off-line motor testing requires costly down time and can miss changes between testing
- On-line or dynamic testing may neglect key symptoms that indicate motor decline

Key Features

- · Sensor continuously monitors RMS velocity and temperature to detect problems early
- Monitor remotely using wireless I/O instead of running cable
- Schedule maintenance without disrupting production by getting email or text in real time when vibration threshold has been exceeded

Featured Solution

QMV42VT1 or QMV42T2 (with DX80 nodes, Q45U Nodes, or MultiHop Modbus RTU radios)

Key Benefits

- Automate the testing process to save time and better predict mechanical failure
- Save maintenance costs by scheduling motor rework rather than unplanned downtime

see page 51

Temperature and Humidity Monitoring

Challenge

- Running power and signal wire to sensors may require long conduit runs overhead or underground
- Conduit runs over production lines lead to costly downtime
- Checking temperature and humidity manually is time consuming and the human factor can lead to errors

Key Features

- Battery-powered nodes with compatible temperature and humidity sensors are perfect for ease of installation
- Temperature accuracy of +/- 0.3 °C and humidity accuracy of +/- 2% relative humidity
- Signal is transmitted wirelessly over radio frequencies
- Up to 47 nodes can be added per gateway creating an efficient network collecting data from multiple points

Key Benefits

- Effective solution that reduces the scrap product from out of specification temperatures or humidity
- Easily monitor environmental conditions in locations previously too difficult or expensive to access

Barrel, Tote, or Tank Level Inspection

Challenge

- Difficult to tell how much liquid product is in a barrel, tote or tank
- Running out of product at the wrong time can be a hassle and create unnecessary production loss
- Running cables for power and signal wires to barrels, totes or tanks for automatic level monitoring can be expensive and creates a potential tangled mess as items are moved around

Key Features

- Ultrasonic sensor specifically for tank level monitoring, is optimized for power consumption and has threaded housing to fit a bung of a barrel or tote
- Utilizes power from batteries inside the node for ease of installation and use
- Signal can be monitored remotely with no cables by using wireless radio waves

Featured Solution

K50U Ultrasonic (with DX80 Node. Q45U Node, or MultiHop Modbus RTU radios)

Key Benefits

- Easily monitor remote and mobile barrels, totes and tanks
- Empty barrels are switched with full ones in a timely manner with no production loss
- Manage inventory with real time data indicating when to re-order materials

see page 74

see page 53

Machine Indicator Tower Lights with Wireless Connectivity

Challenge

- Placing indicators in locations that don't have an existing signal cable
- Long conduit runs are costly and installation may cause unnecessary down time
- Legacy machines often don't have the ability to send data to the network

Key Features

- desired location
- Line of sight range of signal is up to 2 miles
- Bright LED's for easy visual monitoring of a machine's condition
- · Wireless connectivity enables machine status to be collected on legacy machines

Featured Solution TL70 Wireless

Tower Light

Key Benefits

- Flexible solution for placing an indicator in the Wireless connectivity results in more uptime and efficient troubleshooting
 - Easy installation compared to hard wiring tower lights into the network

Line Throughput/Scoreboarding/Part Counting

Challenge

- Monitoring machine production throughput requires time-consuming electrical installation DXM100
- Each machine and production line may have unique product detection needs

Key Features

- Nodes on a machine monitor the signal on existing sensors and wirelessly transmit the signal back to a Gateway
- Log the data and communicate to the network or the cloud
- Show production metrics on scoreboard

Featured Solution O4X

Key Benefits

- Easy and cost effective installation
- Add counting capabilities to legacy machines

Wireless Clean Room Indication

Challenge

- Monitor the status of each clean room in one central location without adding long conduit runs
- Signal personnel when it is safe to enter and exit the clean room.

Key Features

- Up to 47 wireless nodes can wirelessly send a wide variety of data to a central gateway.
- Logic controller with action rules and ScriptBasic programming

Featured Solution

K70L Wireless DXM100

Key Benefits

- Without adding additional wiring, send current temperature, humidity, pressure and entry/exit door status from every clean room to a central monitoring room
- Wirelessly activate an indication light and lock or unlock the entry/exit doors based on the room parameters

♦ IO-Link[®]

LE Series

Laser Sensor

- The LE laser sensors are ready to measure right out of the box with easy adjustment, setup and use.
- Easy adjustment with a two-line, eight-character intuitive display
- Repeatability and accuracy for challenging targets, from metal to black rubber
- Visible 2 laser for small spot size and simple alignment
- Applications see page 10, 16, 24

Supply Voltage and Current	12 to 30 V dc Normal Run Mode: 1.7 W, Current consumption less than 70 mA at 24 V dc			
Sensing Beam	ole red Class 2 laser, 650 nm			
Construction	busing: die-cast zinc Lens: polycarbonate			
Environmental Rating	IP67, NEMA 6			
Operating Conditions	Temperature: −20 to +55 °C Humidity: 90% at +55 °C			
Certifications				

OIO-Link[®]

LTF Series

High-Performance Laser Time-of-Flight

- Best in class combination of range, repeatability and accuracy enable highly reliable target detection and precise distance measurement
- Two-line, eight-character display and push-button programming for easy setup, troubleshooting and real-time distance measuring
- Durable IP67 housing, high ambient light immunity and stable performance across temperatures provide reliable performance in challenging environments
- Advanced options, including delay timers, advanced triggered measurement modes and cross-talk avoidance
- Applications see page 10, 24

R58E Series

Registration Mark Sensor

- The R58E sensors offer maintenance-free, solid-state reliability for color contrast applications. With a fast, 50-microsecond sensing response time, the R58E provides excellent registration repeatability, even in speedy applications.
- Bipolar outputs
- 10,000 actuations per second and 15 microsecond repeatability
- Rugged mechanical housing rated to IP67
- Applications see page 18

Q4X Series

Laser Measurement Sensor

- Save time and money with the Q4X which is ready to measure right out of the box
- A simple user experience from installation to setup
 - Bright spot alignmentThree push buttons simplify setup
 - Intuitive menus
- Four-digit display shows distance to target in mm
- FDA-grade stainless steel is suitable for IP69K washdown environments
- Applications see page 10, 16, 24, 30, 32

)F-G3 Series

Long-range Fiber Optic Amplifiers

- World-class long-range sensing capability, more than 3 m (10 ft) with opposed mode fibers
- Easy to read dual digital displays show both signal level and threshold simultaneously
- Cross-talk avoidance function allows seven inspections in dense sensing point applications
- Models with IO-Link enable a point-to-point communication link between a master device and a sensor, facilitating remote monitoring, teaching, and configuration
- Operator control of the sensitivity (hysteresis) provides additional detection sensitivity, or a stabilized output depending on the application details
- Applications see page 25, 32

K50U Series

Ultrasonic Sensor for Wireless Level and Tank Monitoring

- Three meter sensing range with a 300 mm dead zone
- Provides a distance measurement from the target to the sensor
- Built-in temperature compensation
- Rugged design for demanding sensing environments; rated IEC IP67, NEMA 6P
- Functions as a Modbus slave device using RS-485
- Applications see page 36

Range and Frequency	Supply Voltage	I/O	Models
Range: 300 mm to 3 m Frequency: 114 kHz	3.6 to 5.5 V dc	Distance to target using a 1-wire serial interface	K50UX1RA
Range: 300 mm to 3 m Frequency: 114 kHz	3.6 to 5.5 V dc or 10 to 30 V dc	Distance to target using Modbus RS-485	K50UX2RA

BWA-BK-006 Mounts both the K50U Ultrasonic sensor and a Wireless Q45 Node

5-pin Double Ended M12/Euro-Style with Shield

Construction	Housing: PBT polyester Transducer: Epoxy/ceramic composite
Sensing Range	Sensing range: 300 mm to 3 m (11.8 in to 118 in)
Resolution	Resolution: 0.1% of distance (1.5 mm minimum)
Sensor Connection	1 ¼ in NPT Connection
Cable Connection	Integral 5-pin M12/Euro-style male quick disconnect (QD)
Environmental Rating	Leakproof design, rated IEC IP67 (NEMA 6)
Certifications	((

QT50U Series

Long-Range Ultrasonic Sensors

- Features a small ultrasonic dead zone of 200 mm
- Available in a chemically resistant model with a Teflon® flange
- Detects targets at long ranges within confined areas, such as a storage tank, without interference from the tank walls
- Push-button and remote TEACH-mode programming with an external switch, computer or controller for added security and convenience
- Applications see page 10

DXM Wireless Controller

Industrial Wireless Controller

- ISM radios available in 900 MHz and 2.4 GHz for local wireless network
- Converts Modbus RTU to Modbus TCP/IP or Ethernet I/P
- Logic controller can be programmed using action rules and text language methods
- Cellular connectivity
- Micro SD card for data logging
- Email and text alerts
- Local I/O options: universal inputs, NMOS outputs, and analog outputs
- Powered by 12 to 30 V dc, 12 V dc solar panel, or battery backup
- RS-232, RS-485, and Ethernet communications ports; and a USB configuration port
- LCD display for I/O information and user programmable LED's
- Applications see page 37

Description	Frequency	Models*
DXM100 Controller, with DX80 Gateway, preconfigured as a protocol converter	900 MHz	DXM100-B1R1

EZ-SCREEN® LS

Rugged Safety Light Screen with Enhanced Features

- Alignment indicators are highly visible and intuitive diagnostics simplify setup, facilitate troubleshooting and streamline installation
- No blind zone design provides end-to-end sensing to eliminate gaps in detection
- Metal end caps, thick aluminum housing and a recessed window to avoid damage from impact
- Standard pairs, cascade systems and extensive accessories to suit a wide variety of safeguarding configurations
- Applications see page 13, 21, 27, 33

ANNER

•	
Supply Voltage at the Device	24 V dc \pm 15% (use a SELV-rated power supply according to EN IEC 60950). The external voltage supply must be capable of buffering brief mains interruptions of 20 ms, as specified in IEC/EN 60204-1.
Short Circuit Protection	All inputs and outputs are protected from short circuits to +24 V dc or dc common
Effective Aperture Angle (EAA)	Meets Type 4 requirements per IEC 61496-2
Residual Ripple	±10% maximum
Electrical Safety Class	III (per IEC 61140: 1997)
Operating Range	 0.1 m to 12 m (4 in to 39 ft) — Range decreases with use of mirrors and/or lens shields: Lens shields — approx 10% less range per shield Glass-surface mirrors — approx 8% less range per mirror See the specific mirror datasheet for more information
Resolution	14 mm, 23 mm, or 40 mm, depending on model
Mounting Hardware	Emitter and receiver each are supplied with a pair of swivel end-mounting brackets (EZLSA-MBK-11). Models 980 mm and longer are supplied with an additional center-mount bracket (EZLSA-MBK-12) for center support in applications with significant vibration. Mounting brackets are 8-gauge cold-rolled steel, black zinc finish.
Enclosure	Extruded aluminum housing with yellow polyester powder finish standard and well-sealed, rugged die-cast zinc end caps, acrylic lens cover
Safety Rating	Type 4 per IEC 61496-1, -2 Category 4 PL e per EN ISO13849-1 SIL3 per IEC 61508; SIL CL3 per IEC 62061
Environmental Rating	Light Screen: IEC IP65/IEC IP67 Enclosure: IP69K
Operating Conditions	-20 to +55 °C (-4 to +131 °F) 95% maximum relative humidity (non-condensing)
Shock and Vibration	Components have passed vibration and shock tests according to IEC 61496-1. This includes vibration (10 cycles) of 10-55 Hz at 0.35 mm (0.014 in) single amplitude (0.70 mm peak-to-peak) and shock of 10 g for 16 milliseconds (6,000 cycles).
Certifications	

E-Stop Button

Illuminated 30 mm Mount

- Illumination allows for easy identification of which E-stop has been activated.
- Easy installation and no assembly or individual wiring required
- Push-to-stop, twist-to-release or pull-to-release operation per IEC 60947-5-5
- Compliant with ANSI B11.19, ANSI NFPA79 and IEC/EN 60204-1 Emergency Stop requirements
- Incorporate with OTB/STB optical touch button for a simplified operator station that does not require an additional enclosure.
- "Safe Break Action" ensures NC contacts will open if the contact block is damaged or separated from the actuator
- Models designed to interface with Safety BUS nodes/gateways
- Applications see page 13, 21, 27, 33

Safety Controller

- Easy to both program and install while providing scalable flexibility to meet your growing automation needs.
- Allows up to eight expansion modules
- Configuration software free of charge
- Real-time live display feedback
- Intuitive functional diagram configuration; logic function blocks including AND, OR, XOR, NAND, NOR, SR Flip-flop, RS Flip-flop
- Ethernet models available providing up to 256 status outputs and non-safety virtual outputs
- Applications see page 13, 21, 27, 33

Power	24 V dc, ± 20% Ethernet models: add 40 mA Display models: add 20 mA Expandable models: add 3.6 A max. bus load
Safety Inputs (and Convertible I/O when used as inputs)	Input On threshold: > 15 V dc (guaranteed on), 30 V dc max. Input Off threshold: < 5 V dc and < 2 mA, -3 V dc min. Input On current: 5 mA typical at 24 V dc, 50 mA peak contact cleaning current at 24 V dc Input lead resistance: 300 Ω max. (150 Ω per lead) Input requirements for a 4-wire Safety Mat: • Max. capacity between plates: 0.22µF • Max. resistance between the 2 input terminals of one plate: 20 Ω
Solid State Safety Outputs	Input On threshold: > 15 V dc (guaranteed on), 30 V dc max. Input Off threshold: < 5 V dc and < 2 mA, -3 V dc min. Input On current: 5 mA typical at 24 V dc, 50 mA peak contact cleaning current at 24 V dc Input lead resistance: 300 Ω max. (150 Ω per lead) Input requirements for a 4-wire Safety Mat: • Max. capacity between plates: 0.22 μF • Max. resistance between the 2 input terminals of one plate: 20 Ω
Response and Recovery Times	See Configuration Summary in the data sheet
Environmental Rating	NEMA 1 (IEC IP20), for use inside NEMA 3 (IEC IP54) or better enclosure
Operating Conditions	Temperature range: 0 to +55 °C
Mechanical Stress	Shock: 15g for 11 milliseconds, half sine, 18 shocks total (per IEC 61131-2) Vibration: 3.5 mm occasional / 1.75 mm continuous @ 5Hz to 9Hz, 1.0g occasional and 0.5g continuous @ 9Hz to 150Hz: all at 10 sweep cycles per axis (per IEC 61131-2)
Removable Terminals	Important: Clamp terminals are designed for 1 wire only. If more than 1 wire is connected to a terminal, a wire could loosen or become completely disconnected from the terminal, causing a short. Wire size: 24 to 12 AWG (0.20 to 3.13 mm ²) Wire strip length: 7 to 8 mm (0.275 in to 0.315 in)
Design Standards	Category 4, PL e (EN ISO 13849) SIL CL 3 (IEC 62061, IEC 61508)
Certifications	

VE Series

Versatile, Easy-To-Use Smart Cameras

- Available in 2MP (1600 x 1200 pixels), 1.3MP (1280 x 1024 pixels) and WVGA (752 x 480 pixels) models, all with the same powerful inspection capabilities
- Runtime editing capability reduces costly downtime and the software emulator allows for offline building and troubleshooting of applications
- Factory communications (EtherNet/IP, Modbus/TCP, PROFINET and RS-232 Serial) for integration on the manufacturing floor
- Two-line, eight-character onboard display provides inspection information and focus number and makes it easy to update sensor settings, facilitating fast product changeover
- Robust metal housing with optional lens covers to achieve IP67 rating for use in harsh environments with heat, vibration, or moisture
- Applications see page 32

IVu TG Plus Gen2

Image Sensor

- Image sensor combines the simplicity of a photoelectric sensor and the intelligence of a vision sensor, providing high-performance inspection capabilities at your fingertips
- All-inclusive image sensor with lens, light, IO and touch screen programming
- Optional remote touch screen for programming
- Profinet[®] communication protocol to simplify communications with some of the most commonly used industrial controllers in factory automation
- Supports the ability to obtain results and command rapid product changeovers over TCP/IP, EtherNet/IP, Modbus/TCP protocols or PROFINET
- Ability to change parameters on the fly
- Additional sort tools, multi-tool and the ability to store up to 30 inspections
- Applications see page 26, 31

SMBRD35 SMBKS S Used with: Remote Display Screens

SMBRDM35

iVu & iVu Plus Specifications

General			
Supply Voltage	10-30 V dc		
Demo Mode	Full tool functionality on canned images		
Sensor Lock	Optional password protection		
Integrated Ring Light	Red, IR, Green, Blue, White, UV or no integrated ring light		
Imager	1/3 inch CMOS 752 x 480 pixels; adjustable Field-of-View (FOV)		
Lens Mount	M12 X 1 mm thread (c-mount lens); microvideo lens 4.3, 6, 8, 12, 16, 25 mm		
Output Rating	150 mA		
Exposure Time	0.1 milliseconds to 1.049 seconds		
Construction	Black Valox™ sensor housing; acrylic window iVu Plus Integrated: Die cast zinc and Black Valox™		
External Strobe Output	+ 5 V dc		
Environmental Rating	IP67		
Model Specific			
Power Connection	Integrated and remote touch screen: 12-pin Euro-style (M12) male connector Accessory cordset required for operation; QD cordsets are ordered separately.		
Supply Current	850 mA max. (exclusive of I/O load)		
USB 2.0 Host	Integrated and remote touch screen: 4-pin Pico-style (M8) female connector Optional USB cordset required for operation of USB Thumb Drive. QD cordsets are ordered separately.		
Ethernet Connection	iVu Plus TG: 4-pin Pico-style (M8) male connector. Ethernet cordsets are ordered separately.		
Output Configuration	NPN or PNP, software on-screen selectable		
Tools	Area, Blemish, Match and Sort		
Display	Integrated touch screen: 68.5 mm (2.7") LCD Color Integrated Display 320 x 240 pixels Remote touch screen: See RD35 Remote Display specifications		
Acquisition	100 fps (frames per second) max.		
Operating Conditions	Stable Ambient Temperature: Integrated touch screen: 0 to +45 °C Remote touch screen: 0 to +40 °C		
Remote Display Connection (Remote Touch Screen Models Only)	8-pin Euro-style (M12) female connector. Accessory cordset required for remote display; QD cordsets are ordered separately.		
Certifications	power cordset for CE compliance.		

iVu Remote Display Specifications

Screen Size	3.5" diagonal	Stylus	Delrin
LCD Aspect Ratio	4:3	Display Weight	4.8 oz (RD35), 12 oz (RDM35)
Display Resolution	320 x 240 RGB	Bracket & Stylus Weight	1.1 oz
Viewing Angle	60 degrees left, and 60 degrees right, 50 degrees up, and 55 degrees down	Connection	Molex HandyLink connector
Housing Material	Zinc Zamac #3 (RDM35), Polycarbonate (RD35)	Operating Temperature	0° to + 40 °C
Bracket Material	Delrin (RD35), ABS (RDM35)		

BANNER 63

IVUC-E-415 5 m (15')

iVu Plus BCR Gen2

Bar Code Reader (BCR)

- Powerful, affordable inspection solution solves a wide variety of simple and complex applications
- Solve a variety of linear and 2D bar code applications
- First-time users can have it up and running in minutes
- Optional remote touch screen for programming
- Ability to change parameters on the fly
- Ethernet communication available
- Capable of storing and controlling up to 30 inspections for fast product change over
- Applications see page 11, 18, 31

Accessories are shown on previous page.

WLS27 Series

LED Light Bar

- Encased in shatterproof, UV-stabilized, copolyester shells
- Round shape makes them suitable for laminar airflow applications
- Rugged, water-resistant IP66, IP67 and IP69K design
- Daisy chain power to multiple lights
- Capability to dim lights using the wiring pinout (Hi/Lo/Off)
- Automatic temperature protection built into the unit extends the product life
- Single- and dual-colored models available
- Applications see page 12, 19, 31

IP69K Washdown

WLB32 Series

LED Light Bar

- Banner's WLB32 is an ultra-bright LED fixture that features an even light output for a no glare 'glow'
- Highly energy efficient for overall cost savings
- High/Low/OFF switch
- Daisy chain power to multiple lights
- Metal housing, shatterproof window
- Easy installation with snap clips, or a choice of magnetic or angle brackets
- Applications see page 11, 20, 26

WLB32

Example Model Number: WLB32C285PBQ

WLB92 Series

LED Light Bar

- Increase worker productivity and ergonomics with bright, high-quality, uniform light
- Durable light stands up in your environment with a rugged metal housing and shatterproof light cover
- No maintenance time or cost with long-life, energy-efficient LEDs
- Flexibility to place light where needed with ac and dc models
- Easy installation with variety of mounting options: surface, swivel, snap and hanging brackets
- AC models are DLC certified and have a five year warranty
- Applications see page 26

S22 Touch Series

Flat Touch Button

- Large, bright illuminated area for clear visibility of input and touch status
- Flush mount design sits tight against panel, machine and bracket surfaces
- Independent color control or preconfigured models to suit your indication needs
- Momentary versions remain activated as long as touch is present, while latching versions toggle between activated and not activated states on successive touches
- Excellent immunity to false triggering by water spray, detergents, oils, and other foreign materials
- Rugged, water-resistant IP69K design for washdown environments
- Ergonomically designed to eliminate hand, wrist and arm stresses, requiring no physical pressure to operate and can be actuated with bare hands or work gloves
- Applications see page 12, 19

Multipurpose Independent Control

Supply Voltage	10 to 30 V dc
Supply Current	80 mA max current (exclusive of load)
Supply Protection Circuitry	Protected against reverse polarity and transient voltages
Construction	Housing: Polycarbonate or FDA grade plastic, depending on model Translucent dome: Polycarbonate or FDA grade plastic, depending on model Mounting Nut: PBT
Environmental Rating	Standard: UL Type 4x, 13 FDA Grade: UL Type 4x Cable, Pigtail, QD models: IEC IP66, IP67, IP69K per DIN 40050-9 on front and back Terminal models: IEC IP66, IP67, IP69K per DIN 40050-9 on front only
Connections	2 m PVC integral cable, integral Euro-style QD, 150 mm Euro-style pigtail QD or terminal
Operating Conditions	Temperature: -40 to +50 °C Storage Temperature: -40 to +70 °C
Certifications	

K70L Series

Medium-Sized Domed Indicator

- Bright, uniform indicator light
- All models have flashing input control
- Models are available with up to five colors in one device
- Rugged, water-resistant IP65-rated design
- 12 V to 30 V dc operations
- Wireless options available in either 900 MHz and 2.4 GHz ISM Bands
- Applications see page 37

Supply Voltage and Current	K70L: 12 V to 30 V dc; 200 mA Max. at 12 V dc; 90 mA Max. at 30 V dc
Supply Protection Circuitry	Protected against reverse polarity, transient voltages
Construction	Polycarbonate housing
Environmental Rating	K70L: IEC IP65
Operating Temperature	-40 to 50 °C
Certifications	CE CUL us LISTED Depending on model)
